U. S. SYSTEMS/SERVICES PRICE LIST

Q3 HIGHLIGHTS

* **NEW** Expanded Digital Services CS Preface

* **NEW** CS Maintenance Prices (See Digital Services CS Section)

* **NEW** SSD Numbers included in Project & Consulting Services

* **NEW** Digital Services APS/DCS replaces EIS section

* **NEW** Customer Training is no longer part of Digital Services CS. It is a new section entitiled Digital Services CT.

YOUR FEEDBACK IS IMPORTANT TO US

PLEASE USE THE COMMENT CARD PROVIDED

HOW TO USE THE U.S. SYSTEMS/SERVICES PRICE LIST

INTRODUCTION

The **U.S. Systems/Services Price List** is a quarterly publication which contains pricing and descriptive information for all U.S. products and services. It is a convenient reference guide to model numbers, product descriptions, and pricing, as well as Digital's discounts, warranty and service offerings. Prices are accurate as of the date printed on the cover, and are subject to change without prior notice.

HOW TO USE THIS BOOK

The **U.S. Systems/Services Price List** is divided into nine (9) sections, and mimics the Systems and Options (SOC) catalog sequencing for consistency and ease of use. It is not meant to be a configuration guide, but a reference for pricing and t's & c's when working with the Systems and Options catalog and customers. Customers should find the product categories to be most helpful, and consistent with other Digital publications. Customers and Sales should find the alphanumeric index, with prices, most helpful when a quick lookup of a known part number is required.

Throughout the pricing information there are references to special pricing situations (i.e. CALL BUS, CALL CUST TRG, CALL CSS). Telephone information can be found on page 1.1 of the General Preface. A **QUICK TELEPHONE INDEX,** found in the front of the book, provides a complete list of all of Digital's service lines. A quarterly **HIGHLIGHTS** page alerts the reader to changes or new information.

Although we continue to strive towards a policy of no price changes within a given quarter, business conditions oftentimes make this impossible to enforce. AQS, the Electronic Store, DECdirect, and local Digital Sales offices are the best places for current price and quote information.

THE SECTIONS

* GENERAL PREFACE	The **General Preface** provides a guide for using the **U.S. Systems/Services Price List**, as well as detailed discount and warranty information for all Digital products.
* SYSTEMS	The **Systems Section** provides product descriptions, pricing, and discount information for all hardware packaged systems, including VAX Systems/Servers, MicroVAX Systems/Servers, VAXft 300 Systems/Servers, DECsystems/Servers, Workstations, Personal Computing, Realtime Systems, PDP-11 Systems, TEMPEST Systems, Systems Upgrades, and Easy System Upgrades. Part numbers are listed in alphanumeric order within each processor family.
* TELECOMMUNICATIONS AND NETWORKS	The **Telecommunications and Networks Section** includes pricing, service, and discount information for all networking options. Part numbers are listed in alphanumeric order.
* OPTIONS	The **Options Section** provides pricing, service, and discount information for all hardware options, including Memory, System Expansion, Mass Storage, Terminals and Printers, Cables, Environmental Products/Cables, and TEMPEST. Part numbers are listed in alphanumeric order within each product category.
* SOFTWARE	The **Software Section** contains an extensive overview of software configuration and ordering information. Pricing information for operating system software includes VMS, ULTRIX, VAX System V, and PDP-11. In each section the software license is priced, and where appropriate, the associated media & documentation, and service pricing is provided. Pricing information for all layered product software can be found in the U.S. Software Price List.
* DIGITAL SERVICES CS	The **Customer Services Section** provides information to assist in the ordering of hardware and software maintenance services, network services, and environmental products. A services price list is included which provides service pricing for all packaged systems found in the Systems Section. A new section which includes Maintenance Services has been added.
* DIGITAL SERVICES APS/DCS	The **Digital Services APS/DCS Section** includes information about Professional Software Services, and Crossfunctional Software Services. Each section includes a preface offering detailed information about the specific service offering and a price list.
* DIGITAL SERVICES CT	The **Digital Services CT Section** includes information about Customer Education and Training. This section includes a preface and pricing information.
* INDEXES	There are three (3) **Indexes** to assist the user. The Software Index by UPI offers an easy alphanumeric look up by UPI number. The Software Index by Description helps those who only know the product by description. Both indexes include the SPD number. The Alphanumeric Index by Model Number, found on the grey pages in the back of the book, provides an alphanumeric listing of all part numbers found in the book, the standard price (if applicable), and the page number.

To obtain a copy of the **U.S. Systems/Services Price List**, Digital employees should send a request via ALL-IN-1 to Jane McNutt @ACO, or via VAXmail to USEM::McNutt. Please include your name, badge number and job code. Non-Digital users may obtain a copy by returning the reply card.

QUICK PHONE INDEX

ORGANIZATION	TELEPHONE	DESCRIPTION
CORPORATE CUSTOMER RELATIONS	800-DEC-INFO (800-332-4636)	Chartered to handle customer inquiries, sales/service contact information, and critical issues. 8:15 A.M. - 5:00 P.M., ET, Mon-Fri
COOPERATIVE MARKETING PROGRAM	508-467-5974	Provides joint planning for sales, marketing, and product development between Digital and market leading application and service providers.
LEASING AND REMARKETING HOTLINE	800-343-3451 800-322-3239 (MA)	Provides information on a variety of financing alternatives for U.S. customers. 8:00 A.M. - 5:00 P.M., ET, Mon-Fri
CARRY-IN SERVICenter	800-225-5385	Provides contract or per call carry-in service, and over the counter swap service for selected parts. 8:15 A.M. - 5:00 P.M., ET, Mon-Fri in most locations.
CUSTOMER RETURN CENTER	800-225-5385	Mail in parts replacement service for over 2,000 repairable parts; 24 hour emergency service available for qualified customers. 8:15 A.M. - 5:00 P.M., ET, Mon-Fri
CUSTOMER SERVICES	800-DEC-SERV (800-332-7378)	U.S. Customer Relations Hotline 8:00 A.M. - 5:00 P.M., ET, Mon-Fri
	800-525-6570	Colorado Customer Support Center for hardware support. 24 hours, 7 days/week
	800-525-7100	Colorado Customer Support Center for SPS products only. 24 hours, 7 days/week
	800-332-8000	Atlanta Customer Support Center for hardware/software support. 24 hours, 7 days/week
DECUS	508-841-3389	Digital Equipment Computer Users Society.
DECdirect	800-DIGITAL (800-344-4825)	Digital's telephone ordering and information service. 8:30 A.M. - 8:00 P.M., ET, Mon-Fri
DIGITAL BOOKSTORE	617-276-4376 408-748-4335	Bedford, Massachusetts Santa Clara, California
DIGITAL PRESS	800-344-4825	Internal publisher of books and journals for computer professionals. 8:30 A.M. - 8:00 P.M., ET, Mon-Fri
DIGITAL REFERENCE SERVICE (DRS)	508-467-4566	Customer support inquiries for DRS customers. 8:00 A.M. - 5:00 P.M., ET, Mon-Fri
DIRECTORY ASSISTANCE	508-493-5111	General Digital phone directory.
EDUCATION AND TRAINING CENTER	800-332-5656 617-276-1500*	Supports Digital's hardware, software, and networking products. Offers pre-sales information and consulting services; provides trouble shooting assistance 8:15 A.M. - 6:00 P.M., ET, Mon-Fri
	*Support for Digital Sales Personnel - need area region information.	
ELECTRONIC STORE	800-234-1998 By modem (1200/2400 baud)	Digital's on-line product information, quoting, and ordering service. 7:00 A.M. - midnight, ET, 7 days/week
EIC SALES SUPPORT CENTER	800-832-6277 603-884-8990	Supports current and prospective EIS/CSS customers with configuration, pricing, and application help.
PART NUMBER ASSISTANCE	603-884-5000	Provides general part number assistance, as well as, service for unlisted parts. 8:30 A.M. - 5:00 P.M., ET, Mon-Fri
TECHNICAL CONSULTING CENTER (TCC)	800-343-4040	Provides pre-purchase technical assistance. 8:30 A.M. - 6:00 P.M., ET, Mon-Fri

THE U.S. SYSTEMS PRICE LIST

DISCOUNT INFORMATION

DBA STRUCTURE:

The Digital Business Agreement (DBA) is based on two discount categories. The *A* category (0 - 21%) is the foundation of this discount agreement. The **B** category (0 - 21%) is a modification of the **A** category, which increases discounts for customers purchasing between $.5M and $2.5M on certain products. Also offered under the agreement are Product and Order Discounts which are incremental to the **A** and **B** categories. Product discounts are 0%, 5%, 10%, 15% and 35%. The Order discount is 5% and is only offered to Resellers for a specified set of products.

DBA VOLUME DISCOUNT SCHEDULE

DISCOUNT LEVEL	AGGREGATE DOLLAR VALUE (IN THOUSANDS)	CATEGORY A DISCOUNT PERCENTAGE	CATEGORY B DISCOUNT PERCENTAGE
A	0 - 499	0 %	0 %
B	500 - 999	5 %	12 %
C	1,000 - 1,499	7 %	12 %
D	1,500 - 2,499	9 %	12 %
E	2,500 - 3,999	12 %	12 %
F	4,000 - 5,999	14 %	14 %
G	6,000 - 9,999	16 %	16 %
H	10,000 - 14,999	17 %	17 %
I	15,000 - 24,999	18 %	18 %

N	150,000 - 199,999	20.5 %	20.5 %
P	200,000 - PLUS	21 %	21 %

DISCOUNT INFORMATION

AGGREGATION

DBA discount levels are set based on a minimum amount of Hardware and Software products purchased annually from Digital. The base discount for an OEM purchasing under a VAR Attachment will be flat and will not increment with increased Hardware and Software volumes purchased under terms of the Attachment. The following aggregation rules also apply:

A. Custom Products listed in this price list, which are produced by Digital's Computer Special Systems Group, are included in the Aggregate Dollar value of the DBA.

B. Warranty Services and System Start-up Packages are included in the Aggregate Dollar value of the DBA.

C. Digital Services, such as Customer Service, Customer Training, Professional Software Services and all other types of services, are not included in the Aggregate Dollar value of the DBA.

D. Dual Aggregation - In addition to the Hardware and Software products that customers purchase directly from Digital that aggregate towards their DBA contract performance, the following aggregation rules apply:

For End User customers, "Dual Aggregation" provides DBA aggregation credit for new systems, upgrades and options purchased from Digital Resellers.

For OEM/VAR customers, "Dual Aggregation" provides DBA aggregation credit for the Digital system configurations, CPU upgrades and options purchased by an End User directly from Digital, as part of a total solution sale.

Other applicable Dual Aggregation business rules are summarized below:

a. Only new equipment qualifies. Used equipment is specifically excluded.

b. Aggregation credit is calculated at Country List Price (CLP).

c. Only the Digital portion of the sale counts for aggregation credit. The added value of the OEM/VAR does not count.

d. Discount levels for NEW DBA customers will be set based solely on forecasted direct purchases from Digital. Forecasts of planned Dual Aggregation credits will not be considered.

e. Discount levels for RENEWING DBA customers will be set based on the sum of the actual direct Digital purchases and approved Dual Aggregation credit during the DBA performance period.

f. Claims must be made by the End User or OEM/VAR at least 30 days prior to the DBA expiration, with the help of his Digital Account Manager, using the DBA Aggregation Claim Form.

The following table may be used for determining DBA aggregation credit for new Systems. The table was created for ease of use by both End User and OEM customers applying for "Dual Aggregation" credit. A customer has the option to request the actual Digital system value to be credited. Requests of greater than $1.0 million will require validation of shipment and installation in the country of purchase.

To obtain the Digital System Value for other systems and CPU upgrade products not stated in this table, please call 1-800-DIGITAL (1-800-344-4825) and ask for the Aggregation Certification Desk.

RESELLER DISCOUNT SCHEDULES

A. ORIGINAL EQUIPMENT MANUFACTURER (OEM)

OEM Discounts include the DBA Volume Discount and relevant Product and Order discounts as depicted on Table 3. The total discounts shown for each level represent the sum of the DBA Volume discount, Product discount and Order discount, if applicable.

Discounts for OEM begin at Level B ($500K of purchases per annum).

OEMs who purchase under a Value Added Reseller (VAR) attachment will receive a flat discount regardless of the annual volume purchased.

B. COMPLIMENTARY EQUIPMENT MANUFACTURER (CEM)

The CEM will receive the OEM Volume discounts and Product discount. In addition, an incremental 5% CEM Credit is offered for all products. The total discounts shown on Table 4 represent the sum of the DBA Volume discount, Product discount and 5% incremental CEM credit. CEMs not eligible for Order discount or Earned Credit.

C. VALUE ADDED RESELLER (VAR)

The VAR will receive a flat 15% discount plus Product discount and Order discount, if applicable as shown on Table 5. OEMs purchasing under the VAR Attachment will receive the flat 15% discount regardless of the annual volume purchased. VARs are not eligible for Earned Credit.

To receive a VAR discount, the VAR must meet an annual total Net Order Value minimum of $350,000 dollars.

D. VALUE ADDED WHOLESALER (VAW)

The VAW will receive a flat 45% discount, as shown on Table 6, for product set VAX 4000 series and below. VAX 6000 series and above products are discounted by exception only. VAWs are not eligible for Product and Order discounts. VAWs are also not eligible for Earned Credit.

To receive a VAW discount, the VAW must meet an annual dollar minimum of $5,000,000 dollars.

E. MASTER RESELLER

Master Resellers will receive a flat discount of 15% plus Product Discount and Order Discount (if applicable) plus an Incremental Discount. Master Resellers choosing to tier product only will receive an Incremental Discount of 6%. Master Resellers choosing to tier and inventory product will receive an Incremental Discount of 10%. Product Discounts and Order Discounts will be in accordance with those outlined in Table 3 for OEMs. Products discount coded 7 will receive a flat 45% discount only. No Product or Order Discounts will apply to products discount coded 7.

F. SYSTEMS INTEGRATION RESELLER (SIR)

The SIR will receive a flat 12% discount plus Product and order discount. SIRs are not eligible for Earned Credit.

To receive an SIR discount, the SIR must meet an annual total Net Order Value of $1,000,000 dollars.

The DBA Volume Discount Schedule is not applicable to SI Resellers.

G. DEMONSTRATION/DEVELOPMENT SYSTEM DISCOUNTS

Resellers may obtain special discounts for systems purchased for demonstration and development purposes. The conditions under which these systems may be purchased are contained in Digital's Demonstration/Development System Policy.

Discounts available for Demostration/Development are shown on the Reseller Tables.

H. FLOORPLANNING PROGRAM

Floorplanning arrangements are available to VARs and OEMs. Customers utilizing floorplanning will receive a 1.5% reduction to their normal discount. Product and Order discounts are applicable.

I. RESELLER PRODUCT SET

All Resellers - OEMs, CEMs, VARs, Master Resellers, VAWs and SIRs - are authorized to purchase and resell Digital's full range of systems solely in accordance with their Business Plan.

"FILL-THE-PORTS" PROGRAM

TERMINAL PRODUCTS

The "FILL-THE-PORTS" program has been enhanced to simplify ordering by eliminating order channel constraints and reducing the current 3 tier pricing structure to 2 tiers. In addition, CSS Line Printers have been added to the menu.

The enhanced program allows customers to save money by ordering printers and terminals with a system, system upgrade, or in specified minimum quantites. The second tier offers fast turnaround through any of Digital's convenient ordering channels for simple option orders (w/o systems or minimum quantity).

The intention of the the "FILL-THE-PORTS" program is that the quantity of terminals or printers ordered should not exceed the capabilities of the system to be installed or to be upgraded (including local and remote connections).

1. ORDERING

   Terminals and Printers ordered and shipped with a system, system upgrade, or in the specified minimum quantity require the prefix "DL" before the Model Number. Refer to Options section of the U.S. Systems Price List for pricing information.

   Digital customers are not required to have a discount agreement in order to purchase Products under this Program.

2. DISCOUNTS

   For customers with DBA's, the following discounts apply: End-user—Category "B" plus 5% Product Discount, Resellers & Distributors—Category "B" plus 15% Product Discount, VARs - Flat 15% plus 15% Product Discount.

3. AGGREGATION

   Dollars will add to the aggregate value of the DBA.

4. WARRANTY

   Terminals, LA, LJ, & LN Printers are normally quoted with "STANDARD Warranty Support" (Basic Hardware Support/No Installation). Also available is "Basic Warranty Support" (Off-site Support), except for LN printers.

DEFINITIONS

SYSTEM — A System may be a PDP-11, a VAX or RISC processor contained in a cabinet or on a board. For printer orders, VAXstation, DECstation, or PC's (Workstations) further qualify as a system.

SYSTEM UPGRADE — A system upgrade MUST include a CPU upgrade.

Refer to "Systems Growth Planning Guide" from DMO in the Glossary section for definitions of CPU upgrades.

NOTE

Terminal servers are no longer considered a system under this program. Customers wishing to purchase terminals with Terminal Servers should refer to Networks and Communications for available packages.

Desktop printers (LA, LJ and LN) have been removed from the "Fill-the-Ports Program. A Quantity Discount Break (QDB) is available when ordering at the "list" price rather than "Standard" price.

2. WARRANTY INFORMATION

This section contains the following information:

- System Support Warranty
- Hardware Options and Software License Warranty
- Warranty Support Descriptions
- Glossary of Warranty Terms
- Warranty Coverage Upgrades and Extended Hour Uplifts
- General Warranty Information
- TEMPEST Warranty
- Asterisked Options

WARRANTY INFORMATION

WARRANTY TERMS AND CONDITIONS

The following Warranty Terms and Conditions are incorporated by Reference into Paragraph A of Digital Equipment Corporations Standard U.S. Terms and Conditions (Standard Terms). In the event of a conflict between the Standard Terms and these warranty Terms and Conditions, the latter shall govern.

WARRANTY

Effective January 2, 1990, Digital has simplified its warranty offerings to include Standard Warranty and List Price. Standard Warranty is the recommended offering, including hardware and software support across all VAX and RISC processors. List Price is available for those customers with special business needs. The complete Customer Services Product Portfolio is available for customers who require a service solution not met by either Standard Warranty or List Price. Refer to the Services Section for more information. Complete warranty descriptions for each warranty code may be found on the following pages.

WARRANTY SUPPORT DESCRIPTIONS

Warranty J - PRODUCT FOUNDATION WARRANTY

A. Hardware Foundation Warranty

— A limited warranty consisting of one year return to a Digital Customer Return Center (CRC) with free repair or replacement of the system/option field replaceable units (FRU). Each system/option has a defined set of FRU's. The list is available from Digital upon request.

To utilize this service call 800-225-5385 from 8:15 AM EST to 7:00 PM EST.

Availability:
Foundation warranty is available throughout the United States to Owners, End Users, Lessees, and Digital Authorized Resellers of Digital equipment. Proof of purchase or ownership of equipment, including serial numbers, may be required.

Commencement:
In all cases for end user purchases of Digital-installable and customer-installable equipment, LIST Warranty Support commences upon shipment from Digital.

In all cases for Digital Authorized Reseller purchases of Digital-installable and customer-installable equipment, LIST Warranty Support commences: at the Shelf-life expiration or Pre-warranty Maintenance Service Agreement expiration (if purchased); or upon shipment to end user, whichever occurs first. Standard reseller shelf life of 90 days to Authorized Resellers and 180 days to Authorized Distributors is honored.

All repairs/replacements are warranted against defects in workmanship and material until the completion of the original equipment one year warranty.

Response Time:
Digital will use best efforts to, at its option, repair or replace eligible FRU's within 15 working days of their receipt and acceptance at Digital's receiving dock. Shipment to customer will be F.O.B. Digital shipping point.

Eligible Parts:
Field replaceable units (FRU's) as defined by Digital are the only parts eligible for coverage. FRU's in need of repair due to improper treatment or use are not eligible for return. Improper treatment includes, but is not limited to; lifted or burnt etches, or delamination due to non-Digital repair or modification. FRU's which have been defaced by removing serial numbers, etch levels, or key components are not eligible for return.

If FRU's are returned which are subsequently deemed ineligible, Digital may demand return of any replacement FRU's or charge customer for full List Price value of the replacement FRU's and will return the ineligible FRU's to the customer upon receipt of payment or the replacement FRU's.

FRU's will be at the current revision level and may be refurbished. In the event newly installed Field Engineering Change Orders (FCO's) cause an incompatibility or other interference within the customer's system, the Customer accepts responsibility for such incompatibility or interference.

