

M920 AND M935 BUS CONNECTOR MODULES

ACCESSORY
MODULES

UNIBUS Jumper Module M920—The M920 Module is a double module that connects the UNIBUS from one system unit to the next. The printed circuit cards are on one-inch centers. A single M920 Module carries all 56 UNIBUS signals and 14 grounds.

M935 Bus Connector—used to interconnect 8/e assemblies. The H9190 may be connected to the 8/e OMNIBUS using two M935's.

M920—\$45.00
M935—\$45.00
