

M622 I/O Bus Drivers

The M622 I/O Bus Driver is an M-series single-height module containing eight I/O bus drivers. Each driver consists of an AND/OR integrated circuit gate and a discrete component open-collector driver.

The following are the input, output, and power characteristics of the M622 module.

INPUTS: Inputs are standard TTL positive logic levels.
The input load is 1.25 units.

OUTPUTS: Outputs are standard PDP-15 positive I/O bus signals. Output characteristics are:
Risettime - 15 ns at the input to the cable
Current sink - 100 mA (maximum) at $V_{ce\text{sat}} = 0.4\text{V}$ (maximum)
Falltime - 10 ns at the input to the cable
Input-Output Delay - 45 ns (maximum)

POWER: The power dissipation of the M622 module is 1.05W (maximum) at +5V.

The M622 module was designed specifically to drive PDP-15 I/O bus signals for devices that use positive logic modules. The M622 module is pin compatible with the M632 module.