- **Purchaser Responsibilities:**
- Installation of the equipment is the sole responsibility of the Customer.
- Fault diagnosis and equipment disassembly is the sole responsibility of the Customer.
- The Customer shall properly package and prepay transportation cost of FRU's sent to Digital.
- The Customer assumes all risk of loss or damage to FRU's in transit to Digital.

WARRANTY SUPPORT DESCRIPTIONS (cont'd)

List Warranty Support for DECstation 212LP/316+/316SX/325C/333C,DECpc 320SX,333

A customer may continue to use the existing LIST price process for FRU level returns or, for customers who do not fault-diagnose to the FRU level, the customer may call the CRC using the 800-number provided for customer returns. Digital will provide the necessary Return Authorization Number and direct the customer to package and SEND THE ENTIRE FAILED UNIT TO DIGITAL. Digital will repair the failed PC and ship the unit back to the customer within two days of receipt.

This represents enhanced support for all customers who purchase Digital personal computers at LIST. This enhancement simplifies the returns process for customers who do not fault-diagnose their Digital personal computer.

B. Software Foundation Warranty

— Digital Developed Software products are warranted to conform to the applicable Software Product Description (SPD). This means that Digital will remedy any nonconformance when it is reported to Digital by the Customer during the warranty period.

— The warranty period for Digital Developed Software products is 1 year. It begins when the software is installed or thirty (30) days after delivery to the End-User, whichever occurs first and expires three hundred sixty five (365) days later. All warranty related support for the software will end one (1) year after the release of the subsequent version.

— Warranty is provided only in the United States. Digital will provide a service location which will accept reporting (in a format prescribed by Digital) of a non-conformance problem caused when using the licensed software under normal conditions as defined by the SPD. Digital will remedy a nonconformance problem in the current unaltered release of the licensed software by issuing correction information such as correction documentation, corrected code or notice of availability of corrected code, or a restriction or a bypass. The customer will be responsible for the preparation and submission of the problem report to the service location.

— Warranty or third party Software products sold by Digital is as designated in the Software Product Description (SPD). The term of the warranty, and the manner in which Digital will remedy any nonconformance is specified in the Software Product Description (SPD) or the price list. All other software is provided "as is". Digital does not warranty that the execution of Software shall be uninterrupted or error free. Digital does not warranty the form or content of Distributed Software or Documentation, both of which Digital provides "as is". Certain Distributed Software is warranted by the third party.

Warranty U - PRODUCT FOUNDATION WARRANTY FOR VT330/340 Plus/420

A. Hardware Foundation Warranty

— A limited warranty consisting of three year return to a Digital Customer Return Center (CRC) with free repair or replacement of the system/option field replaceable units (FRU). Each system/option has a defined set of FRU's. The list is available from Digital upon request.

To utilize this service call 800-225-5385 from 8:15 AM EST to 7:00 PM EST.

Availability:

Foundation warranty is available throughout the United States to owners, End Users, Lessees, and Digital Authorized Resellers of Digital equipment. Proof of purchase or ownership of equipment, including serial numbers, may be required.

Commencement:

In all cases for end user purchases of Digital-installable equipment, LIST Warranty Support commences upon shipment from Digital.
In all cases for Digital Authorized Reseller purchases of Digital- installable and customer-installable equipment, LIST Warranty Support commences: at the Shelf-life expiration or Pre-warranty Maintenance Service Agreement expiration (if purchased); or upon shipment to end user, whichever occurs first. Standard reseller shelf life of 90 days to Authorized Resellers and 180 days to Authorized Distributors is honored.
All repairs/replacements are warranted against defects in workmanship and material until the completion of the original equipment three year warranty.

Response Time:

Digital will use best efforts to, at its option, repair or replace eligible FRU's within 15 working days of their receipt and acceptance at Digital's receiving dock. Shipment to customer will be F.O.B. Digital shipping point.

WARRANTY SUPPORT DESCRIPTIONS (cont'd)

Eligible Parts:

Field replaceable units (FRU's) as defined by Digital are the only parts eligible for coverage. FRU's in need of repair due to improper treatment or use are not eligible for return. Improper treatment includes, but is not limited to: lifted or burnt etches, or delamination due to non-Digital repair or modification. FRU's which have been defaced by removing serial numbers, etch levels, or key components are not eligible for return.

If FRU's are returned, which are subsequently deemed ineligible, Digital may demand return of any replacement FRU's or charge customer for full List Price value of the replacement FRU's and will return the ineligible FRU's. FRU's will be at the current revision level and may be refurbished. In the event newly installed Field Engineering Change Orders (FCO's) cause an incompatibility or other interference within the customer's system, the Customer accepts responsibility for such incompatibility or interference.

Purchaser Responsibilities:

- Installation of the equipment is the sole responsibility of the Customer.
- Fault diagnosis and equipment disassembly is the sole responsibility of the Customer.
- The Customer shall properly package and prepay transportation costs of FRU's sent to Digital.
- The Customer assumes all risk of loss or damage to FRU's in transit to Digital.

B. List Warranty Support for VT330/340 Plus/420

A customer may continue to use the existing LIST price process for FRU level returns or, for customers who do not fault-diagnose to the FRU level, the customer may call the CRC using the 800-number provided for customer returns. Digital will provide the necessary Return Authorization Number and direct the customer to package and send the entire failed unit to Digital. Digital will repair the failed unit and ship the unit back to the customer within two days of receipt.

This represents enhanced support for all customers who purchase Digital VT330/340 Plus/420 terminals at LIST. This enhancement simplifies the returns process for customers who do not fault-diagnose their Digital terminals.

Warranty K - HARDWARE OPTION SUPPORT WARRANTY

— The Warranty level is the same as the system to which the hardware option is directly attached.

— If the system warranty or system maintenance agreement (contract) expires during the one year hardware option warranty and the system is not placed under maintenance agreement (contract), remaining hardware option warranty will be provided at the previous system warranty or maintenance agreement (contract) level. If the system warranty or system maintenance agreement (contract) expires prior to installation of the hardware option, hardware option warranty will be provided at the Basic Hardware Support level.

— Installation is included if directly attached to the system being installed and installation occurs at the time of system installation

— Installation is extra if not directly attached to the system being installed and/or not installed at time of system installation.

Warranty L - LAYERED PRODUCT SUPPORT WARRANTY

— Layered Product Support Warranty is available for layered product licenses purchased either at time of initial system sale or separately as add-ons for existing systems.

— Layered Product Support Warranty provides the right-to-use new versions of layered product software.

— When a layered product purchased with Layered Product Support Warranty is installed on a system eligible for telephone assistance and advisory support, such as provided under DECsystem Support Service, Basic System Support, Software Support Service and Warranty A, C, E, F, Q, the level of support provided on the system will be extended to include coverage of the layered product.

If the warranty or maintenance agreement (contract) for that system expires during the warranty term of the layered product and the system is not placed under a DECsystem Support Service, Basic System Support or Software Support Service agreement, telephone assistance and advisory support for the layered product will no longer be provided.

— Layered Product Support Warranty includes one (1) year conformance to the Software Product Description (SPD).

— Layered Product Support Warranty does not include the distribution of software media and documentation updates and software installation.

— Third party vendor supported or customer supported third party software products sold by Digital may not be eligible for Layered Product Support Warranty. To obtain support for non-warranted Digital supported third party software, customer should purchase a Software Product Service agreement. Consult the price list for warranty and service eligibility.

GLOSSARY OF WARRANTY TERMS

Listed below are definitions of terms or phrases found in the Warranty support descriptions.

One (1) year hardware DECservice, increments up to 24 hours/day, 7 days/week, including holidays, committed response time:

Hardware Support provides on-site hardware service. Hardware maintenance will be performed continuously until the problem is resolved. Digital will automatically activate an accelerated back-up plan to involve the necessary technical resources should some extraordinary problem cause repairs to exceed pre-determined time limits.

Critical Response Time: Digital will respond to a call for hardware as follows:

Road Miles from Designated Digital Office	VAX 9xxx VAXft 3000, VAX 6xxx,85xx,87xx,88xx,89xx Response Time	All Other
0-50	2 hours	4 hours
51-100	4 hours	4 hours
101-200	8 hours	8 hours
201 and beyond	16 hours	16 hours

One (1) year hardware Basic Service, 8 AM to 5 PM, Monday through Friday except locally observed Digital holidays, priority response time:

Hardware support provides on-site hardware service. Hardware maintenance will be performed during the standard hours of coverage. Digital will automatically activate an accelerated back-up plan to involve the necessary technical resources should some extraordinary problem cause repairs to exceed pre-determined time limits.

Critical Response Time: Digital will respond to a call for hardware support on a priority basis, usually next-day response.

TELEPHONE ASSISTANCE:

Telephone assistance from Digital is provided to assist authorized Purchaser employees in the use of their Digital hardware, kernel software and layered products purchased with Warranties A, C, E, F, Q. A toll-free telephone number and Customer Support Center (CSC) access number will be provided. Three (3) Purchaser employees will be authorized to call the Customer Support Center (CSC) for telephone assistance. The CPU type and serial number are needed to properly register the customer for telephone assistance.

CRITICAL ON-SITE SOFTWARE SUPPORT:

On-site support will be provided to assist in the resolution of problems in the software product which cannot be resolved remotely, and which Digital determines to be critical.

ADVANCED ELECTRONIC SUPPORT:

The purchaser will receive DSNlink software for two-way electronic mail and file transfer between the CSC and customer site, proactive flash messages for time-critical technical information, VAXsimPLUS and SPEAR predictive maintenance tools and on-line access to technical databases. Now available for VMS, future availability for Ultrix is planned. In addition, the purchaser will receive toll-free access to the Digital Software Information Network (DSIN), an alternate method for accessing CSC technical databases and for submitting software problems. Dial-up access is via the TYMNET public data network.

KERNEL SOFTWARE (WARRANTY):

During the warranty term, Kernel Software includes the operating system, DECnet, VAXcluster software, Workstation software, and any other software products included with the hardware system model number.

RIGHT-TO-USE NEW VERSIONS OF SOFTWARE:

The Purchaser will be properly licensed for all new versions of the Digital-licensed software products which are covered by this Warranty and become available during the Warranty term.

GLOSSARY OF WARRANTY TERMS (cont'd)

INSTALLATION:

Software installation is included in the standard warranty for processors listed in the High Performance tier (Warranty A) and for HSC's in the Warranty C tier.

As part of the Installation Service for Software Digital will:

- Review the software installation procedure will a representative of the Customer.
- Verify that all documentation and media are present.
- Prepare a backup copy of the installation media where applicable as stated in the Product Installation Guide.
- Install the software, and performs a system generation where applicalbe.
- Update the software to the latest revision level and ensure that each peripheral device is working.
- Set up a user account and a user directory if applicable.
- Create a backup copy of the software installed.
- Provide listings of system generation dialog when a hardcopy terminal is available.

SUPPORT IMPLEMENTATION PLAN:

The Purchaser receives a tailored mix of services to meet their unique needs. VPCS/Performance Management Service provides ongoing analysis of system efficiency and progress reports, System Consulting Capability gives the purchaser on-site technical software consulting which can be tailored to meet their needs, and an Unlimited Training Subscription provides ongoing training via lecture/lab, seminar, and self-paced courses from Education Services for 20 designated staff members.

OPTIONS:

A hardware option is defined in terms of its attributes. An option has two warranty service offerings, Standard and List. Options are found in the options section of this U.S. Systems Price List. Excluded are devices identified in the System Support Warranty tiers of Terminals/PC, DECservers and Networks & Communications Devices. These devices have their own warranty and installation attributes. Terminals intended for use as the system console terminal will be installed as part of the system installation. Memory boards installed on systems at the time of system installation will also be installed at no extra charge.

LABOR AND MATERIALS:

Digital will provide labor and materials.

PARTS:

Replacement parts may be new or refurbished. Replaced parts become the property of Digital.

PREVENTIVE MAINTENANCE:

Scheduled preventive maintenance (if applicable) is provided during contracted hours of coverage in accordance with equipment standards specified by Digital.

FIELD CHANGE ORDERS:

During contracted hours of coverage, Digital will install all applicable Field Change Orders (FCOs) which in Digital's opinion are required to ensure proper machine operation. Not included with Off-Site support.

SERVICE REPRESENTATIVE:

A designated service representative (if applicable) is assigned to each account to monitor the equipment's performance and service history. Not included with Off-Site support.

SITE MANAGEMENT GUIDE:

A Site Management Guide (if applicable), containing schedules, procedures, and logs used for recording and evaluating all information pertinent to the operation and care of the equipment, is provided to Purchaser. Not included with Off-Site support.

REMOTE DIAGNOSIS:

Digital will provide remote diagnosis on applicable Digital systems which feature remote diagnosis capability, allowing for quick on-line problem isolation from a remote location. Not included with Off-Site support.

GLOSSARY OF WARRANTY TERMS (cont'd)

PROPRIETARY MAINTENANCE TOOLS:

Proprietary maintenance tools, such as VAXsim, will only be installed at the customer's site when the entire system or cluster is under Digital contract or warranty.

RV20 MEDIA LIMITED WARRANTY:

In addition to media warranty description on preceding pages, Digital will replace the optical platter if defective in manufacture or if recorded data becomes unreadable within thirty years of the media's manufacture so long as the data was recorded within five years of the media's manufacture. This warranty does not cover any data loss caused by physical abuse of the media, or storage under conditions which exceed the environmental limits for the media.

APPLICATION DEPLOYMENT SYSTEMS:

MicroVAX 3000-series general-purpose systems are offered with the Application Deployment License for VMS. The Application Deployment License offering is designed for value added resellers delivering "turn-key" style applications. For specific system configurations and software part numbers, contact your Volume Sales Representative.

The Application Deployment VMS license is different from our other licenses for VMS in these ways:

- Only available to OEMs who have a current DBA and qualify for Earned Credit for sublicense to U.S. end users.
- Application Deployment License for VMS is identified by the license type W. Upgrades from Application Deployment VMS to Multiuser VMS licenses are available and identified by the license type V.
- Application Deployment License for VMS is not relicensable.

More detailed information regarding the Application Deployment License for VMS may be found in the Software Preface Section of this Price List.

FACTORY LOADED SOFTWARE WARRANTY:

Software that is delivered on a system disk is not covered by warranty. It is provided as a convenience to the customer. The customer is solely responsible for completing the installation of the software. Digital encourages all customers to buy the VMS media and documentation kit which includes complete installation instructions.

No other change in Digital's current software warranty policy is implied by the pre-loading of the VMS distribution kit onto the system disk at the factory. Refer to the Software Product Descriptions of VMS and DECnet-VAX for further warranty information.

WARRANTY COVERAGE UPGRADES AND EXTENDED HOUR UPLIFTS

Warranty may be upgraded by increasing the level of coverage and may be uplifted by extending the hours of warranty coverage.
For customers with a DBA, Warranty upgrades and uplifts are discountable under the Volume Discount Schedule (at Category A for End-users, and Category B for Resellers). Product discounts do not apply. Warranty uplifts are included in the DBA Aggregate Dollar Value when ordered on a Hardware Order Form prior to hardware shipment.
Warranty Coverage Upgrades and Extended Hour Uplifts may be purchased after hardware shipment through Customer Service. However, DBA discounts do not apply, and the fee is not included in the DBA Aggregate Dollar Value. Applicable Field Service discounts will apply.
Warranty upgrades and uplifts must be billed/invoiced in total. Monthly payments are not available.
Warranty upgrades are calculated as follows:

1. Determine both the current and desired warranty support level and hours of coverage.

   NOTE: Upgrades are applicable to orders for systems, terminals, LA printers, HSC's, DECservers, LPS40 and LN03. Options do not require any upgrade since they receive the same level of support as the system.

2. Refer to the upgrade chart for upgrade availability and calculations. The column on the left is the current level of warranty support. Follow this across to the desired level of support and hours of coverage.
3. If a Warranty Coverage upgrade is desired, manually calculate it according to the calculations identified on the chart or quote Warranty Coverage upgrades using AQS.
4. If an Extended Hour Uplift is desired, manually calculate it according to the calculations identified on the chart or quote Warranty Coverage upgrades using AQS.

   NOTE: The Extended Hour Uplift is ONLY applicable to products which are purchased at, or uplifted to, DECsystem OR DECservice warranty support coverage. The DSMC is always used for calculating Extended Hour Uplifts even if the product has DECsystem warranty.

5. If both Warranty Coverage Upgrade and Extended Hour Uplifts are being quoted, add 3. and 4. above to determine total Uplift Charge.

WARRANTY COVERAGE UPGRADES AND EXTENDED HOUR UPLIFTS (cont'd)

The availability and calculations for Warranty Coverage Upgrades and Extended Hour Uplifts are identified in the chart below:

	WARRANTY COVERAGE UPGRADE		EXTENDED HOURS UPLIFT
UPGRADE FROM	**UPGRADE TO DS9**	**UPGRADE TO DSMC**	**EXTENDED HOURS TO 12, 16 or 24 hours, 5, 6, or 7 days a week**
WARRANTY A (High Perform. Systems)	N/A	N/A	N/A
WARRANTY C (DECSystem Support 24/7)	N/A	N/A	N/A
WARRANTY E (Basic System Support)	(DS9 - BSS) X 12	N/A	Available
WARRANTY F (Basic System Support/No Install)	(DS9 - BSS) X 12	N/A	Available
WARRANTY G (Basic Hardware Support)	N/A	(DSMC - BMC) X 12	Available
WARRANTY H (Basic Hardware Support/No Install)	N/A	(DSMC - BMC) X 12	Available
WARRANTY Q	N/A	N/A	Available
WARRANTY N	N/A	N/A	Available

*** EXTENDED HOUR UPLIFT CALCULATION:**

Always use the DSMC (DECservice Hardware Monthly Charge) for calculating Extended Hour uplifts, even if the warranty support coverage that is being uplifted is DECsystem Warranty. Calculations are defined in the chart below:

*EXTENDED HOUR UPLIFT CALCULATION:

Always use the DSMC (DECservice Hardware Monthly Charge) for calculating Extended Hour uplifts, even if the warranty support coverage that is being uplifted is DECsystem Warranty. Calculations are defined in the chart below:

Hours of Coverage	Monday thru Friday	PLUS	For Coverage on either Sat or Sun	OR	For Coverage on both Sat and Sun
09 Hours	N/A		.08 X DSMC.		.16 X DSMC
12 Hours	.04 X DSMC		.10 X DSMC		.19 X DSMC
16 Hours	.08 X DSMC		.11 X DSMC		.22 X DSMC
24 Hours	.16 X DSMC		.14 X DSMC		.27 X DSMC

QUOTING

The following Model Numbers will be generated when quoting upgrades and are automatically calculated by AQS:

- FM-DECUP-12 - Warranty Coverage Upgrade
- FM-DECEX-12 - Extended Hour Uplifts
- FM-DSSUP-12 - Warranty Upgrade to DECsystem

GENERAL WARRANTY INFORMATION

THE FOLLOWING APPLIES TO ALL WARRANTY SUPPORT

ELIGIBILITY

Equipment is eligible for warranty provided it is in good operating condition and Digital's serviceability requirements and site environmental conditions are met. Warranty may not be honored if any of the following occurs:

1. System is transferred outside the fifty (50) United States or District of Columbia.
2. System is not capable of running Digital diagnostics.
3. Digital-installable systems are installed/de-installed by unauthorized parties.

Additionally, warranty on software products may not be honored if any of the following occurs:

1. Changes or modifications have been made to Digital product software code.
2. The System does not meet the minimum configuration requirements specified in the applicable Software Product Description.
3. The software product is not Digital-developed. Consult the price list to determine coverage under warranty or service agreements.

To reinstate warranty for the above, any nonconformance must be rectified by the customer. Digital has the right to perform an inspection at its discretion. Any equipment repairs and/or adjustments Digital determines are necessary in order to rectify any nonconformance will be made at Digital's Per Call rates, terms and conditions then in effect. Warranty is then reinstated, retroactively to the original date of warranty commencement. The inspection is free if no repairs are required.

