

RIBBON CONNECTOR M908

M SERIES

The M908 cable connector consists of a single sized, double sided board which contains thirty-six split pins which allows the connection of thirty-six separate wires. All connections are made on the component side of the module. The 10 ohm, $\frac{1}{4}$ watt resistors connected in series with module pins A2, B2, U1 and V1 are provided to afford some measure of protection in the event that these pins are inadvertently connected to a source of supply voltage.

The M908 is primarily intended for use with ribbon cable and is normally supplied with a ribbon cable clamp unless otherwise specified.