EXCLUSIONS

The following services are not included as part of the Warranty support:

1. Service outside of the contracted hours of coverage.
2. Services which in Digital's opinion are required due to improper treatment or use of the equipment or software.
3. Services required due to unauthorized attempts by other than Digital personnel to repair, maintain or modify the equipment or software.
4. Services required due to causes external to the Digital-maintained equipment or software.
5. Software product media and documentation updates.
6. Reconfiguration of equipment.
7. Individual software products which have been discontinued or reclassified as "Customer Supported." These products may be withdrawn from service upon one hundred eighty (180) days prior written notice, which notice shall not be issued prior to the end of the first year of service.
8. Individual hardware products that cannot, in Digital's opinion, be properly repaired due to excessive wear or deterioration. These products may be withdrawn from service upon ninety (90) days prior written notice, which notice shall not be issued prior to the end of the first year of service.
9. Digital does not warrant that software licensed to a customer shall be error free, that the software shall operate with any hardware and software other than as specified in this SPD, that the software shall satisfy customer's own specific requirements, or that copies of the software other than those provided or authorized by Digital shall conform to the SPD.

   Digital makes no warranties with respect to the fitness and operability of modifications not made by Digital.

   If the software fails to function for reasons stated above, the customer's warranty will be invalidated and all service calls will be billable at the prevailing per call rates.

COMPUTER SPECIAL SYSTEMS (CSS)

Products from COMPUTER SPECIAL SYSTEMS (CSS) and TRADITIONAL/PRODUCT LINE (TPL) receive one year of warranty support at a level commensurate with other like Digital equipment.

REPLACED PARTS WARRANTY

Parts replaced on equipment which is covered by warranty will receive the balance of the equipment warranty or 30 days,whichever is greater. For example, if the equipment is 300 days into the warranty period and a part is replaced, the part will receive 65 days of warranty (the same as the remaining equipment warranty).

WARRANTY INFORMATION

GENERAL WARRANTY INFORMATION (cont'd)

WARRANTY COMMENCEMENT

Warranty Commencement depends on two factors: 1) how the equipment is purchased; and 2) the equipment's installability criteria. For integrated warranty, hardware and software warranty is coterminous. Hardware warranty commencement is defined as follows:

END USER

END USER PURCHASE OF DIGITAL-INSTALLABLE EQUIPMENT - When equipment is purchased by an end user from Digital and it is considered Digital-installable (or customer-installable equipment and hardware installation was purchased), warranty begins 30 days after the equipment is shipped or upon completion of equipment installation, whichever occurs first.

END USER PURCHASE OF CUSTOMER-INSTALLABLE EQUIPMENT - When equipment is purchased by an end user from Digital and it is considered customer-installable (and hardware installation is not performed by Digital), warranty begins at time of shipment from Digital. Hardware installation on this equipment may be performed by Digital if the customer purchases Digital installation. When Digital installation is performed, warranty commences upon completion of equipment installation or 30 days after the equipment is shipped, whichever occurs first.

AUTHORIZED RESELLER

DIGITAL AUTHORIZED RESELLER PURCHASE OF DIGITAL-INSTALLABLE EQUIPMENT - When equipment is purchased by a Digital Authorized Reseller and it is considered Digital-installable (or customer-installable equipment and hardware installation was purchased), warranty begins: at Shelf-life expiration or Pre-Warranty Maintenance Agreement expiration (if purchased); upon completion of equipment installation, or 30 days after shipment to end user, whichever occurs first.

DIGITAL AUTHORIZED RESELLER PURCHASE OF CUSTOMER-INSTALLABLE EQUIPMENT - When equipment is purchased by a Digital Authorized Reseller and it is considered customer-installable (and hardware installation is not purchased), warranty* begins at Shelf-life expiration or Pre-warranty Maintenance Service Agreement expiration (if purchased) or at shipment from Authorized Reseller, whichever occurs first. Hardware installation on this equipment may be performed by Digital if the customer purchases Digital installation or the customer-installable equipment** is installed at the same time and same site as a Digital-installable system. When Digital installation is performed, warranty* commences: at Shelf-life expiration or Pre-warranty Maintenance Service Agreement expiration (if purchased); upon completion of equipment installation; or 30 days after shipment to end user, whichever occurs first.

***NOTE 1:** Warranty as described above refers to STANDARD Warranty Support. In all cases for end user purchases of Digital-installable and customer- installable equipment, LIST Warranty Support commences upon shipment from Digital. In all cases for Digital Authorized Reseller purchases of Digital-installable and customer- installable equipment, LIST Warranty Support commences: at Shelf-life expiration or Pre-warranty Maintenance Service Agreement expiration (if purchased); or upon shipment to end user, whichever occurs first.

****NOTE 2:** Customer-installable equipment eligible for no-charge installation as part of a system installation. Installation of customer-installable equipment at no additional charge is limited to the installation of hardware options purchased for that system that are directly attached to the system and that are installed at the same time and on the same site as the system. Hardware options are found in the Options section of the U.S. Systems Price List. Excluded from no-charge installation are all devices identified in the TERMINALS Product Tier of the System Support Warranty (LA/LJ Printers, Video Terminals, LN03 Laser Printers) and Networks and Communications products. However, any terminal intended for use as the System Console Terminal will be installed as part of the system installation at no additional charge.

A "site" is defined as a building or adjacent buildings as determined by Digital. "Same time" is defined as a single installation event during which a customer's entire order is installed.

WARRANTY SUPPORT TRANSFER POLICY

Warranty Support is a product attribute and stays with the product if the product is re-sold within the fifty (50) United States or District of Columbia.

When equipment is resold during the warranty period, remaining warranty support may be transferred to a new owner within the fifty (50) United States or District of Columbia. The original owner must contact Digital to arrange for the warranty support transfer. A warranty support transfer form must be signed by both the original owner and the transferee.

All De-installation/Re-installation guidelines must be met.

GENERAL WARRANTY INFORMATION (cont'd)

EXTENDED WARRANTY SUPPORT

Extended Warranty Support allows a customer to lengthen the warranty period for an additional 12 or 24 months. Extensions to the first year warranty must be at the same level of service as the first year.

In the case of printers, the multi-year warranty will apply with the same time and page limitations multiplied by the number of years of extended warranty support purchased (i.e., an LN05 gets a Standard Warranty of 1 year or 120K pages, and extended warranty through year 2 would be 2 years or 240K pages).

The Extended Warranty Support fee is quoted by AQS.

For customers with a DBA, the Extended Warranty Support fee is discountable under the Volume Discount Schedule (at Category A for end users, and Category B for Resellers). Extended Warranty Support is included in the DBA Aggregate Dollar Value.

EXTENDED WARRANTY EXCLUSIONS

In the event that the customer purchases Extended Warranty, the following restrictions apply:

1. Software products which are discontinued or reclassified by Digital as customer-supported may be withdrawn from coverage upon ninety (90) day prior written notice.
2. Service for any version of the software products covered under this warranty will end one hundred eighty (180) days after the release of subsequent version unless otherwise agreed. The System must be properly maintained at the latest Digital revision level and must contain at least the minimum hardware and prerequisite software specified in the most current Software Product Description (SPD).
3. Digital will remedy any nonconformance of the software product to the most current Software Product Description (SPD) when it is reported to Digital by the authorized customer contact during the Extended Warranty period, by issuing correction information such as: corrected documentation, corrected code, or notice of availability of corrected code, or a restriction or a bypass.

RESELLER WARRANTY SUPPORT OPTIONS

WARRANTY SUPPORT SHELF-LIFE

All Digital Resellers are granted or may obtain warranty Support Shelf-Life at no charge. Digital Resellers include Primary-Tier Digital Authorized Resellers (value added resellers - OEMs, CEMs, VARs, SIs - and distributors - ADs and VAWs) who purchase directly from Digital and Secondary-Tier Digital Affiliated Resellers (DAOs, WAVARs, DARs, AVARs and TVARs) who purchase indirectly from Digital through a Primary-Tier Digital Authorized Reseller. Warranty Support Shelf-Life is granted to, or obtained by the Reseller as follows:

PRIMARY-TIER DIGITAL AUTHORIZED RESELLERS:

Authorized Distributors (ADs) and Value Added Wholesalers (VAWs) are granted from Digital, one-hundred-eighty (180) days of Warranty Support Shelf-Life at no charge. All other Primary-Tier Digital Authorized Resellers are granted ninety (90) days of Warranty Support Shelf-Life at no charge.

Primary-Tier Resellers may pass on the unexpired portion of the Warranty Support Shelf-Life for use by their Secondary-Tier Digital Affiliated Reseller customer. To pass on Warranty Support Shelf-Life, the Primary-Tier Reseller must provide, with shipment to their Digital Affiliated Reseller customer, the Digital DECnumber and original ship date from Digital for each item resold.

GENERAL WARRANTY INFORMATION (cont'd)

SECONDARY-TIER DIGITAL AFFILIATED RESELLERS:

All Secondary-Tier Digital Affiliated Resellers may obtain, at no charge and for their use only, the unexpired portion of Warranty Support Shelf-Life granted to the Primary-Tier Authorized Reseller. In the event that the unexpired portion of Warranty Support Shelf-Life is more than one (1) but less than thirty (30)days, Digital shall provide thirty (30) days of Warranty Support Shelf-Life for use by the Digital Affiliated Reseller.

To obtain Warranty Support Shelf-Life from Digital, the Digital Affiliated Reseller must maintain a record of the Warranty Support Shelf-Life history provided to them by their Primary-Tier Authorized Reseller and make this information available to Digital upon request and through Digital's Authorized Reseller Warranty Registration process.

The Digital Affiliated Reseller must provide, with shipment of product to their End-User, documentation containing the Digital DECnumber and original ship date from Digital to the Primary-Tier Digital Authorized Reseller for each item resold.

Warranty Support Shelf-Life is provided as a method by which Digital's Primary and Secondary-Tiered Resellers can stock Digital equipment, preserve the one-year warranty for use by the End-User and ensure the End-User receives FCO protection for the full warranty period. In addition, for systems covered by an integrated warranty, it also preserves the right to pass on the most current version of the Operating System software licensed for use with the system.

Warranty Support Shelf-Life is defined as the period between shipment from Digital and Warranty or Pre-Warranty Support Maintenance Service Agreement commencement.

Warranty Support Shelf-Life begins at ship date from Digital and continues for the specified period (longer if Shelf-Life Extensions are purchased).

Warranty Support Shelf-Life ends when the Digital shipping cartons have been opened (other than for inspection) or the specified Shelf-Life period ends, whichever occuurs first. The unopened shipping cartons may be either at the Reseller's site or at the End-User's site during the specified Warranty Support Shelf-Life period.

SHELF-LIFE EXTENSIONS

For all Primary-Tier Authorized Resellers granted ninety (90) days of Warranty Support Shelf-Life, Shelf-Life extensions are available in thirty (30) day increments. Shelf-Life extensions are ordered once annually and are then applicable to all inventoried equipment (specific product types or all products) purchased by the Authorized Reseller for the year. The maximum Shelf-Life period is one hundred eighty (180) days (90 days at no charge and 90 days fee based).

The fee for Shelf-Life extensions is .0025 times the mid-point of the DBA discount range for the agreed-to annual purchases of product types desired for each thirty (30) day period. The part number is FM-SHELF-01.

Authorized Distributors (ADs) and Value Added Wholesalers (VAWs) are not eligible to purchase Shelf-Life Extensions. They receive the maximum one hundred eighty (180) days of Shelf-Life at no charge.

Secondary-Tier Digital Affiliated Resellers are not eligible to purchase Shelf-Life Extensions. They are limited to the unexpired portion of the Shelf-Life remaining on equipment purchased from the Primary-Tier Authorized Reseller, or thirty (30) days, as described above.

GENERAL WARRANTY INFORMATION (cont'd)

PRE-WARRANTY SUPPORT MAINTENANCE SERVICE AGREEMENTS

All Digital Resellers (Digital Authorized Resellers and Digital Affiliated Resellers) may purchase service agreements in thirty (30) day increments to provide maintenance coverage prior to warranty commencement on equipment which they purchase for resale.

This Agreement permits the Digital Reseller to open the Digital packaging, stage the equipment, load software, etc., prior to shipment to the End-User. If service is required during the pre-warranty period, Digital provides the level of service purchased. The End-User retains the full installation and warranty coverage period applicable.

Pre-Warranty Support Maintenance Service Agreements are ordered through the local Digital Customer Services office. Pre-Warranty Support Maintenance Service Agreements may be purchased at whichever level of service is available for that specific product type (i.e., DECsystem Support, DECservice, Basic). Pre-Warranty Support Maintenance Service Agreements are priced at the monthly service charge for each thirty (30) day period selected, not to exceed one hundred eighty (180) days.

Pre-Warranty Support Maintenance Service Agreements do not include installation or de-installation. The Digital Reseller may purchase installation and de-installation at current Per-Call rates and terms and conditions or on a fixed price basis.

Pre-Warranty Support Maintenance Service Agreements are not DBA or GOLD KEY Program discountable. The purchase of these Agreements is not included in the DBA Aggregate Dollar Value.

TEMPEST WARRANTY

If a Digital TEMPEST system has been configured, installed and maintained by Digital, the customer is granted a TEMPEST warranty, above and beyond the normal hardware warranty purchased with the equipment. This warranty states that Digital will ensure TEMPEST protection for as long as the customer owns the equipment.

TEMPEST WARRANTY FEATURES SUMMARY

- A TEMPEST warranty is provided to customers who purchase Digital's accredited and verified TEMPEST systems and products provided that Digital configures, installs and maintains the TEMPEST equipment.
- This warranty protects the TEMPEST integrity of the Digital system for as long as the customer keeps the equipment, with specific exceptions, under a Digital maintenance contract.

DIGITAL RESPONSIBILITIES

- If the TEMPEST equipment is found to be no longer compliant to the TEMPEST standard, as spelled out in NACSIM 5100A, then Digital will repair or replace the defective equipment
- Digital is required to install most TEMPEST equipment and maintain it to receive this warranty. Digital's U.S. Price List (USPL) indicates minimum warranty levels. Customers who obtain less comprehensive warranty coverage than listed in the USPL will void the TEMPEST warranty. Although some TEMPEST products are customer installable, a Digital maintenance contract is required for those products to be covered under this TEMPEST warranty.

CUSTOMER RESPONSIBILITIES

- The determination of suitability of the TEMPEST system to meet the customer's needs rests with the customer.
- It is the customer's responsibility to ensure that the Customer Services contract is kept current.
- It is the customer's responsibility not to change, or ask Digital Customer Services to change, the equipment or system configuration without proper technical advice from one of Digital's Certified TEMPEST Engineers.

WARRANTY DEFINITIONS

- "TEMPEST Accredited" - the product or system meets both the technical and administrative requirements of both NACSIM 5100-A and the U.S. Government's Industrial TEMPEST Program (ITP).
- "Digital Verified" - the product or system meets the technical requirements of NACSIM 5100-A. Digital Verified products or systems are supported by the opinion of Digital's Certified TEMPEST Engineer after testing the products or systems to a subset of NACSIM 5100-A in Digital's test facility.

WARRANTY INFORMATION

TEMPEST WARRANTY (cont'd)

STANDARD TEMPEST PRODUCT WARRANTY

Digital Equipment Corporation TEMPEST products are warranted to meet TEMPEST performance levels subject to the terms and conditions stated in the Standard TEMPEST Product Warranty. Digital's "Accredited" TEMPEST products appear on the U.S. Government's Preferred Products List (PPL). These are warranted as required by the Government's Industrial TEMPEST Program (ITP) as described in this document. In case of conflict the ITP requirements will govern. Digital TEMPEST products sold as "Verified" are warranted only as described here. Only TEMPEST products assembled by Digital factory or Customer Services are covered. TEMPEST products assembled from Digital components by third parties are not covered by this warranty.

PERFORMANCE

To maintain warranty coverage, minimum configuration guidelines, available from Digital upon request, must be followed. Only components or systems made exclusively from components listed in Digital's TEMPEST Reference Catalog or on the PPL at the time of purchase will qualify for a TEMPEST warranty. Non-standard system configurations will be eligible for this warranty if they are covered by a written statement from a Digital Government Licensed TEMPEST Professional Level II. The statement will include a description of the complete configuration and a statement of eligibility. Extensions of the warranty to cover additions to the system are not covered except as described below.

Unless otherwise stated, the system includes the communication ports and the AC power connection of the major system components, but does not include external cabling unless that cabling is included as part of the "Accredited" or "Verified" system. External cabling and associated equipment will be included as described in the next paragraph.

INSTALLATION

Digital TEMPEST systems must be installed by Digital to be warranted. This warranty is extended to include additions to the system or component, as long as the additional hardware meets the configuration requirements above, and is installed by Digital.

MAINTENANCE

Digital TEMPEST systems can be covered by this TEMPEST warranty for a period of one year by placing the entire system to be warranted under a Digital Customer Services maintenance agreement. This agreement must be uninterrupted; interruption of the Customer Services agreement nullifies the warranty.

TEMPEST PROBLEM IDENTIFICATION

If a possible TEMPEST problem is identified, the customer is responsible for promptly reporting the occurence to Digital Customer Services. The customer is responsible for arranging an exchange of security clearances and technical data between the organization which discovered the possible problem, and the Digital TEMPEST technical organization appointed to investigate the problem. Digital may agree that there is a problem, but retains the right to examine the suspect equipment in its own, or designated, TEMPEST test laboratories. In the event that Digital exercises its right to test the equipment, the customer will relinquish the equipment for a test period not to exceed 45 days, including shipping time. The customer must bear the loss of the use of the equipment for that period. Digital will be responsible for returning the equipment to the customer. The results of the laboratory tests shall determine if there is a problem which requires correction; in certain cases the ITP may be asked for its technical opinion, which will govern.

CORRECTIVE ACTION

When a TEMPEST problem has been confirmed, Digital will repair or replace, at its option, the defective equipment or component. If a design deficiency is the cause of the problem, Digital will make a good faith effort to resolve the problem in a reasonable time. When the deficiency has been corrected Digital will, at its option, retrofit the customer unit, replace the unit with identical new or used equipment, or replace the units with what, in Digital's opinion, is a functionally equivalent unit. In the event of TEMPEST system problems involving external cabling or associated units, Digital may at its option revise the facility plan, or seek corrective action from the manufacturer of third party equipment.
The TEMPEST problem solution will be to the satisfaction of a Digital Government Licensed TEMPEST Professional Level II. If there are contended issues, the ITP will be asked for an opinion, which will prevail.

EXPORT

TEMPEST products are specifically controlled under the International Traffic in Arms Regulations (Code of Federal Regulations, Title 22, Parts 120-130). An Export license issued by the United States Department of State is required prior to the delivery of this product to non-United States entities and persons, whether located in or out of the United States.

ASTERISKED OPTIONS

The following information details special terms that apply to specific systems and options that are asterisked in the Price List section of this book.

VAXft 3000
VAX 6000
SV-8EEEA/B
SV-85EEA/B
SV-87EEA/B
85XX, 87XX
88XX, 89XX
9XXX

DECservice level of hardware support only is offered. BMC is listed for information only.

DECmate

PC238, PC23D, PC23P, PC24P, PC278, PC2P5, and PC2P6: The integrated service offering for DECmate products is Full System Service (FSS). Full System Service provides hardware support and telephone advisory service for all Digital developed and Digital Classified supported software.

Due to space limitations in the Price Book, prices for these services are listed with an asterisk under the headings indicated below.

PRICE BOOK HEADING SERVICE DEFINITION
BSS = Full System Basic Monthly Service price
DS9 = Full System DECservice Monthly Service price
FSS =
CMC = Full System Carry-in Monthly Service

DECOM, DEFTR

Channel certification must be performed prior to installation. Contact your customer and inquire if certification has been performed as part of the cable plant installation. The product should not be placed on service contract until certification has been accomplished.

DEPCA-xx

In order for the DEPCA to qualify for on-site maintenance, the IBM-PC must be under a Digital service agreement.

DECpc 320SX, DECpc333

Sold with a 1 year Return to Digital warranty within the U.S. (and CMC level warranty in GIA). This is the primary service strategy for these products. Post Warranty service and pricing comparable to this warranty level of support will be available by late calendar 1991. For further information contact your Country Off-Site Service Business Manager.

DEPCA-PB

Support is available on the INDIVIDUAL COMPONENT level only. Please reference the DEPCA-XX for available services and appropriate pricing.

The installation and service price on this package is for the hardware only. For software please refer to the installation and service prices for VMS Services for MSDOS and DECnet PCSA.

DEPCB-xx

Support is available on the INDIVIDUAL OPTION level only. Please refer to the DEPCA-xx for available services and appropriate pricing.

DEPKx-xx

For installation, warranty, and contract administration, refer to the individual component options' implementation plans for service restrictions that may apply.

ASTERISKED OPTIONS

ASTERISKED OPTIONS (cont'd)

DEREP-RH,RJ, DEREN-RC, RD, DEBAM-RD,RD,RF, R6, DEBET-RH,RJ, FOAED-AA

Fiber optic cable certification is required to assess proper connectivity and to determine if the installation meets acceptable attenuation limits. These procedures are detailed in the DECconnect Manual (EK-DECSY-FC) and in the future will be found in the DFON Installation Guide (EK-DECSY-FC). Product-specific information is included with the appropriate product documentation. Your Digital Networks and Site Service Organization can provide this service. On-site warranty and contract service required that the fiber optic cable be certified.

DRB32-C

The DRB32-C will only be sold with the DVSG-BI, Customer Engineering Support for VAX Supercomputer Gateway Configurations Service. The installation of each customer solution will be on a quotational basis.

DSRVB-AH,DSRVB-AJ DSRVB-BH,DSRVF-BH

These options contain multiples of base hardware product. Contract administration should be on a unit basis. Consult the price list for the appropriate service charge.

DSVTA-XX, DSVTF-XX

Support is available on the INDIVIDUAL COMPONENT level only. Please refer to the VT320-xx and DSRVB-xx for available services and appropriate pricing.

HA10P-AM,AN,DF, DG,DH,DM,DN, EA,EB,EM,EP, FC,FD,FM

THE HA100 requires a customer installed receptacle to accommodate the AC input plugs listed below:

UPS Input Voltage	3 kVA	5 kVA	10 kVA
120	NEMA 5-50P	3100P4W	3100P6W
208	NEMA 6-30P	NEMA 6-50P	3100P6W
240	NEMA 14-30P	NEMA 14-50P	3100P6W

HA32A-AH,AK,AM, AN,BH,BK,BM,BN, CH,CK,CM,CN,DH, DK,DM,DN

Digital does not provide electrical installation for this product. Installation charges associated with HA32A-XX options refer to system "start-up" which is performed by Digital Customer Service. Requires electrical installation by a licensed electrican.

HSC40/HSC50/HSC70

This service includes Basic software support on all HSC products. The option installation charge includes hardware and initial software installation. The software updates that are included in Basic software support are customer installable. The customer may elect to purchase installation of the software updates via Installation Service for Software (ISS). Reference part No.'s QX926-I7/-IG OR QX929-IG.

LN100-DA/KB

The LN100-KA and LN100-KB are upgrade kits to allow customers the ability to upgrade their existing LN01 to an LN01S. Once upgraded, the BMC for LN01S-CA should be applied in all cases.

LPS40-UA LPS20-UA

Printserver 40 to 40 Plus and Printserver 20 to Turbo Printserver 20 Upgrade Kits are available at List Price only. Hardware Installation should be purchased to supplement List Price. Problems that result from installation by other than a Digital service Representative will not be covered under the Digital Contract and Warranty Terms and Conditions. The LPS40-UA only requires return of removed material via Returns Management Process. Current version of software is required. Upon Upgrade, models are redesignated as follows: LPS40-AA/AE to DA/FA, LPS20-CA/DA to LPS20-GA

ASTERISKED OPTIONS (cont'd)

PC38N-AA	DECservice is the only service offered on this product, BMC's are listed for information only.
Personal Computers	System's price includes the keyboard and monitor (monochrome). If a VR241 or VRTSI (touchscreen) monitor is used instead of a VR201 (monochrome), increase the system BMC by (VR241) $7 or (VRTSI) $12.
RTVAX 3XXX	See DW-320R1/R2, 350R1/R2 OR 360R1 for service pricing.
RV864 **RV64**	The service prices stated are for the hardware only and do not include either mechanical refurbishment of the RV64, which may be required after approximately one million insertions, or the service pricing for the JCS (Jukebox Control Software). Please reference the price book entries for the JCS software service pricing under QT-VHBAx-xx. Also, note that service pricing for the JCS software is the same for all system types.
TA78-UG	Upgrade installation from a TU78 to a TA78 includes return of removed materials to installing service location. The TU78 is redesignated TA78 and the BMC is as published for TA78.
TA81-UG	Upgrade installation from a TU81 to a TA81 includes return of removed materials to installing service location. The TU81 is redesignated TA81 and the BMC is as published for TA81.
TU81E-UG	Upgrade installation includes return of the removed parts to the responsible service location. After conversion, the hardware will be redesignated TU81E-AA/AB/BA/BB as appropriate, and the BMC will be that of the TU81E-AA/AB/BA/BB.
DB & DL Prefix	Support is available on the INDIVIDUAL OPTION level only. Please refer to the VT320-xx for available services and appropriate pricing.
DJ-500T3-BA/CA **DJ-500T4-BA/CA** **DJ-LA210, DJ-LN03** **DJ-LQP02, DJ-LQP03** **DJ-VT2XX**	Support for these systems is available on a component basis only. Please refer to the individual components for available services and appropriate pricing.
FM-DECHC-AA **FM-DECPC-AA** **FM-DECVT-AA**	These services are quoted on a case by case basis. For a quotation, please contact your local Field Service Sales Support Specialist.
VX2XX	The VX series of DECwindows Terminals are uniquely Hardware and Software interdependent. Therefore, all service prices are integrated only. Hardware only service is not available for these products.
VT320WB/XB/ **YB/ZB/WC/YC/GB**	These are pallets of VT320's quantity 210. All pricing is extended for the quantity, comments are written on the individual components only.

Winchester Platter Removal Service is available only to Digital SERVICE CONTRACT CUSTOMERS with a minimum of Basic coverage on selected Digital disk drives.

These customers may select either a monthly contract payment option or a per failure (Per Event) charge for service. The monthly charge is the same for drives under DECservice and Basic Service agreements and is not subject to any uplifts for coverage hours, etc.

Platter Removal Service pricing is not subject to any discounts or allowances. The Per Event Charge is in addition to all other service charges.

Part #	Drive Model	Monthly Charge	Per Event Charge
FM-RA70-A	RA70	$ 15	$ 900

LASER PRINTER SERVICE MATRIX

PRINTER MODEL	SERVICE CHARGE COVERS PAGES/MO (1)
LNO1/LNO1B/LNOS	Up to 10K
LNO3/LNOR/LNO3S/LNO3Q/LNO3A	Up to 10K
LNO5/LNO5R	Up to 10K
LNO6/LNO6R	Up to 12K
LNO7/LNO7R	Up to #5K
LNO8/LNO8R	See Tier Matrix
LPS40	See Tier Matrix
LPS20	See Tier Matrix

Additional Per Call charges apply beyond specified maximum monthly print volumes indicated above or when equivalent yearly total page useage is exceeded.

OPTIONAL LASER PRINTER OFFERINGS

PART	DESCRIPTION	PER EVENT CHARGE	INCLUDES	ELIGIBILITY
FM-LN03X-LC	LN03 Laser Care	$399	Installation of User and Toner Kits	Basic/DECService Agreements Only
FM-LN056-PM	100K Page PM for LN05/LN06	$415	Recommended Component replacement	Non-Contract Only*

* FM-LN056-PM also applies to all Non-Digital laser printers which use Cannon based 8PPM engines.

LASER PRINTER USAGE TIER MATRIX

MODEL	USAGE TIERS	PAGES/MO *	ADJUSTMENT
LPS20 (all models)	Tier 1	0 - 20K	None
	Tier 2	20K- 40K	$100
	Tier 3	40K- 70K*	$302
LPS40 (all models)	Tier 1	0 - 30K	None
	Tier 2	30K- 50K	$120
	Tier 3	50K- 70K	$360
	Tier 4	70K-100K*	$600

*Additional Per Call charges apply beyond specified maximum monthly print volumes indicated above or when equivalent yearly total page useage is exceeded.

NOTES:

1. Printservers are "system" products which are dependent on the close interaction of hardware and software. Therefore, all service prices are integrated only. Basic Hardware services are not available for these products.
2. After Warranty Support charges are based on a tiered monthly usage, as determined during the warranty or previous contract period. The total monthly charge is a combination of the unadjusted monthly service charge including any uplifts/upgrades that may apply plus the Tier adjustment appropriate for the expected monthly usage.
3. The LPS20 is customer installable; the LPS40 is Digital installable. The system installation charge includes the installation of the hardware and the installation of the supporting host and client software on one designated VAX CPU. Software only installation, as described above, is available for the LPS20 at a price of $380.

4. TELECOMMUNICATIONS AND NETWORKS PRICING INFORMATION

DATA COLUMN EXPLANATIONS

MODEL NUMBER:

Digital approved model number for ordering purposes.

DESCRIPTION:

Brief product description.

LIST:

Current U.S. List Price, including 1 year conformance to Software Product Description.

STANDARD:

Price includes Warranty support as described in the Warranty Section of this price list. Standard is the recommended level of Warranty support.

Some options and services must be obtained as a case by case basis. This applies to all models containing one of the following messages:

CALL BUS	– Contact Business Management - District/Account Operations Manager
CALL CUST TRG	– Contact Customer Training - (617) 276-1500

A Digital sales representative will contact the appropriate person in the above organization for current pricing information prior to quotation.

BMC (Basic Monthly Charge)

This column lists the 9-hour (8AM - 5PM), 5-day (Monday through Friday), priority response, monthly hardware on-site maintenance charges for Basic Hardware Service coverage.

DSMC (DECservice Monthly Charge)

This column lists the 9-hour (8AM - 5PM), 5-day (Monday through Friday), 2-4 hour response, monthly hardware charges for on-site DECservice Hardware coverage.

CMC (Carry-in Monthly Charge)

This column lists the 9-hour (8AM - 5PM), 5-day (Monday through Friday), monthly hardware maintenance charges for off-site service repairs delivered to a Digital ServiCenter.

INST CHG (Installation Charge)

This column lists the fixed price charge for performing system installation, add-on installation of additional equipment to already installed systems, and installation of terminals, personal computers, Network Interconnect products, and micro computer systems. Zone charges should be added for customers beyond 100 miles of service office (see Zone Charges).

E/U (End User):

The discount code that a product will receive according to the customer status as an End User.

OEM (Original Equipment Manufacturer):

The discount code that a product will receive according to the customer status as an Original Equipment Manufacturer/Value Added Reseller (VAR).

Telecommunications and Networks

5. HARDWARE OPTION PRICING INFORMATION

DATA COLUMN EXPLANATIONS

MODEL NUMBER:

Digital approved model number for ordering purposes.

DESCRIPTION:

Brief product description.

LIST:

Current U.S. List Price, including 1 year conformance to Software Product Description.

STANDARD:

Price includes Warranty support as described in the Warranty Section of this price list. Standard is the recommended level of Warranty support.

Some options and services must be obtained as a case by case basis. This applies to all models containing one of the following messages:

CALL BUS	– Contact Business Management - District/Account Operations Manager
CALL CUST TRG	– Contact Customer Training - (617) 276-1500

A Digital sales representative will contact the appropriate person in the above organization for current pricing information prior to quotation.

BMC (Basic Monthly Charge)

This column lists the 9-hour (8AM - 5PM), 5-day (Monday through Friday), priority response, monthly hardware on-site maintenance charges for Basic Hardware Service coverage.

DSMC (DECservice Monthly Charge)

This column lists the 9-hour (8AM - 5PM), 5-day (Monday through Friday), 2-4 hour response, monthly hardware charges for on-site DECservice Hardware coverage.

CMC (Carry-in Monthly Charge)

This column lists the 9-hour (8AM - 5PM), 5-day (Monday through Friday), monthly hardware maintenance charges for off-site service repairs delivered to a Digital ServiCenter.

INST CHG (Installation Charge)

This column lists the fixed price charge for performing system installation, add-on installation of additional equipment to already installed systems, and installation of terminals, personal computers, Network Interconnect products, and micro computer systems. Zone charges should be added for customers beyond 100 miles of service office (see Zone Charges).

E/U (End User):

The discount code that a product will receive according to the customer status as an End User.

OEM (Original Equipment Manufacturer):

The discount code that a product will receive according to the customer status as an Original Equipment Manufacturer/Value Added Reseller (VAR).

6. SOFTWARE PRODUCTS

Each section of the software preface contains a brief description and information on how to use each section. Specific topics included here are:

- How to Configure a Software Model Number
- ClusterWide Ordering Information
- Software Volume Pricing
- Software Fastship Program
- Software Made Simple
- Software License Appendix

SPECIAL NOTICE

- This section contains Operating System product pricing information ONLY. For Software Layered Product pricing information refer to Digital's U.S. Software Pricebook (EE-C0018-98).
- Professional Software Services and Cross Functional Services Packages can be found under the Enterprise Integration Services Section.
- The Software license type and license rating applicable to any given software product license order is identified in the software product license model number (see "HOW TO DEFINE AND CONFIGURE SOFTWARE MODEL NUMBERS" on the following pages). The applicable terms and conditions for these license types are defined in a combination of:

  — Digital's Standard U.S. Terms and Conditions

  — The Software License Appendix section of this price list

  — The applicable SPD

  Please consult each of these to understand the license terms that apply to your specific order.

HOW TO DEFINE AND CONFIGURE SOFTWARE MODEL NUMBERS

CLUSTERWIDE ORDERING INFORMATION

BASE ClusterWide LICENSES

ClusterWide Licensing can be used for either a standalone processor, or a VAXcluster, or a portion of the VAXcluster. All ClusterWide license part numbers use the 2-5-2 standard format.

A base ClusterWide License is identified in the 7th, 8th, and 9th positions in the model number. Refer to the How to Configure a Software Model Number Section at the beginning of the Software Preface.

Migration- Converting existing licenses (Traditional UZ,QZ or AA, AB) to a ClusterWide License. Migration is triggered by a customer initiating a purchase of a ClusterWide License.

UPGRADE- Increasing the size of an existing ClusterWide License.

CONFIGURING ClusterWide UPGRADE-

If you've already purchased a ClusterWide license for a piece of software, and now wish to extend the license to cover new processors added to the cluster, you can work out the cost of upgrading from your current ClusterWide license rating by using the ClusterWide Upgrade Matrix.

ClusterWide Upgrade Matrix

From	To	10	20	50	100	200	300	400	600	900	1200	1800	2400	3500	4800	6000	7200	9000
	NEW LICENSE	B	C	D	E	F	G	H	J	K	L	M	N	Q	S	T	U	V
0 (New)	QL-UPIA9-J□																	
10	QL-UPIAQ-U□																	
20	QL-UPIAP-U□																	
50	QL-UPIAN-U□																	
100	QL-UPIAJ-U□																	
200	QL-UPIAH-U□								QL-100AH-UJ									
300	QL-UPIAB-U□																	
400	QL-UPIAG-U□																	
600	QL-UPIAE-U□																	
900	QL-UPIA4-U□																	
1200	QL-UPIAD-U□																	
1800	QL-UPIAU-U□																	
2400	QL-UPIAV-U□																	
3600	QL-UPIA6-U□																	
4800	QL-UPIA5-U□																	
6000	QL-UPIAT-U□																	
7200	QL-UPIA7-U□																	

Example:
You already run VAX FORTRAN on a VAX 8300 with a ClusterWide license rating of 200. You add four additional MicroVAX 3100 processors and a VAX 600-310 to the cluster. What is the model number of the ClusterWide upgrade license?

Answer:
Your current ClusterWide license rating is 200. The processor license rating of a MicroVAX 3100 is 20; that of a VAX 600-310 is 300 (see the ClusterWide license price list for license ratings). Therefore, your new ClusterWide license rating total is 580 (200+(4x20)+300), and your new ClusterWide letter code is "J".
Therefore, the appropriate upgrade model number is **QL-100AH-UH.**

The exact price is available on AQS, or the Electronic Store.

SOFTWARE VOLUME PRICING

Software Volume Pricing is the ability to receive a price based on the quantity purchased for traditional binary licenses of most Workstation and MicroVAX software, and for all layered product user licenses.

The range of volume pricing available is:

	Quantity Ordered	Volume Price Reduction
NOTE	5 to 24 licenses	5%
Volume pricing is only available	25 to 49 licenses	7%
for licenses purchased at CLP	50 to 99 licenses	10%
(i.e., not at SLP). Service	100 to 199 licenses	12%
should be quoted separately	200 to 249 licenses	15%
	250 to 299 licenses	17%
	300 to 399 licenses	20%
	400 to 499 licenses	22%
	500 to 599 licenses	24%
	600 to 699 licenses	26%
	700 to 799 licenses	28%
	800 to 899 licenses	30%
	900 to 999 licenses	32%

Digital Business Agreement (DBA) discounts are additionally applied to software volume purchases.

ORDER PROCEDURES

There are no special part numbers to obtain software volume prices. The order system will automatically determine the appropriate unit LIST price for the quantity purchased. To ensure the volume prices are invoiced, volume software orders should indicate NO PARTIAL SHIPMENTS.

Resellers may take advantage of volume prices as well.

SOFTWARE ON THE FAST SHIP PROGRAM

81 of Digital's top selling software products are now on the FASTship Program. The list includes VMS and Ultrix Operating Systems, and many of their layered products.

FASTship means, for the current version of the products listed below, H-kits, Software Documentation kits, and/or licenses/PAKS will be shipped by the end of the next business day following receipt of their order.

Also available on FASTship are most licenses/PAKS. Effective January 7th, 1991, most licenses/PAKS were added to FASTship. These licenses/PAKS were added even if their corresponding Software Documentation Kits, or H-kits were not on FASTship.

See following page for a complete listing of products included on the Fast Ship Program.

SOFTWARE LICENSE APPENDIX

The following software license terms and conditions are incorporated by reference into Paragraph 11 of Digital Equipment Corporation's Standard U.S. Terms and Conditions (Standard Terms). In the event of a conflict between the Standard Terms and the Software License Appendix, the latter shall govern.

This Appendix is presented in two general sections. The first deals with license types (items 1 through 12), and the second with other additional terms and DBA references (items 13 through 18).

LICENSE TERMS

Acceptance of an order for a license option (License types A, B, J, P, Q, W, 2, 3) authorizes use of Digital's then Current Version and all Digital Prior Versions of the software product. Rights to use later versions are granted under the Software Update License or as provided in connection with a Customer Services Software Support Agreement.

"Use" of software is defined as the execution, invocation and/or access of a licensed software product.

The Software Management Domain is either that subset of the customer's pricessors or equipment configurations which collectively interact using Digital license management tools such as the License Management Facility (LMF) or, in cases where no Digital license management tool is available, a single processor, unless otherwise specified in the terms applicable to a specific license type.

License PAKs may only be installed and enabled in one Software Management Domain at a time.

The processors or equipment configurations on which the licensed software products may be used are defined by the Software Management Domain.

For information regarding the operating system(s) for which any layered software product is licensed, refer to the Software Product Description (SPD). In general, Digital licenses layered software products for Use on a single operating system/hardware platform. Where a cross-platform license is indicated in the SPD and by the license model number, rights to use the product are granted for one or more operating system/hardware platforms. However, such licenses allow the Use of the product on only one such software/hardware platform at a time.

1. TRADITIONAL LICENSE (TYPE A)

The Traditional License provides the customer the right to use a given software product on a single processor.

A prerequisite for designating an AB Traditional License to a node in a VAXcluster is that there be at least one corresponding AA Traditional License of 82xx, 78x, or 750 license rating. Licenses must be granted for all processors that will execute the software. The AB Traditional License may remain designated to a VAXcluster configuration only if accompanied by the AA Traditional license OR if the AB is upgraded to an AA Traditional License.

The Software Management Domain for Traditional Licenses is a single processor.

2. OPERATING SYSTEM USER LICENSE (TYPE B)

The Operating System User License provides the customer the right to use a specified operating system up to the number of users specified in the software license model number (9th character). An operating system "user" is an individual who is logged onto the system, and/or is using the system interactively. Interactive use of the operating system includes the display of information upon any video or hardcopy display product whether in a DECwindows/X environment or otherwise.

Consult the SPD to see if the Operating System User License option is available for a given processor.

The Software Management Domain for an Operating System User License is a single processor.

Clarification of position - VMS Workstation License:

- A VMS workstation is licensed as a single user system. However, the VMS software license allow an occasional log-on of a second individual on the workstation to perform necessary systems management and control functions. This provides the customer with the flexibility to have the workstation managed either remotely or by a system manager who is not the primary user.
- Some examples of system management activities include:

  — VMS software installation, distribution, configuration and system management.

  — Network and VAXcluster management.

  — Workstation trouble-shooting.

- System management activities are generally considered to be only those which are necessary to ensure the setting-up and maintenance of the workstation, whereas user activities have no restrictions.

  Clarification of position - Software Licensing on VAX/VMS based VAXservers:

- The VMS File and Application Server License is packaged with VAX/VMS VAXserver and provides for remotely submitted batch, print, application, and computing services.

  The VMS File and Application Server License authorizes one direct log-on to the VAXserver, for system management purposes only. Interactive use of the VAXserver is not permitted.

3. CLUSTERWIDE LICENSE (TYPE J)

The ClusterWide License provides the customer the right to use a given software layered product on all processors within a VAXcluster configuration provided that the combined license rating (as defined in the License Rating Table in the Software Model Number section of the Price List) of all processors within the VAXcluster using the software at a given time shall not exceed the combined license rating of the ClusterWide license(s) designated to the cluster for a given software product.

The Software Management Domain for ClusterWide Licenses is a single processor or a VAXcluster configuration.

4. CONCURRENT USE LICENSE (TYPE 3)

Concurrent Use Licenses provide the customer with the right to use a specific layered product within a single Software Management Domain provided that the number of simultaneous uses does not exceed the number of licenses allocated to that single Software Management Domain. For the purposes of the Concurrent Use License the term "user" shall mean any activity or use specified in the applicable SPD.

5. PERSONAL USE LICENSE (TYPE 2)

Each Personal Use License provides a single user with the right to multiple simultaneous Use of a specific layered product within a single Software Management Domain. For the purpose of a Personal Use License, a "user" is defined as a specific individual to whom a Personal Use License has been assigned.

In the case of products licensed under a Personal Use License and whose normal use does not require continuing interaction between the user and the product, the Personal Use License does not authorize a user to process the work of other individuals.

Personal Use Licenses are assigned to a user for a minimum period of thirty days. The re-assignment of a Personal Use License from one specific individual to another may not be made within thirty days of the immediately preceding assignment.

The re-assignment of a Personal Use License may be made within the thirty day assignment period only in instances where this re-assignment is required on a temporary basis for the specific purposes of installation, maintenance or trouble-shooting of the licensed software product, and for the re-assignment of that Personal Use License to the immediately preceding user after such actions have been completed.

Records must be kept of the identities of the specific individuals to whom Personal Use Licenses have been assigned as well as the dates that such assignments are made and are to be available to Digital on request.

6. APPLICATION DEPLOYMENT LICENSE FOR VMS (TYPE W)

This is a non-transferable license that is ONLY available for sublicensing to U.S. end users by U.S. Original Equipment Manufacturers (OEMs) who have a current DBA and qualify for earned credit, and to Distributor Affiliated OEMs (DAOs) with a current DAO Agreement and who are approved to do so by their Distributor.

The only Digital software products that may be used in conjunction with the Application Deployment License for VMS are the OEM's Application as stated in the OEM's AVRP as well as any 1) runtime options for Digital software available on the MicroVAX II, MicroVAX 2000, MicroVAX 3000, VAX 4000, 2) any Software Building Blocks, and 3) DECnet E/N, provided that these software products (listed in 1, 2, and 3 in this paragraph) are required for the execution of the OEM's Application System.

The Application Deployment License for VMS may not be utilized for purposes of software development, and may not be offered in conjunction with general purposes EDP services.

The OEM's Application must include a screen visible during application session initiation which states: "This system contains proprietary software from Digital Equipment Corporation provided under a sublicensing agreement from 'OEM company name' to be used only in conjunction with 'OEM application name'. No additional Digital software products may be used on this system. Under no circumstances is the ADL/VMS license to be transferred or made available to any other party."

Application Deployment Licenses for VMS are available only for single MicroVAX II, MicroVAX 2000, MicroVAX 3000, and VAX 4000 processors.

7. CAMPUSWIDE SOFTWARE LICENSE (TYPE N)

The Campuswide Software License is available ONLY to qualified Education Institutions. It is governed by the terms of the CampusWide Software License Agreement.

The Software Management Domain for Distributed Software is defined by the specific terms of the third-party license agreement.

8. DISTRIBUTED SOFTWARE LICENSE (TYPE : see description in model number section)

The Software is licensed in accordance with the terms and conditions of the third-party license agreement accompanying the Distributed Software. Purchaser shall not load, execute, modify, copy, disclose, transfer, or otherwise use the Distributed Software except as provided in the applicable third-party license agreement.

The Software Management Domain for Distributed Software is defined by the specific terms of the third-party license agreements.

9. UPDATE LICENSE (TYPES: R,S,Y,X,4,5)

An Update License authorizes execution of the software in conjunction with an underlying license and is subject to the license terms applicable to the underlying license type at the time of the grant of the update license. The underlying license may be any one of the following license types: A,B,J,P,Q, W,2,3. (described elsewhere in this appendix).

The Update License attaches to the corresponding underlying license at the time the update version of the software is first executed pursuant to the update license grant. Thereafter, the Update License is only redesignatable or relicensable in conjunction with that specific underlying license.

The Software Management Domain for an Update License is determined by the Software Management Domain of the underlying license.

10. DEVELOPER LICENSE (TYPE K)

This is a limited license for holders of Digital Business Agreements with a Demonstration Development Addendum. This license only authorizes use on workstations and only for the demonstration or development of software and hardware applications as defined in the Demonstration Development Addendum. A Developer License may not be transferred, sublicensed, migrated, or upgraded. It expires 12 months after grant.

The Software Management Domain for a Developer License is a single workstation processor.

11. USER/ACTIVITY LICENSE (TYPE P)

The User/Activity License provides the customer with the right to use layered products provided that the number of users, as defined by the model number, is not exceeded. For the purposes of the User/Activity License the term "user" shall mean any activity or use specified in the applicable SPD.

The Software Management Domain for a User/Activity License is a single processor or a VAXcluster configuration.

12. PERSONAL LICENSE (TYPE Q)

The Personal License provides ;kthe customer with the right to use layered products provided that the number of users, as defined by the model number, is not exceeded. For the purposes of a Personal License, a "user" is defined as a named individual. These "users" must be listed in either the User Profile of the software product, if available, or listed on a separate document which is maintained by the customer and available to Digital upon request. The content of the User Profile or document may be updated at any time without notification to Digital.

The Software Management Domain for a Personal License is a single processor or a VAXcluster configuration.

13. LICENSE ADMINISTRATION FEATURES

Software and/or equipment may incorporate features to help assure that software licensed by Digital is executed only in accordance with the terms of the license. The licensee agrees to comply with the administrative functionality of such features, e.g. LMF license registration. Any Digital software license is granted on the condition that the licensee will not deliberately modify or make inoperable any such feature. License Product Authorization Keys (PAKs) are an integral part of their corresponding Software and are provided subject to the terms of the Software License provisions of the U.S. Standard Terms and Conditions. Use, duplication, or dissemination is improper and unlawful unless pursuant to a valid software license.

14. LICENSE MANAGEMENT FACILITY (LMF) V1.1

For customers to whom Digital makes available the media kit for VMS LMF V1.1, Digital grants the right to use LMF V1.1 on any processor on which the customer is currently licensed for VMS V5.2 or later. The granting of the rights to use LMF V1.1 is subject to the Terms and Conditions of the aforementioned VMS License.

15. OEM/CMP/DAO MAINTENANCE AND SUPPORT RIGHTS

The following terms apply only to Digital-developed software products. Software products used by an OEM, Cooperative Marketing Partner authorized to sublicense ("CMP"), or Distributor Affiliated OEM ("DAO") for development of its Application Product ("tool(s)") may be copied and used by the OEM, CMP or DAO to install, tune, maintain and support the Application Product or System. The tool(s) must be licensed to the OEM, CMP or DAO and may be executed simultaneously on processors which have been or will be sold as part of an Application System. The License PAK for each tool must be installed prior to execution; the license rating may be adjusted if necessary. The License PAK(s) must be deleted or disabled upon completion of the use of the tool.

16. ON-LINE DOCUMENTATION

The VMS Operating System Software License and the ULTRIX Operating System and ULTRIX Worksystem Software Licenses each include a license for screen display of any documentation included on the respective On-line Documentation Library compact discs (On-line Documentation). The On-line Documentation is intended for use with the DECwindows Bookreader application licensed by Digital. Hard copy printing of On-line Documentation products is limited to the screen segment print capabilities included in DECwindows.

17. SOFTWARE LICENSE TRANSFER POLICY

Policy Statement:

- The operating system and relicensable software set out below may be transferred with the processor when the processor is sold, provided that the Software Relicense Form is accepted and approved by Digital. A processor must be an operational system that has a minimum configuration which is capable of executing the applicable software being transferred in accordance with the applicable SPD.
- Operating systems and other relicensable software may not be redesignated from one processor to another.
- Within a Corporate Group*, software that is neither an operating system nor relicensable software may be redesignated from one processor to another, subject to a license upgrade fee, if applicable, and from one legal entity within the Corporate Group (e.g., majority owned subsidiary or corporate parent) to another.
- Within a Corporate Group, the operating system and other relicensable software may be redesignated from one legal entity to another provided the software remains with the processor.
- A Software License Redesignation Form must be submitted if the movement of the software is from one eligible purchaser to another (within Corporate Group). It does not need to be submitted if the movement is within a give eligible purchaser.

* Corporate Group = Includes customer, customer's majority owned subsidiaries, its corporate parent which has majority interest in customer and such corporate parent's majority-owned subsidiaries; or eligible purchasers listed in a customer's DBA with Digital.

Information on Relicensable Diagnostics can be found in the DAS Price List (EE-C0383-79).

18. PROCESSOR UPGRADES

Digital Software license authorize execution of Software on the defined processors as these processors exist at the time of shipment by Digital. Modifications which increase the functionality of the processors may require corresponding license upgrades.

For example, any change in the number (or qualities) of the CPU boards after original shipment, so that the resultant processor is comparable to another Digital processor offering, requires a new license for operating systems, DECnet, and VAXcluster.

"SOFTWARE MADE SIMPLE"

QUESTIONS AND ANSWERS

Software business practices are designed to enable numerous transactions with the customer, including obtaining, transferring, updating, and upgrading licenses.

The flexibility designed into these practices requires a certain level of understanding of what is required in a given scenario. The purpose of "SOFTWARE MADE SIMPLE" is to provide simple answers to some of the basic questions about Digital's software business practices.

If you have an additional question that you would like to see answered, please let us know by sending your question to:

SOFTWARE MADE SIMPLE
DIGITAL EQUIPMENT CORPORATION
LTN2-2/K20
305 FOSTER STREET
LITTLETON, MA 01460

We will address the most frequently asked questions first and print the answers in this section. We will not be able to respond individually. In the following pages you will find information regarding software business practices for the following situations:

1. Selling or Buying Used Equipment.
2. Increasing Software Usage.
3. Moving Software.
4. Incabinet Upgrades
5. Updating Software Versions

1. SELLING OR BUYING USED EQUIPMENT

KEY POINTS

- Digital will transfer the software license from the seller of the processor to the buyer if the software product is on the Relicensable list. See list in Software License Appendix prior to this section.
- All Relicenses require Digital's approval by signature on the Relicense Form.

QUESTION:

What do I, as the seller, need to do to initiate the relicense process?

ANSWER:

Fill out a Software Relicense Form, sign it, and have the buyer sign it. Then submit it to Digital. Upon review and approval, Digital will send acknowledgement copies that will terminate your licenses and grant the buyer's licenses.

QUESTION:

Where can I get the Relicense Form?

ANSWER:

You may get one from your local Digital office.

QUESTION:

Where should I send the Relicense Form?

ANSWER:

You can mail the fully completed and signed form to:

Relicense Processing/CSLA
DIGITAL EQUIPMENT CORPORATION
97 Pipe Road
Acton, MA 01720

QUESTION:

Is it OK to send the buyer the software and the License PAK?

ANSWER:

A useable copy of the software media must be sent to the buyer once you recieve your approved Relicense acknowledgement form. As of January 1, 1991 the License PAK must be sent along with the Relicense Form to Digital. This will provide proper proof of license, and will allow Digital to make sure the buyer gets a License PAK with each Relicense.

QUESTION:

Can I transfer a Periodic Payment License (PPL)?

ANSWER:

No. Your PPL terminates when you sell your system. The buyer may choose to initiate another PPL or simply obtain the operating system license.

QUESTION:

Can an older version of software be transferred?

ANSWER:

Yes, the transfer of the license is for the version of the software being transferred. It should be made clear between the buyer and the seller what version of software is going with the system.

QUESTION:

What role can a broker or used-equipment dealer play with a license transfer?

ANSWER:

The broker or used equipment dealer may help the seller by getting the buyer to sign the form. Upon receipt of acknowldegment copies of the Relicense form, the seller must send the software directly to the buyer and not to the broker or dealer since they are not licensed for the software.

QUESTION:

Can the transfer be made directly to the used-equipment dealer?

ANSWER:

Yes. In fact, if you intend to deliver your software media to the dealer, then you must transfer directly to the dealer who can later transfer to another end-user. This will require two separete Relicense processes.

2. INCREASING SOFTWARE USAGE

KEY POINTS

- Licenses that are credited towards obtaining another license are considered terminated.
- User licensing helps the customer increase their software usage independently from growing hardware.

QUESTION:

I am adding a node to my VAXcluster. Do I need to upgrade my ClusterWide licenses?

ANSWER:

The rating of the ClusterWide license must be equal to or greater than the sum of the rating of the processors on which the software will execute. You must upgrade the license anytime you require a higher rating.

QUESTION:

How do I find out what rating my processors are?

ANSWER:

There is a reference chart included in this Price Book at the beginning of the Software section.

INCREASING SOFTWARE USAGE (cont'd)

QUESTION:

I am growing my VAXcluster from a rating of 600 to a rating of 700, but I notice that the next ClusterWide rating is 900. What should I obtain?

ANSWER:

Digital has established a set of ClusterWide ratings, and it is the policy to order the next highest level; in this case the 900. This option will give you an opportunity to add more processors for the additional 200 units at a later date without the need to purchase another license.

It is also permissable to simply purchase a separate ClusterWide 100 rating license and use both licenses in the same VAXcluster. This option is higher priced per unit, however, gives you the flexibility to move the software and license to a processor outside the VAXcluster.

QUESTION:

Most of my layered product licenses are Traditional capacity license types. How do these get upgraded to a larger processor?

ANSWER:

We recommend that you order the correct sized ClusterWide Upgrade license. If the ClusterWide option is not available you can order the larger Traditional license. In either case Digital will give you credit for your existing license.

QUESTION:

What happens to my ClusterWide or Traditional licenses when I "trade" them in for a larger sized license?

ANSWER:

These licenses are terminated and may not be used any further. You should turn the license PAKs in with the order.

QUESTION:

Does this termination procedure apply to Personal and User/Activity licenses?

ANSWER:

No. You upgrade simply by purchasing additional licenses.

3. MOVING SOFTWARE

KEY POINTS

- Non-relicensable software (any layered product not listed in Relicensable list) may be moved freely within a given company.
- Redesignation Form still required when transfer is between majority-owned subsidiaries and parent. See additional information below.

QUESTION: I need to move my layered products from one processor to another. What are my license obligations when I do this?

ANSWER:

For Personal Use, Concurrent Use, User/Activity, or Personal Licenses, please feel free to do so as long as:

1. The software is only readily accessible on one processor or VAXcluster at a time.
2. The software remains within the bounds of your company. For capacity-based licenses, whether ClusterWide or Traditional, please feel free to do so as long as you adhere to numbers 1 and 2 above plus:
3. Anytime the software moves to a higher level processor, you purchase the necessary license upgrade. See License Rating Chart as well as section on Increasing Software Usage.

MOVING SOFTWARE (cont'd)

QUESTION:

What is my best strategy for my layered products if I have a VAXcluster that I know will be broken apart and reconfigured many times?

ANSWER:

Purchase CONCURRENT USE or PERSONAL USE licenses (where available). These licenses help you meet a specified usage requirement and can be used on any sized processor or VAXcluster.

Otherwise, purchase a single capacity license (Traditional or ClusterWide) for each processor. These licenses grant unlimited usage, however, must be properly sized for the given processor(s).

Digital does not permit licenses to be split, e.g., use a 600 rating license for two standalone 300 rating processors.

QUESTION:

Can I move any Relicensable software, including operating systems, DECnet, and VAXcluster from one processor to another?

ANSWER:

No. It is Digital's policy that this software must remain with the hardware.

QUESTION:

What do I need to do to move my layered products from my company to another subsidiary that is owned by the same parent corporation.

ANSWER:

You may move products anywhere between majority-owned subsidiaries and their parent (including subsidiary to subsidiary) providing you complete a Redesignation Form and submit to Digital.

QUESTION:

Is this Redesignation process ever used for Relicensable software?

ANSWER:

Yes, it may be moved providing it stays with the processor.

QUESTION:

What do I need to do if I move my software to a larger processor when Redesignating?

ANSWER:

You need to perform two transactions. You can either first obtain the upgrade then Redesignate, or Redesignate and let the other subsidiary or parent obtain the upgrade. A license is never upgraded during a Redesignation.

4. INCABINET UPGRADES

KEY POINTS

- For purposes of licensing, incabinet upgrades are treated the same as processor trade-ins. For Relicensable software, which is associated with the processor, the original license terminates, and a new license is required.
- Layered products may be redesignated from one processor to another, and must be upgraded whenever the new processor exceeds the license limits of the original license.

QUESTION:

What is considered to be an incabinet upgrade?

ANSWER:

Generally, an incabinet upgrade occurs when the CPU boards are exchanged for other CPU boards, or when additional CPU boards are added to the processor. See License Appendix section 18 for the formal definition.

EXAMPLES:

6000-410 TO 6000-420
6000-410 TO 6000-510
MicroVAX 3500 to MicroVAX 3800

QUESTION:

Can you tell me more specifically what products this applies to?

ANSWER:

Typically, the software involved includes VMS, ULTRIX, DECnet, and VAXcluster. However, any product found on Digital's Relicense list (see License Appendix) will apply.

QUESTION:

Does this policy apply to both capacity and user-based operating systems?

ANSWER:

Yes. In both cases the original license terminates and a new license is required.

QUESTION:

Does it matter if the upgrade board comes from Digital or elsewhere?

ANSWER:

No. In all cases your original license for Relicensable software terminates and you need new licenses for the upgraded configuration.

QUESTION: Does this mean that I have to pay full price for the new license?

ANSWER:

If the configuration you are currently running is properly licensed, and if Digital provides a license upgrade path then prices willl vary depending on the given path. Digital selects the upgrade paths and may not provide them in all cases.

If the configuration you are currently running is not properly licensed, or if there is no defined upgrade path, then you must obtain the "full" license.

INCABINET UPGRADES (cont'd)

QUESTION:

I have a License PAK for a Relicensable software product on my original processor which is the right size for the upgraded processor. Can I use it there?

ANSWER:

Technically, the License PAK which you have may enable the software product on the processor you are upgrading to, but it is Digital's incabinet upgrade policy that the original license terminates and a new license is required. Therefore, the original License PAK must be returned (see proof of license above) and the License PAK representing the new license must be used.

5. UPDATING SOFTWARE VERSIONS

KEY POINTS

- A Digital software license grants only the right to run the current and previous software versions. In order to run newer versions, you must obtain the rights to those versions.
- Media and Documentation kits do not include any license rights.

QUESTION:

How do I obtain the right to run new versions of the software I currently have licensed?

ANSWER:

If you have a Software Product Services (SPS) contract, then the rights to use new versions are included for the versions that are released during your contract. If you do not have an SPS contract, you must purchase Update Licenses for each software product you wish to update.

QUESTION:

When do I have to buy an Update License?

ANSWER:

If you do not have a service contract, you must buy an Update License each time you wish to update to a newer version of the software. An Update License grants the right to run Digital's current version or any prior version.

QUESTION:

If my current version is several versions behind Digital's current version, how many Update Licenses do I need to buy?

ANSWER:

Only one for each underlying license. For example if you are currently licensed to run version 4.3 and Digital's current version is 5.2 a single Update License will give you the right to run 5.2 or any earlier version. You would not need to buy individual Update Licenses for versions 4.4, 4.5, ... 5.0, or 5.1.

QUESTION:

Which releases constitute a new version?

ANSWER:

For the purposes of Update Licenses, only major and minor releases constitute new versions. For example, you would need to purchase an Update License to go from version 1.6 to 2.0 or from 2.1 to 2.2, but not when going from version 1.5 to 1.5-1 or 1.5A.

QUESTION:

Can I still run older versions?

ANSWER:

Yes. An Update License grants the right to run Digital's current version, or any prior version of the software.

QUESTION:

Will I be getting new PAKs for my Update Licenses?

ANSWER:

There are no plans at this time to issue new PAKs for Update Licenses. The PAK you got with your original license will still work.

QUESTION:

What do I order?

ANSWER:

It depends on what type of underlying license you have. Refer to the following table:

	Underlying License	Update License
Capacity Type	QL-*****-AA	QL-*****-RA
	QL-*****-AB	QL-*****-RB
	QL-***A9-J*	QL-***A9-S*
User Type	QL-*****-2*	QL-*****-4*
	QL-*****-3*	QL-*****-5*
	QL-*****-B*	QL-*****-Y*
	QL-*****-P*	QL-*****-Y*
	QL-*****-Q*	QL-*****-Y*
ADL/VMS	QL-*****-W*	QL-*****-X*

QUESTION:

Do I have to buy an Update License if I am upgrading to a larger system or license?

ANSWER:

You would only need to purchase an Update License if you are changing versions at the same time. If you are going to continue to run the same version, no Update License is required. You will, of course, need to upgrade your license(s) to the appropriate size for the new system.

QUESTIONS:

Must all the units of a ClusterWide license be updated at the same time?

ANSWER:

Yes. If you have a 600 unit ClusterWide license, you must buy the matching 600 unit Update License.

NOTE 1 - The price of the TK50 Magtape VMS Media and Documentation Kits is $4,474 for the extended kit and $1,604 for the base kit. The CDROM VMS Media and Documentation Kit is $3,623 for the extended kit and $1,212 for the base kit. The Desktop CDROM Kit is $666.

For TK50 Hkits, the Mandatory Update Media (MUP) is TK50. there is no stand-alone (S/A) backup media. For Magtape Hkits, except where noted, the MUP media is Magtape and TK50 is the associated S/A backup media. CDROM Hkits have no MUP or S/A backup media.

NOTE 2 - The Magtape Hkit may be ordered for this system if you are adding this CPU to a cluster that has a member with a Magtape drive - Please check your configuration before ordering.

NOTE 3 - Extended Documentation kit is not available with this system.

+ VMS license included with the system purchase.
Charges, as noted, for services are monthly charges.

NOTE 1 - The price of the TK50 Magtape VMS Media and Documentation Kits is $4,474 for the extended kit and $1,604 for the base kit. The CDROM VMS Media and Documentation Kit is $3,623 for the extended kit and $1,212 for the base kit. The Desktop CDROM Kit is $666.

For TK50 Hkits, the Mandatory Update Media (MUP) is TK50. there is no stand-alone (S/A) backup media. For Magtape Hkits, except where noted, the MUP media is Magtape and TK50 is the associated S/A backup media. CDROM Hkits have no MUP or S/A backup media.

NOTE 2 - The Magtape Hkit may be ordered for this system if you are adding this CPU to a cluster that has a member with a Magtape drive - Please check your configuration before ordering.

NOTE 3 - Extended Documentation kit is not available with this system.

+ VMS license included with the system purchase.
Charges, as noted, for services are monthly charges.

NOTE 1 - The price of the TK50 Magtape VMS Media and Documentation Kits is $4,474 for the extended kit and $1,604 for the base kit. The CDROM VMS Media and Documentation Kit is $3,623 for the extended kit and $1,212 for the base kit. The Desktop CDROM Kit is $666.

For TK50 Hkits, the Mandatory Update Media (MUP) is TK50. there is no stand-alone (S/A) backup media. For Magtape Hkits, except where noted, the MUP media is Magtape and TK50 is the associated S/A backup media. CDROM Hkits have no MUP or S/A backup media.

NOTE 2 - The Magtape Hkit may be ordered for this system if you are adding this CPU to a cluster that has a member with a Magtape drive - Please check your configuration before ordering.

NOTE 3 - Extended Documentation kit is not available with this system.

+ VMS license included with the system purchase.
Charges, as noted, for services are monthly charges.

NOTE 1 - The price of the TK50 Magtape VMS Media and Documentation Kits is $4,474 for the extended kit and $1,604 for the base kit. The CDROM VMS Media and Documentation Kit is $3,623 for the extended kit and $1,212 for the base kit. The Desktop CDROM Kit is $666.

For TK50 Hkits, the Mandatory Update Media (MUP) is TK50. there is no stand-alone (S/A) backup media. For Magtape Hkits, except where noted, the MUP media is Magtape and TK50 is the associated S/A backup media. CDROM Hkits have no MUP or S/A backup media.

NOTE 2 - The Magtape Hkit may be ordered for this system if you are adding this CPU to a cluster that has a member with a Magtape drive - Please check your configuration before ordering.

NOTE 3 - Extended Documentation kit is not available with this system.

+ VMS license included with the system purchase.
Charges, as noted, for services are monthly charges.

NOTE 1 - The price of the TK50 Magtape VMS Media and Documentation Kits is $4,474 for the extended kit and $1,604 for the base kit. The CDROM VMS Media and Documentation Kit is $3,623 for the extended kit and $1,212 for the base kit. The Desktop CDROM Kit is $666.

For TK50 Hkits, the Mandatory Update Media (MUP) is TK50. there is no stand-alone (S/A) backup media. For Magtape Hkits, except where noted, the MUP media is Magtape and TK50 is the associated S/A backup media. CDROM Hkits have no MUP or S/A backup media.

NOTE 2 - The Magtape Hkit may be ordered for this system if you are adding this CPU to a cluster that has a member with a Magtape drive - Please check your configuration before ordering.

NOTE 3 - Extended Documentation kit is not available with this system.

+ VMS license included with the system purchase.
Charges, as noted, for services are monthly charges.

7. DIGITAL SERVICES CS

The column headers used in the system maintenance price list pages are as follows:

BMC (Basic Monthly Charge)

This column lists the 9-hour (8AM - 5PM), 5-day (Monday through Friday), priority response, monthly hardware on-site maintenance charges for Basic Hardware Service coverage.

DSMC (DECservice Monthly Charge)

This column lists the 9-hour (8AM - 5PM), 5-day (Monday through Friday), 2-4 hour response, monthly hardware charges for on-site DECservice Hardware coverage.

CMC (Carry-in Monthly Charge)

This column lists the 9-hour (8AM - 5PM), 5-day (Monday through Friday), monthly hardware maintenance charges for off-site service repairs delivered to a Digital ServiCenter.

BSS (Basic System Service)

This column lists the 9-hour (8AM - 5PM), 5-day (Monday through Friday), priority response, monthly hardware on-site maintenance charges for Basic Hardware Service coverage and software telephone support 24-hours per day, 7 days per week, 365 days a year, Digital Software Information Network, critical on-site service for software, and right-to-use of new versions of operating system, VAXcluster, DECnet and workstation software.

DS9 (DECsystem Support 9 X 5)

This column lists the 9-hour (8AM - 5PM), 5-day (Monday through Friday), 2 or 4 hour response, monthly hardware on-site maintenance charges for DECservice and includes software telephone support 24-hour per day, 7 day per week, 365 days a year, Digital Software Information Network, critical on-site service for software, and right-to-use of new versions of operating system, VAXcluster, DECnet and workstation software.

DSS (DECsystem Support 24 X 7)

This column lists the 24-hour, 7-day per week, 2 or 4-hour response,monthly on-site hardware maintenance for DECservice and includes software telephone support 24-hours per day, 7 days per week, 365 days a year, Digital Software Information Network, critical on-site service for software, and right-to-use of new versions of operating system, VAXcluster, DECnet and workstation software.

BNS (Basic Node Service)

This column list the 9-hour (8AM - 5PM), 5-day (Monday through Friday), priority response, monthly hardware on-site maintenance charges for Basic Hardware Service coverage and right-to-use new versions of software for the operating system, DECnet, VAXcluster and workstation software.

DN9 (DECservice Node Service 9 X 5)

This column lists the 9-hour (8AM - 5PM), 5-day (Monday through Friday), 2 or 4-hour response, monthly hardware on-site maintenance charges for DECservice Hardware Service coverage and includes right-to-use new versions of software for the operating system, DECnet, VAXcluster and workstation software.

DNS (DECservice Node Service 24 X 7)

This column lists the 24-hour, 7-day, 2 or 4-hour response, monthly hardware maintenance charges for on-site DECservice hardware coverage and includes right-to-use new versions of software for the operating system, DECnet VAXcluster, and workstation software.

INST CHG (Installation Charge)

This column lists pricing information for performing system installation, add-on installation of additional equipment to already installed systems, and installation of terminals, personal computers, Network Interconnect products, and micro computer systems. Zone charges should be added for customers beyond 100 miles of service office (see Zone Charges).

SYSTEM SUPPORT SERVICES

This section contains the following information:

- System Support Services
- Quoting Information and Guidelines
- Quoting Examples
- Traditional Services for PDP-11 Systems
- Service Discount Eligibility
- DECServers and Network Interconnect Pricing
- Software Maintenance Prices

System Support Services provide comprehensive hardware and software maintenance services for VAX systems and RISC DECsystems. System Support Services are available in two levels of support: Full Support and Node Service.

FULL SUPPORT	NODE SERVICE
DECsystem Support (DSS)	DECservice Node Service (DNS)
Basic System Support (BSS)	Basic Node Service (BNS)
Software Support Service (SSS)	Software Node Service (SNS)

Full Support provides hardware and/or software remedial support, telephone advisory support and the right to use new versions of software. Full Support ensures that customers have direct access to Digital's Customer Support Centers.

Node Service provides remedial hardware support and the right to use new versions of software. Node Service is designed for customers whose inhouse staff provides primary support to their users. It is available for both clustered and non-clustered systems.

When Node Service is purchased in conjunction with Full Support, telephone support is extended through the three assigned contacts on the Full Support System to include support of the systems covered by Node Service. Full Support (DSS, BSS, SSS) must be on the largest system as defined by CPU power rating and all systems must be on the same service agreement. For customers who require absolutely no telephone support, Node Service may be purchased without Full Support coverage on at least one system.

In order to provide consistent service offerings for CPUs as well as other system devices, Full Support and Node Service are now available for DECserver 100, 200, 300, and 500 products, and Network Interconnect products, including Routers, Portals, and Gateways. Pricing for these services can be found in the Customer Services Section under systems pricing. Note: The SNA Gateway Management Software residing on a host system will continue to be serviced via Layered Product Support.

LAYERED PRODUCT SUPPORT (LPS)

- Layered Product Support (LPS).
- Layered Product Support/Personal License (LPS/Personal).
- Layered Product Support/Concurrent License (LPS/Concurrent).

Layered Product Support provides the right-to-use new versions of a layered software product. It also extends the level of support provided on the operating system to include coverage of the layered software product. Layered Product Support is required for each Digital layered software product running on a system covered by Full Support or Node Service.

The Layered Product Support service type purchased MUST correspond to the License type purchased for each software product.

Layered Product Supportservice prices are listed in the Software Section of the U.S. Systems Price List. Additional prices can be found in the U.S. Software Price Book.

INTEGRATED SYSTEM SUPPORT SERVICES

Features	FULL SUPPORT		NODE SERVICE	
	DECsystem Support (DSS)[1]	Basic System Support (BSS)	DECservice Node Service (DNS)[1]	Basic Node Service (BNS)
Telephone support from Customer Support Center 7 days a week, 24 hours a day	•	•		
Digital Software Information Network, on-line database	•	•		
DSN link	•	•		
Right-to-use new versions of kernel software	•	•	•	•
Centralized service capability	•	•	•	•
On-site Hardware service coverage Monday-Friday, 8 am to 5 pm	•	•	•	•
Extended hours of on-site hardware service coverage available up to 24 hours a day, 7 days a week	•		•	
Committed hardware service response time	•		•	
Continuous effort hardware service	•		•	
Parts and labor	•	•	•	•
Preventive Maintenance, if applicable	•	•	•	•
Field Change Orders	•	•	•	•
Requirement				
Layered Product Support (LPS)[2] -Provides right-to-use new versions of layered software products -Extends operating system to layered product	•	•	•	•

[1] DECsystem Support (DSS) and DECservice Node Service (DNS) include on-site hardware service coverage 7 days x 24 hours. DECsystem Support (DS9) and DECservice Node Service (DN9) include on-site hardware service coverage Monday through Friday 8 A.M. to 5 P.M.

[2] Layered Product Support, Layered Product Support/Personal License and Layered Product Support/Concurrent License.

Software Maintenance Services

The following software services are available to customers who require separate software and hardware maintenance services.

Features	Software Support Service (SSS)	Software Node Service (SNS)
Telephone support from Customer Support Center 7 days a week, 24 hours a day	•	
Digital Software Information Network, on-line database	•	
DSN link	•	
Right-to-use new versions of kernel software	•	•
Critical on-site support	•	
Requirement		
Layered Product Support (LPS) -Provides right-to-use new versions of layered software product -Extends operating system support to layered product	•	•

Added Value Service Options

(Available to supplement services)

Services Options may be added to your System Support Services to help customize CPU services to meet your customers' needs.

PREREQUISITE SERVICE	DECsystem Support (DSS)[1]	Basic System Support (BSS)	DECservice Node Service (DNS)[1]	Basic Node Service (BNS)	Software Support Service (SSS)	Software Node Service (SNS)
Media and Documentation Distribution Service (MDDS)	•	•	•	•	•	•
Documentation Update Service	•	•	•	•	•	•
Software System Management Service (SSMS)	•	•			•	
Software Update Installation (SUIS)	•	•			•	
Additional Customer Support Center Contact	•	•			•	

[1] DECsystem Support (DSS) and DECservice Node Service (DNS) include on-site hardware service coverage 7 days x 24 hours. DECsystem Support (DS9) and DECservice Node Service (DN9) include on-site hardware service coverage Monday through Friday 8 A.M. to 5 P.M.

SERVICE OPTION - DESCRIPTIONS

Media and Documentation Distribution Service (MDDS) is a per-product service and provides one set of media containing software updates in binary format plus one set of documentation updates shipped to the customer each time a new-version of the covered product is released by Digital.

Software System Management Service (SSMS) provides the customer with an enhanced level of support via a specialized team at Digital's Customer Support Center. This team conducts periodical proactive software reviews, conducts software performance analysis and acts as a focal point for critical problem resolution. This service is available on a per CPU basis for VAX system, VAXclusters and ULTRIX system.

Software Update Installation Service (SUIS) provides installation of updates for the operating system software and the Digital supported layered software products licensed on the system and will assist customers in major version update planning.

Documentation Update Service is a per-product service and provides one additional copy of documentation updates shipped to the customer each time a new version of the covered product is released by Digital.

Additional Customer Support Center Contact enables the customer to designate one additional authorized contact for telephone support.

Hardware Maintenance Services

Standard on-site hardware service, DECservice and Basic Service, are available for customers who need separate hardware and software agreements.

Features	DECservice for Hardware (DSMC)	Basic Service for Hardware (BMC)
Committed response time	•	
Continuous effort	•	
On-site service coverage Monday - Friday, 8 AM to 5 PM	•	•
Extended hours of on-site hardware coverage available up to 24 hours, 7 days a week	•	
Centralized service capability	•	•
Parts and labor	•	•
Preventive Maintenance, if applicable	•	•
Field Change Orders	•	•

QUOTING INFORMATION AND GUIDELINES

- **CPU AND KERNEL SOFTWARE SERVICE**

  The prices for the Integrated System Support Services and hardware only services are in the Systems Maintenance section and are based on the system model number. Prices and part numbers for software only service are built by using the appropriate operating system UPI and the appropriate software layered product UPI's. These operating system part numbers and prices are in the Software Maintenance section.

- **LAYERED PRODUCT SUPPORT (LPS)**

  Layered Product Support MUST be quoted according to the license type purchased for a software product. Personal User licensed software products must be supported by LPS/Personal, Concurret User licensed software products must be supported by LPS/Concurrent, and Systems, or Capacity, licensed software products (i.e., Traditional or Clusterwide) must be supported by the standard Layered Product Support.

  Standard Layered Product Support for System, or Capacity, licensed software products, is quoted in units ranging from 10 to 9000 based on the power rating of the system each layered product is running on. Power rating applies to clustered and non-clustered systems.

QUOTING INFORMATION AND GUIDELINES (cont'd)

To quote LPS for multiple systems on the same agreement running the same system, or Capacity, licensed software product, the power ratings should be added and rounded up to the next tier. The tiers, prices and model numbers are listed in the Clusterwide License section of the U.S. Systems Price List and U.S. Software Price List.

Note, there are about 25 products that are not sold on the power rating basis and must be sold Layered Product Support per each processor. Refer to the U.S. Software Price List for product specific information.

When you need more than 9000 units of Layered Product Support, increments of 5000 units can be added to build to a higher unit rating.

Example:	Customer requires 12,000 units of VMS FORTRAN
Quote:	QT-100A9-LV FORTRAN 9000 Units QT-100A9-L8 FORTRAN Additional 5000 Units

Layered Product Support/Personal and Layered Product Support/Concurrent are quoted in single units to equal the total number of users licensed for a software layered product. The service is quoted based on a single service part number utilizing the quantity field in SMART to designate the total number of users.

Example:	Customer requires support for 100 Personal Use Licenses for FORTRAN
Quote:	Quantity 100 QT-100AA-MB

- MEDIA AND DOCUMENTATION DISTRIBUTION SERVICE

MDDS is quoted per product based on the Unique Product Identifier (UPI) and media type. MDDS part numbers and prices for layered software are listed in the U.S. Systems Price List Software License Section. Consult the chart below for operating system MDDS. Add media type indicator to last position: 5,M.

VMS MDDS/ Full VMS Documentation	QT-001A*-E_	$264/mo
VMS MDDS/ Base VMS Documentation	QT-09SA*-E_	$126/mo
DESKTOP-VMS MDDS	QT-VV8AA-E8	$ 95/mo
ULTRIX-32 MDDS	QT-VEYA*-E_	$210/mo
ULTRIX RISC MDDS	QT-VYVAA-E_	$210/mo
ULTRIX Workstation MDDS	QT-OJQAA-E_	$105/mo
ULTRIX Workstation (RISC) MDDS	QT-VV1AA-E_	$105/mo
ULTRIX Workstattion (VS3100) MDDS	QT-VVTAA-E_	$105/mo

Replace (*) with CPU designator, refer to Processor Type Table.

QUOTING INFORMATION AND GUIDELINES (cont'd)

- CDROM MEDIA AND DOCUMENTATION DISTRIBUTION

VMS CONDUIT SERVICE

As an alternative to traditional software binaries, software binary updates are available on CDROM disc. The VMS Consolidated Distribution Service (CONDIST Service) currently includes binaries for VMS and approximately two hundred layered products. The discs are distributed once every two months. Customers access those layered products for which they are licensed by using the appropriate PAK (Product Authorization Key) or SUP (Service Update PAK). Note: This service does not include documentation updates.

Customers who require hardcopy updates to their documentation should purchase Documentation Update Service for VMS and each layered software product. If customers require both traditional media types and documentation, they should purchase Media and Documentation Distribution Service.

(For a list of layered software binaries currently available on the CDROM disc, consult AQS or $VTX ESSB and reference CDROM section. This information will also be published every two months in Sales Update.)

VMS CONDIST SERVICE	**QT-VWJ8A-C8**	**$125/per month**

VMS Online Documentation Library Subscription Service is also available on CDROM and currently includes documentation for VMS and many layered products.

Customers who require documentation for products not yet on the disc will need to order Documentation Update Service to supplement the Online Documentation.

(For a list of documentation for VMS available on the CDROM Disc, consult AQS or $VTX ESSB and reference the CDROM section.)

VMS Online Documentation Library Subscription Service	**QT-VYR8A-C8**	**$125/per month**

ULTRIX

As an alternative to traditional software binaries, software binary updates are available on CDROM disc. The ULTRIX Consolidated Distribution Service (CONDIST Service) currently includes binaries for ULTRIX and most ULTRIX layered products for both RISC and VAX. The discs are distributed once every two months. Customers access those products for which they are lic;ensed by using the appropriate PAK (PRODUCT AUTHORIZATION KEY).

Note, this service does not include documentation updates. Customers who require hardcopy updates to their documentation should purchase Documentation Update Service for ULTRIX for each layered product.

If customers require both traditional media types and hardcopy documentation, they should purchase Media and Documentation Service.

For a list of layered software binaries available on the CDROM disc, consult the appropriate article published in Sales Update every two months or type $VTX ESSB and reference the CDROM section.

ULTRIX Condist Service	**QT-XLU8A-C8**	**$125/per month**

ULTRIX Online Documentation Library Subscription Service is also available on CDROM and currently includes documentation for ULTRIX and many layered products.

Customers who require documentation for products not yet on the disc will need to order Documentation Update Service per product to supplement the Online Documentation. For a list of documentation available on the CDROM Disc, type $VTX ESSB and reference the CDROM section.

ULTRIX Online Documentation Library Subscription Service	**QT-GEW8A-C8**	**$125/per month**

QUOTING INFORMATION AND GUIDELINES (cont'd)

- ADDED VALUE SERVICES Model numbers and prices for Software System Management Service and Software Update Installation Service are listed in the Software Maintenance pages. These services are available for VMS standalone systems, VAXclusters and ULTRIX systems.

  Documentation Update Service

  Documentation Update Service provides an additional set of hardcopy documentation to software manuals via automatic distribution. Prerequisite is the right-to-use the software product, either through System Support or Layered Product Support. Available on a per product basis for VMS, ULTRIX, and layered products.

VMS Extended Documentation	QT-001AA-KZ	$ 98 per month
VMS Base Documentation	QT-09SAA-KZ	$ 45 per month
ULTRIX	QT-upiAA-KZ	price per product
Layered Products	QT-upiAA-KZ	price per product

Additional Customer Support Center Contacts

Additional Customer Support Center contacts allow the customer to register additional members of their staff as contacts for telephone support through the Customer Support Centers. This service supplements the three Customer Support Center contacts included with System Support. This service is ordered by operating system and includes all layered products running on the system. Prerequisite is full telephone support provided with DECsystem Support, Basic System Support, or Software Support Service.

VMS	QT-001A9-6Z	$200 per month
ULTRIX	QT-upiA9-6Z	$200 per month

QUOTING EXAMPLES:

INTEGRATED SERVICE ON STANDALONE SYSTEM - EXAMPLE

A VAX 6210 (model# 62AMB-AE) was purchased at List Price. This customer wants to purchase a service agreement. The system was purchased with VMS, DECnet and FORTRAN. This customer needs software updates for each product.
Solution:

Model Number	Description	Price
62AMB-AE	DECsystem Support 24 X 7	$844/mo
QT-100A9-LG	FORTRAN LPS 300 units	$ 32/mo
QT-001AA-E5	VMS Extended MDDS	$264/mo
QT-100AA-E5	FORTRAN MDDS	$ 26/mo
	Total	$1167/mo

SOFTWARE ONLY SERVICE FOR MULTIPLE SYSTEMS - EXAMPLE

The customer has a central help desk to support their end users. The system manager and staff maintain the entire configuration and are the only employees who need to call Digital's Customer Support Center. They would like to keep the hardware maintenance separate from the software maintenance. They are running multiple layered products and need one copy of media and documentation updates for each product.

TRADITIONAL SOFTWARE PRODUCT SERVICES FOR PDP-11 SYSTEMS

DECsupport SERVICE FOR SOFTWARE AGREEMENT

The DECsupport Service for Software is the most comprehensive level of service. The features of this agreement are:

- On-site Assistance
  - — Preventive Maintenance. The periodic installation of updates and Program Change Orders which in DIGITAL's opinion are required to ensure proper system operation.
  - — On-site Remedial Support
- Telephone Assistance
- Technical Information
  - — A Periodic Newsletter as available
  - — Program Change Orders
  - — Software Performance Reporting
  - — Access to Digital Software Information Network (DSIN)
- Product Improvements
  - — Software and Documentation Updates

The monthly charges for DECsupport Service for software agreement coverage are listed under the "DPMC" column in the U.S. Systems Price List.

BASIC SERVICE FOR SOFTWARE AGREEMENT

Basic Service for Software provides the following features:

* Telephone Assistance
* Technical Information
  - — A Periodic Newsletter as available
  - — Program Change Orders
  - — Software Performance Reporting
  - — Access to Digital Software Information Network (DSIN)
* Product Improvements
  - — Software and Documentation Updates

The monthly charges for Basic Service for Software coverage are listed under the "BSMC" column in the U.S. Systems Price List.

SELF-MAINTENANCE SERVICE FOR SOFTWARE AGREEMENT

The features of this Agreement are:

* Technical Information
  - — A Periodic Newsletter as available
  - — Program Change Orders
  - — Software Performance Reporting
* Product Improvements
  - — Software and Documentation Updates

The monthly charges for Self-Maintenance Service for Software Agreement coverage are listed under the "SMMC" column in the U.S. Systems Price List.

TRADITIONAL SOFTWARE PRODUCT SERVICES FOR PDP-11 SYSTEMS (cont'd)

SERVICE DESCRIPTIONS

For information on the service features of Customer Services offerings, please refer to the following service descriptions:

WARRANTY

	COUNT TOWARD DBA AGGREGATION	ELIGIBLE FOR DBA DISCOUNT
List Warranty	YES	YES
Standard Warranty	YES	YES
Extended Warranty++	YES	YES
Uplifts to Warranty++	YES	YES
Spares	YES	YES

* Including applicable uplifts or zone charges.

** Only those customers with a sufficient unit volume of high volume products at the customer's site as defined in the schedule.

*** Applies to eligible Resellers only and may not be offered in addition to any other discounts except for the prepayment discount.

++ If purchased at the time of sale.

+++ Resellers must be certified to sell Restart.

Only for Category "A" and "B" products.

Applies to Category "A" and "B" products; does not include any subcontracted service.

Customers must choose either the Gold Key discount or the SRTC (or Media Updates) discount, but both discounts may not be applied.

DECservers and Network Interconnect Software Maintenance Prices

PRODUCT	Software Support Service (SSS)	Monthly Price	Software Node Service (SNS)	Monthly Price

EXTENDED HOURS OF COVERAGE

DECservice, DECsystem Support Service and DECservice Node Service hardware hours of coverage may be uplifted to 12, 16, or 24 hours, Saturday and/or Sunday.

To calculate 12, 16, or 24-hour prices for 5, 6 or 7 day coverage, total the system's DECservice Monthly Charge using the maintenance prices listed in the DSMC column and uplift as follows:

Hours of Coverage	Monday through Friday	+ Sat. OR Sun.	+ Sat. AND Sun.
9 Hours	1.0 X DSMC	.08 X DSMC	.16 X DSMC
12 Hours	1.04 X DSMC	.10 X DSMC	.19 X DSMC
16 Hours	1.08 X DSMC	.11 X DSMC	.22 X DSMC
24 Hours	1.16 X DSMC	.14 X DSMC	.27 X DSMC

*DSMC refers to the applicable DECservice Monthly Charge for the kernel hardware system.
For any combination of the above, add the individual charges together. For example, 12 hour coverage Monday through Sunday, the charge would be (.04 x DSMC + .19 x DSMC) or .23 x DSMC.

HOLIDAY COVERAGE

Digital service agreements (except for 7-day on-site contract coverage) exclude coverage for locally observed Digital holidays. Additional charges apply for customers requesting holiday coverage.

SPECIFIC HOLIDAY COVERAGE

For contract customers who require holiday coverage for specific holidays, the charge is 10% of the total monthly charge or 50 U.S. dollars, or the equivalent in local currency, whichever is greater, for each specific holiday. (Hours of coverage on specific holidays are the same as provided under the service agreement). This is a one-time charge billed separately through the Labor Activity Reporting System (LARS).

Per Call customers cannot contract for holiday coverage and response will remain on a best-efforts basis.

RESPONSE TIME UPLIFTS

The Critical Response Time for hardware under a DECservice, DECsystem Support Services, or DECservice Node Service contract may be increased for a specified uplift percentage.

This standard percentage can be used to uplift those products which currently have a four (4) hour response time and are within a 50 mile radius of a Designated Digital Office from a four (4) hour response time to a two (2) hour response time.

To calculate this uplift, first determine the system's Total Monthly Charge (TMC) by adding all DSMC prices with all applicable extended coverage hours uplifts. Then uplift the system's Total Monthly Charge (TMC) as follows:

Road Miles from Designated Digital Office	VAXft 3000, VAX 6xxx, 85xxx and above Response Time	All Other	Uplift to TMC
0 - 50	2 hours	4 hours	10%
51 - 100	4 hours	4 hours	*
101 - 200	8 hours	8 hours	*
201 and beyond	16 hours	16 hours	*

* Not available as a standard percentage

INSTALLATION

INSTALLATION

The "INST CHG" column in the Price List gives the FIXED-PRICE charges (including travel charges) for performing EITHER a new system installation or an add-on installation of equipment to an existing (already installed) system.

Unless otherwise indicated (i.e., products in the High Performance Systems Product category in the System Support warranty matrix), the fixed-price installation charge includes hardware installation only.

The fixed-price installation charges for NEW SYSTEMS includes the installation of hardware options that are purchased for use with that system and will be installed at the same time, on the same site, during the same installation event. A CPU Upgrade does not qualify as a "new system" and the no-charge installation of additional hardware options does not apply.

For the purpose of defining eligibility for no-charge installation of options as part of a system installation, "hardware options" are found in the "OPTIONS" section of the U.S. Systems Price List. Excluded are Network Interconnect Products, Video Terminals and Printers (refer to the DECserver, Network Comm Device and Desktop (Terminals/PC) Product categories in the System Support Warranty matrix). A terminal that is intended for use as the System Console Terminal will be installed as part of the system installation.

A "site" is defined as a building or adjacent buildings as determined by Digital. "Same time" is defined as a single installation event, during which a customer's entire order is installed.

Installations are generally performed during normal business hours (Monday thru Friday, 8:00 A.M. to 5:00 P.M.). Customers who require an installation outside of normal business hours can make arrangements with the local Digital office. Unless otherwise noted, a premium charge will be added to the fixed-price installations performed outside of normal business hours.

The fixed-price installation charge should be utilized for both new system and/or add-on installations whenever possible. However, unless otherwise specified (refer to Mainframe Per Call Charges), Per Call Installations can be provided as an alternative, based on customer request. Customers requesting Per Call Installations will be charged on a time-and-materials basis for all labor hours and parts utilized to complete the installation. Under no circumstances should a "multiple of BMC" be utilized to calculate either a new system or an add-on installation charge.

DE-INSTALLATION "AND/OR" RE-INSTALLATION

FIXED-PRICE DE-INSTALLATION

Fixed-Price De-Installation is a Digital service offering that provides all parts and labor required for the de-installation of a defined system configuration or stand-alone option. To be eligible for a Fixed-Price De-Installation, the system or option must be supported by either a Digital On-Site Warranty or a Digital Hardware Service Agreement.

The determination of Fixed-Price charges for De-Installation of either a defined system configuration or a stand-alone option is accomplished via one of two methods:

1. For all systems and options that are currently available for sale from Digital, the price of De-Installation will be equal to 50% of the current published Fixed-Price System Installation or Add-On Installation charge, or a minimum of $200.
2. For all systems and options that are NOT currently availabe for sale from Digital, the price of De-Installation will be equal to two times the Basic Monthly Charge (2 X BMC), or a minimum of $200.

DE-INSTALLATION "AND/OR" RE-INSTALLATION (cont'd)

FIXED-PRICE RE-INSTALLATION

Fixed Price Re-Installation is a Digital service offering that provides all parts and labor required for the re-installation of a defined system configuration or stand-alone option. To be eligible for a Fixed-Price Re-Installation, the system or option must be accompanied by a valid Certificate of Maintainability.

The determination of Fixed-Price charges for Re-Installation of either a defined system configuration or a stand-alone option is accomplished via one of two methods:

1. For all systems and options that are currently available for sales from Digital, the price of Re-Installation will be equal to the current published Fixed-Price System Installation or ADD-On Installation charge, or a minimum of $200.
2. For all systems and options that are NOT currently available for sale from Digital, the price of DE-Installation will be equal to two times the Basic Monthly Charge (2 x BMC), or a minimum of $200.

Operability of the system or option is guaranteed with the purchase of Fixed-Price Re-Installation, providing the following conditions are met:

1. There is a valid Certificate of Maintainability, (i.e., the 90-day grace period has not lapsed and the perforated stickers and the non-static ties are intact.
2. Digital provides the labor.
3. There is no evidence of either visible or concealed damage that has resulted from the transportation of the equipment.

FIXED-PRICE DE- AND RE-INSTALLATION

Fixed-Price De- AND Re-Installation is a Digital service offering that provides all parts and labor for the de-installation and the re-installation of a defined system configuration or stand-alone option. To be elibible for a Fixed-Price De- AND Re-Installation, the hardware (system or option) must be supported by either Digital on-site warranty or a Digital Hardware Service Agreement.

The determination of Fixed-Price charges for De- AND Re-Installation of either a defined system configuration or a stand-alone option is accomplished via one of two methods:

1. For all systems and options that are currently available for sale from Digital, the price of DE- AND Re-Installation will be equal to the current published Fixed-Price System Installation or Add-On Installation charge times 1.25 (125%), or a minimum of $350.
2. For all systems and options that are NOT currently available for sale from Digital, the price of De- AND Re-Installation will be equal to three times the Basic Monthly Charge (3 X BMC), or a minimum of $350.

This service, and its associated pricing, is only available to the contract/ warranty customer who is retaining ownership of the equipment throughout the De-Install AND Re-Install processes. The Fixed-Price De- AND Re-Installation is designed to meet the needs of contract customers who need to relocate their equipment from one location to another.

The Fixed-Price De- AND Re-Installation service must be ordered on a single purchase order that is acceptable to Digital. No portion of that service (i.e., Re-Installation of the equipment) is transferable to a third party.

Each of these services can also be purchased on a time-and-materials basis. It should be noted, however, that the purchaser will be charged for the total labor hours utilized and all of the parts that were consumed to successfully complete the de-installation and/or re-installation.

For the purpose of defining eligibility for a no-charge de-installation and/or re-installation of options as part of a System De- AND/OR Re-installation, refer to the INSTALLATION section of this price book. The applicable business rule for New System Installations should be applied consistently to De- AND/OR Re-installation activities. (NOTE: When the "multiple-of-BMC" pricing methodology is utilized, the BMC's of EACH system component are added to determine the Fixed-Price charge).

DECELIGIBLE - PRODUCT CERTIFICATION

The DECeligible Service is a fixed-price offering that provides an efficient, standardized process for determining the contract eligibility of previously- owned equipment that is not currently covered by Digital On-Site Warranty or a Digital Hardware Service Agreement.

DECeligible Service provides a consistent process that will meet the business needs of non-contract/non-warranty end-users who relocate Digital Hardware to a new site; and also addresses the unique requirements of selling used/previously-owned Digital hardware to a new end-user.

The successful completion of the DECeligible process will result in the issuance of a Certification of Maintainability, which identifies the equipment as eligible for a Digital Hardware Service Agreement. The Certificate is valid for ninety days following the date of issue.

The Fixed-Price charges for the DECeligible service are determined on the basis of the following pricing matrix.

System Product Tiers	First System Pricing	Additional System Charges	External Options > 4 Certified w/ the System	First Stand-alone Option	Additional Stand-alone Options
I.	$ 300.00	$182.00	$19.00	$150.00	$19.00
II.	$ 600.00	$454.00	$50.00	$200.00	$50.00
III.	$ 700.00	$554.00	$50.00	$200.00	$50.00
IV.	$1000.00	$854.00	$50.00	$200.00	$50.00

Tier I System Products

VAXstations, DECstations, MV2000's, MV3100's, DECsystem 5100, DECsystem 5000/200

Tier II System Products

MicroPDP's, MVII's, MV3300/3400, MV3500/3600, MV3800/3900, VAX4xxx's, other PDP's, VAX11/7xx, VAX8200/8300, DECsystem 3100, DECsystem 54/55/58xx

Tier III System Products

VAX6xxx's, VAX85xx's, VAX86xx's, VAX87xx's, VAX88xx's, VAXft3000, DECsystem 5800

Tier IV System Products

VAX9xxx's, VAX8874, VAX8878

ZONE CHARGES

Zone charges can apply to all on-site hardware services.

Miles From Service Center	Uplift to TMC	Min. Uplift/Mth. to TMC
Zone A 101-200 Miles	10%	$25
Zone B 201-Up	15%	$50

Provisions:

1. Applies to all Basic Service and Basic System Support Service agreements. Zone uplifts also apply to DECservice and DECsystem Support Service agreements less than $300/month.
2. The Zone charge uplift is applied to the Total Monthly Charge (TMC). The total monthly charge is the sum of the BMC or BSS, DSMC or DSS plus any extended hour coverage uplifts. Use the U.S. DECservice Atlas to determine the zones.

ZONE CHARGES FOR FIXED PRICE ADD-ON INSTALLATION AND DE/RE-INSTALLATION

The following zone charges should be added to the published fixed prices for Customer Services Add-On Installation and De/Re-Installation.

Distance from Service Office	Round-Trip Charge
0-100 Miles	No Additional Charge
101-200 Miles	$150 per site, per trip
Over 200 Miles	$250 per site, per trip

PER CALL CHARGES

	Monday Through Friday 8:00 AM - 5:00 P.M.	All Other Times Including DEC Holidays
MINIMUM CHARGE	2 Hours	4 Hours
MAINFRAME PER CALL		
VAX 9xxx*	$275/Hour	$275/Hour
HARDWARE PER CALL		
Desktop Products, Terminals, LA/LN03 Printers	$120/Hour	$120/Hour
VAX Systems**, PDP-11's, Workstations***, and All other Products	$200/Hour	$200/Hour
SOFTWARE PER CALL**	$200/Hour	$200/Hour

* Per Call Installation is not available for VAX 9000.

** A $1000 per event fee will be charged on all VAX 11/7xx, VAX 6000, 8000 and 9000 series processors (system building blocks/CPU cabinets/Unibus expansion cabinets) not covered under a Digital hardware service agreement. This fee is for remedial maintenance service and is in addition to all labor, parts and travel expenses.

*** The DECstation 3100/2100 and VAXstation 3100 Per Call charge is $120/hour.

**** Software Per Call rate applies to all products.

Per Call Service is charged on a time-and-materials basis, with all labor, parts and travel expenses rated separately. There is a MINIMUM Per Call labor charge of two (2) hours Monday through Friday, 8:00 AM to 5:00 PM, and four (4) hours all other times, inclusive of travel time from the Digital servicing location to the customer site. Travel charges are limited to commercial travel expenses incurred during the performance of service.

ON-SITE PER CALL PARTS EXCHANGE

EXCHANGEABLE PARTS QUALIFICATION

A part is considered to be exchangeable/repairable when the following criteria are met:

1. The part being replaced is:

DIGITAL Manufactured	VENDOR Supplied
Modules	Modules
Sub-assemblies	Sub-assemblies
Power Supplies	

2. The failed part is physically repairable. A part is considered repairable (exchangeable), even if the item is not on the Logistics Authorized Return List (ARL), if it has not been damaged in any way.

All other parts should be replaced at List Price (MLP). The Customer may keep the part.

Per Call Parts Pricing

Contact the CSC Library, 1-800-525-7104 for Per Call parts pricing information.

DIGITAL CUSTOMIZED SUPPORT SERVICES

Digital Customized Support Services (DCSS) are a series of high-level consulting, management, and operational services designed to meet both government and commercial needs.
Digital Customized Support Services (DCSS) are a series of off-site and on-site managerial, administrative, and engineering services sold in support of major long-term programs.

PRICING INFORMATION AND DESCRIPTIONS

RESOURCE DESCRIPTION	PART NUMBER	HOURLY	MONTHLY 6-12 MO.	MONTHLY 12+ MO.

DCSS SERVICE & RESOURCE DESCRIPTIONS

A. PROJECT COORDINATION

Project Coordination service provides the customer with a focal point for contractually required reports, contract administration coordination, specific resource coordination, and problem referral to the appropriate response function.

B. PROJECT SERVICES MANAGEMENT

A Project Services Manager provides management to medium-to-large projects, involving a mixture of standard and non-standard hardware and software, multiple sites (some with dissimilar configurations), may involve some special applications for implementation.

C. SITE SERVICES MANAGEMENT

A Site Manager provides management services to: 1) large sites, 2) multiple small-to-medium projects/programs, 3) projects/programs that involve large integration add-ons to existing systems, and 4) new small to medium-sized systems. These programs typically include few sites or multiple similar configurations at one site, standard hardware and software, and special applications to implement.

D. PROGRAM SERVICES MANAGEMENT

A Program Services Manager provides worldwide management services to single large or multiple small-to-medium complex programs that involve large or complex add-on integration to existing systems, or are new medium-to-large systems.

E. SYSTEM SERVICES MANAGEMENT

A System Services Manager provides management services to all types of programs worldwide, especially large complex systems, intricate integration of add-ons to existing systems, new large complex systems, and a variety of contract-specific special applications and interfaces. May manage vendor resources.

F. COORDINATOR ENGINEER

An engineer normally provides a variety of engineering-related services at a support engineering level by augmenting, supplementing, or directly supporting the customers technical staff.

G. SENIOR ENGINEER

A senior engineer normally provides a variety of engineering-related services at the environmental and support engineering level by augmenting, supplementing, or directly supporting the customers technical staff.

H. SYSTEMS ENGINEER

A systems engineer normally provides a variety of engineering-related services at the system, environmental, and support engineering level by augmenting, supplementing, or directly supporting the customer's technical staff. These engineering services are available on an as needed basis in the form of a consulting service. It can also be purchased in the form of a resident engineer.

I. APPLICATIONS ENGINEER

An applications engineer normally provides a variety of engineering-related services at the hardware applications, system, environmental, and support engineering level by augmenting, supplementing, or directly supporting the customer's technical staff. These engineering services are available on an as needed basis in the form of a consulting service. It can also be purchased in the form of a resident engineer.

J. PRINCIPAL ENGINEER

A Principal engineer provides total configuration engineering services in all current maintenance-related disciplines affecting a total networked configuration world-wide. This level of engineering can provide all engineering Levels 2-5 services. These engineering services are available on an as needed basis in the form of a consulting service. It can also be purchased in the form of a resident engineer.

K. CONSULTING ENGINEER

A consulting engineer's primary responsibility will be in the design stage of the program/project to insure hardware/software compatibility and connectivity in support of the customer's business requirements. Design system solutions that can meet customer requirements with DEC and non-DEC products, if required. This engineer will become knowledgeable on all of the customers hardware and software. Will act as the focal point for all resolutions to technical problems both DEC and non-DEC. Will work with vendors and DEC engineers to insure hardware and software can meet customer's requirement in support of a business solution. This engineering level provides licensed, certified, or formally credentiated consulting services. It can also be purchased in the form of a resident engineer.

DCSS SERVICE & RESOURCE DESCRIPTIONS (cont'd)

L. RELIABILITY AND MAINTAINABILITY PLANNING (RAMP)

Reliability and Maintainability Planning (RAMP) services are structured to provide the customer's ILS managers with effective reliability and maintainability analysis. RAMP services provide the resources required to collect, analyze, and maintain engineering and field maintenance reliability, maintainability, and supportability data, on Digital systems and products.

M. RAPID RESPONSE DEPLOYMENT TEAM (RRDT)

Rapid Response Deployment Team (RRDT) is intended to provide interim short-term, emergency, and contingency backup resources for self-maintenance and customer end-user maintenance organizations and activities. RRDT provides the services of Digital personnel who can be immediately deployed to provide fly-and-fix support services.

N. DEPOT SUPPORT SERVICES (DDS)

Depot Support Services include all operational depot support functions specific to a program or contract. The major Depot Service elements are:

1. Depot repair, activity tracking, reporting and analysis of statistical data.
2. Control of material flow to/from the site by revision, or other designator as required.
3. Inventory/distribution management and control of total programs.
4. Provision of program technical documentation, special marking, packaging, and handling to Government property control standards, including MIL-STD-129 and 130.

O. INTEGRATED LOGISTICS SUPPORT PLANNING (ILSP)

Integrated Logistics Support Planning (ILSP) service provides a disciplined management and planning approach for the activities necessary to provide a complete logistics plan for support of systems during the design, development, and deployment life-cycles. ILSP addresses the development and implementation of associated logistics management, training, testing, maintenance, and deployment support plans. ILSP services delivered to the customer are structured to be compatible with DoD 5000.39 standards.

P. SYSTEMS AND SPARES PROVISIONING (SSP)

Systems and Spares Provisioning (SSP) service provides the process for determining and acquiring the range of spares, repair parts, support, and test equipment required to operate and maintain a system, material system, or Configured Item (CI) for an initial or specified period of time. SSP services delivered to the Government will be structured to be compatible with MIL-STD-1388 and MIL-STD-1561; or Best Commercial Practices as specified.

Q. MIXED VENDOR EQUIPMENT LOGISTICS SUPPORT ANALYSIS (MVE/LSA)

Mixed Vendor Equipment/Logistics Support Analysis (MVE/LSA) services are designed to support non-Digital devices or peripherals installed and deployed to operational sites on Digital systems that are being maintained/supported under Digital maintenance contracts.

R. SECURE LOGISTICS MATERIAL CONTROL SYSTEM (SLMCS)

Secure Logistics Material Control System (SLMCS) provides a dedicated logistics support organization which applies systematic processes that identify logistics support planning actions, and provides the implementation of logistics support disciplines which are structured to meet the ILS functions and operational objectives of customer classified and special programs.

S. LOGISTICS SUPPORT ANALYSIS (LSA)

Logistics Support Analysis (LSA) provides the application of scientific and engineering efforts during the design, development, deployment, and operational phases to assist in complying with system or program Readiness and Supportability (R&S) objectives. LSA task structures, documentation, data, and format requirements will be developed to be compatible with MIL-STD-1388 specification and DoD 5000.39 requirements.

T. CONFIGURATION MANAGEMENT (CM)

Configuration Management (CM) services include policies, procedures, and disciplines necessary to identify functional and physical characteristics of a Configured Item (CI) during its life-cycle. CM services delivered to the customer are structured to be compatible with MIL-STD-480, MIL-STD-482, MIL-STD-483, applicable Configuration Control Board (CCB), or Best Commercial Practices as specified in individual contract work specifications.

DCSS SERVICE & RESOURCE DESCRIPTIONS (cont'd)

U. CONFIGURATION BASELINE CONTROL (CBC)

Configuration Baseline Control (CBC) services are designed to provide configuration control support to the customer's CCB. This support pertains to the processing, evaluation, and control of proposed or requested changes to system hardware, computer programs of allocated and product baseline configurations.

V. SECURE LOGISTICS SUPPORT CONCEPTS (SLSC)

Secure Logistics Support Concepts (SLSC) services address National Emergency logistics support planning contingencies, implementation policies, and acquisition procedures.

W. LIFE CYCLE COST ANALYSIS (LCCA)

Life Cycle Cost Analysis (LCCA) services are designed to provide a broad range of Life Cycle Cost (LCC) management, analysis, and cost estimating support functions to the customer system and program managers. These LCCA and LCC services will be developed in concert with Government DoD 5000.1, 5000.2, 5000.39, and 5000.40 standards and directives.

SERVICE OFFERINGS

SERVICE MANAGEMENT SUPPORT FM-PMS22-AA

Will assume for the customer, the responsibility of managing the required maintenance and support services of all Digital and multivendor equipment within the specified customer environment. Service Management Support will develop an optimum service delivery plan by utilizing standard and negotiated customized products delivered by Digital and other vendors.

Services Management provides continuity to the customer's Program Management Office (PMO) by managing the full spectrum of functions from a small, single location program to a large, complex, multi-location program. Services Management provides a single point of contact to the customer that can reside at the customer's facility or a Digital facility closest to the customer's PMO.

SERVICE ADMINSTRATIVE SUPPORT FM-PMS32-AA

This service offers the performance of administrative tasks for client service entities. These administrative tasks assist the client service organization to manage, measure, and understand the technical, business, and operational activities inherent in the service function. The Service Administrative Support feature will also provide the labor, processes, and application tools required to support the service buyer through technical, operations, and business administration support.

LOGISTICS SUPPORT SERVICES FM-PMS42-AA

Logistics Support Services (LSS) provides multivendor expertise and services to Digital customers. The areas of capability include service parts planning, distribution and custom staging and rollout capability.

Logistics Support Services provides technical consulting, management and operations of a client's logistics operation. The capability brings the best of Digital and external logistics expertise to solve a customer solution.

SERVICE PROJECT MANAGEMENT FM-PMS52-AA

Service Project Management provides a central focus for planning, design, implementation, and management of all EDP and non-EDP services as required by the customer. An experienced project manager will work with the customer and project team from the analysis phase all the way through implementation and on-going management as required.

STRATEGIC SERVICE CONSULTING FM-PMS62-AA

Strategic Service Consulting objectively addresses the operational and development needs of the customer's service organization. Operational audits and appraisals are done which provides the client with a clear understanding of the requirements, deficiencies, efficiencies, and the opportunities for improvements relating to the management of services. The areas of focus could, as required, include service delivery, service administration, or logistic type services.

SERVICE OFFERINGS (cont'd)

Resource Categories:

Administrative Support
Technical Support
Project Support
Program Management
Consulting

These above resources can be used in any of the service offerings and are not project limited. Prices for these resources have been established using three different rates which can be used to meet customer contract objectives. These rates are:

Daily (0-3 months)
Monthly (3-12 months)
Term (12+ months)

Due to the nature of these customized services, the Industry or Area DCSS Business Manager should be contacted for specific pricing of these resources and service offerings. US DCSS Managers will have the latest pricing information for all DCSS related activity.

VALUE-ADDED IMPLEMENTATION SERVICES FM-PMS72-AA

This service provides Senior Technical and Engineering resources to manage and implement complex customer solutions. The focus of the service is on the entire customer solution and can include, dedicated Senior Technical Project Management, Custom Staging of the entire solution, Custom Configuration Design Document, and rapid deployment of the entire solution. The services can be provided for any solution including the implementation of, Production Systems in a Mission Critical environment, mission critical Data Center moves involving Digital and Third Party equipment, and the deployment of Turnkey solutions.

This service may be used in support of other Digital and non-Digital integration Support Services

PRIME CONTRACTOR SERVICES FM-PMS73-AA

This represents equipment and/or Software integrated and re-sold by Digital for customized solutions.

NOTE

The service offerings and resources listed above are the only ones that will be recognized through the Administration Process being used to support the DCSS Business.

SELECT-A-CALL

SELECT-A-CALL: Provides on-site remedial maintenance for a customer with twenty or more terminals located at the same site, by combining multiple repairs per each terminal call. This special service product is designed to pass along Digital's savings from reduced travel. The plan features the following:

TERMINAL POPULATION	MINIMUM NO. OF TERMINALS DOWN	ZONE 1 (0-100 miles) MONTHLY CHARGE	ZONE 2 (100+ miles) MONTHLY CHARGE
20+	two (2)	BMC minus 17% (*)	Add $13 to zone 1 monthly charge
50+	three (3)	BMC minus 22% (*)	Add $8 to zone 1 monthly charge
100+	four (4)	BMC minus 29% (*)	Add $6 to zone 1 monthly charge

* Before proposing Select-A-Call, consult first with the local Digital Customer Services Unit Manager.

DECall

DECall Service is a contractual service offering that features on-site service with event driven pricing and payment for eligible video, printer and PC products. Customers pay a small monthly retainer for each terminal, PC system, or printer, and then pay a fixed charge for each service call performed. The predetermined fixed price charge for each unit serviced includes all parts and labor, no matter how complex (or simple) the repair.

DESKTOP SERVICES

• GENERAL

— PRICING ELIGIBILITY:

The DESKtop pricing for On-Site and Servicenter Service is based on two quantity levels of units:

1. A minimum of 100 personal computers, workstations, terminals, and must reside in a major metropolitan area as defined by Digital;
2. A minimum of 500 personal computers, workstations, and/or terminals.

— PER CALL CHARGE:

Per Call service for DESKtop products is provided @ $65 per hour, if customer has a DESKtop Hardware Maintenance Service Agreement.

— PRICING FOR DECSTATIONS:

For service of DECstations, please use the pricing in the white pages of the USCSPL

— PRICING FOR ITEMS THAT HAVE NO DESKtop PART NUMBER - (FM-DSKAN-Y1):

For items that have no DESKtop part number, the use of this part number needs approval of the DESKtop Area Manager.

• DESKtop START-UP SERVICES

— INSTALLATION SERVICE - (FM-DSKHI-A1):

Provides at the desk assembly and test @ $100.00 per PC system for the customer with a DESKtop Hardware Maintenance Service Agreement.

— STAGING SERVICE - (FM-DSKHI-A2):

Provides assembly and test of a DESKtop system in a repair depot location on the customer's premise at $150 per PC System for customers with a DESKtop Hardware Maintenance Service agreement. Upon customer approval and acceptance the DESKtop unit is moved to agreed upon location.

— INSTALLATION OF APPLICATION SOFTWARE:

First three applications (FM-DSKAP-A2): $75.00 Each additional application (FM-DSKAP-A3)$25.00

DESKTOP SERVICES (cont'd)

- **CATEGORY DEFINITIONS AND BOUNDARIES**

I **PC's**

— Any Intel Based PC or Motorola Based Apple PC.

— Pricing Category Based on total internal hard-disk storage.

— System includes PC, monitor < 14", keyboard, mouse, and any internal options that do not exceed the following limitations:

1. Any video board with > 800 x 600 resolution capabilities.
2. Total PC RAM may not exceed 5Mb total RAM memory.
3. Any removable mass storage device, with media > 5Mb (ex. Bernoulli Boxes, removable hard disks).
4. Any internal modems > 2400 baud.
5. Processor upgrade boards are not an internal option (ex. Intel In-Board 386).
6. Total internal hard-disk storage of no more than 500Mb.
7. Floppy Drives >1.44Mb.

II **PRINTERS**

Dot Matrix:

— Printhead does not exceed 24 pins.

— Printer speed does not exceed 300 Characters per Second (CPS).

— Category price does not include optional sheetfeeders/paper handling devices.

Inkjet:

— FOR THE BOUNDED PRODUCTS LIST CONTACT THE DESKtop SALES MANAGER.

— Category price does not include optional sheetfeeders/paper handling devices.

Thermal:

— FOR THE BOUNDED PRODUCTS LIST CONTACT THE DESKtop SALES MANAGER.

— Category Price does not include optional sheetfeeders/paper handling devices.

Plotter:

— Plotter paper size of drafting specification 'A' or 'B' ONLY. Plotters that can handle 'C', 'D' or 'E' size are custom quote.

— Plotter can handle a maximum of 10 pens at one time.

— Category price does not include optional sheetfeeders/paper handling devices.

Letter Quality:

— Product category includes 'Daisywheel' type letter quality printers.

— FOR THE BOUNDED PRODUCTS LIST CONTACT THE DESKtop SALES MANAGER.

— Category price does not include optional sheetfeeders/paper handling devices.

Color:

— FOR THE BOUNDED PRODUCTS LIST CONTACT THE DESKtop SALES MANAGER.

— Category Price does not include optional sheetfeeders/paper handling devices.

DESKTOP SERVICES (cont'd)

Basic Laser:

— Printer has a print rate of less or equal to 8ppm (pages per minute).

— Does not have Postscript capabilities.

— Category price does not include optional sheetfeeders/paper handling devices.

— Does not include color printers.

Enhanced Laser:

(Printer qualifies as 'Enhanced' if either of the following are true)

— Printer has a print rate of greater than or equal to 9ppm (pages per minute).

— Printer has Postscript capabilities.

— Category Price does not include optional sheetfeeders/paper handling devices.

— Maximum rate of 12 ppm (pages per minute).

— Does not include color printers.

III **SERVERS (PROPRIETARY)**

Novell:

— Include all Novell proprietary fileserver products.

— Category Price includes memory, controllers, monitor, keyboard.

— Category Price does not include disk storage and internal tape units; add peripheral prices for these items to the category price for the server.

3Com:

— Includes all 3Com proprietary fileserver products.

— Category Price includes memory and controllers.

— Category Price does NOT include disk storage and internal tape units; add peripheral prices for these items to the category price for the server.

IV **TERMINALS**

DEC ASCII Text:

— All VT100, VT220, VT320 and compatables.

— Monitor does not exceed 14 inches.

DEC Monochrome Graphics:

— All VT240, VT330 and compatables.

— Monitor does not exceed 14 inches.

DEC Color Graphics:

— All VT241, VT340 and compatables.

— Monitor does not exceed 14 inches.

IBM 31XX Series:

— FOR THE BOUNDED PRODUCTS LIST CONTACT THE DESKtop SALES MANAGER.

IBM 32XX Series:

— FOR THE BOUNDED PRODUCTS LIST CONTACT THE DESKtop SALES MANAGER.

IBM System 3X:

— FOR THE BOUNDED PRODUCTS LIST CONTACT THE DESKtop SALES MANAGER.

DESKTOP SERVICES (cont'd)

V **LAPTOPS**

— System is a Laptop if it meets BOTH of the following requirements:

1. Unit must weight less than 20 pounds.
2. No external power source required for operation.

— Price is based on summation of all internal hard-disk storage.

— Includes any internal options, not exceeding PC option limitations.

VI **PORTABLES**

— System is a Portable if it meets EITHER of the following limitations:

1. Unit weights more than 20 pounds.
2. Requires an external power source for operation.

— Price is based on summation of all internal hard-disk storage.

— Includes any internal options, not exceeding PC option limitations.

VII **HARD DRIVES**

— Category Price includes disk drive, external chassis, power supply (if separate), and controllers.

— Total amount of supplemental external disk storage not to exceed 500Mb per PC or server.

VIII **TAPE BACKUP UNITS**

— Includes internal or external units and controllers.

— Category price covers only Cartridge type tape units.

— Maximum single tape capacity may not exceed 200Mb.

IX **MODEMS**

— Category Price covers only Asynchronous modems ONLY.

— Modem Baud Rate not to exceed 9600.

X **MISCELLANEOUS**

Scanners:

— FOR THE BOUNDED PRODUCTS LIST CONTACT THE DESKtop SALES MANAGER.

Optical Disk Drives:

— FOR THE BOUNDED PRODUCTS LIST CONTACT THE DESKtop SALES MANAGER.

Removable Disk Drives:

— FOR THE BOUNDED PRODUCTS LIST CONTACT THE DESKtop SALES MANAGER.

Sheetfeeders:

— FOR THE BOUNDED PRODUCTS LIST CONTACT THE DESKtop SALES MANAGER.

Floppy Drives:

— Category Price includes both internal and external units.

— Category Price covers both 5.25" and 3.5" units.

— Disk storage capacity must be one or more of the following ONLY: DOS or OS12, 744K, 1.2 Mb, 1.44 Mb, 360K; Macintosh 800Kb, or 1.4 Mb.

DESKTOP SERVICES (cont'd)

- **CATEGORY UPLIFTS**

UPLIFT TYPES	UPLIFT MULTIPLIER
Priority Support	1.40
Warranty Service	.50
Per-Event	20.00
Total System Support	1.25
DESKtop Servicenter	.75
Total System Support/LAN	1.70
Laptop Mail-in Program	.75

Notes:

1. Per-Event multiplier is used to determine the event fee per type of equipment. The multiplier is applied to the <=100 unit price even if the site quantity is greater than 100 systems. For example: A customer has 200 IBM PS2 Model 50Z's and 200 Epson LQ1050 printers. The event fee is $460 for the IBM's and $180 for the Epson's. (23 x 20 and 9 x 20). See the Customer Service Description on Maintenance Services for information on billing details.
2. The Total System Support multiplier is used to calculate the bundled price for the combined Hardware Maintenance and User System support products. This multiplier applies ;when the users are being supported lby DESKtop Services in a non-lan environment or if the lan environment is not being supported by DESKtop Services. See Customer Service Description on Total System Support for more detail.
3. The Total System Support/LAN multiplier is used to calculate the bundled price for the combined Hardware Maintenance and User System support products. The multiplier applies when the users are being supported by DESKtop Services in a LAN environment and on-site support of the LAN is being provided by DESKtop Services. See Customer Service Description on Maintenance Services for more detail.
4. Either of the two Total System Support multipliers is used by first calculating the total Hardware Maintenance price for all of the supported systems and peripherals. Then the Hardware Mainternance price is multipled by the applicable multiplier prior to the application of any discounts or allowances.
5. The Total System Support multiplier applies only to annunity (monthly charge contracts). It cannot be applied to per-event Hardware Maintenance contracts.
6. To use the Laptop Mail-in multiplier, first obtain the correct on-site Laptop price from the Monthly Charge Pricing Category Matrix, then multiply .75 to calculate the correct Mail-in price.
7. The total number of PC's, Laptops, Portables and/or terminals is used to determine the correct price per site. Printers and other add-on or peripheral devices do not count toward the total unit count for pricing purposes. Example: A customer has 450 PC's and 300 printers at two locations. Site 1 has 400 PC's and 250 printers. Site 2 has 50 PC's and 50 printers. You would use the <= 100 column to determine the prices for PC's and printers at Site 2 and you would use the 101 to 1000 column to determine the prices for PC's and printers at Site 1. The total price for the customer would be the sum of the prices for each site. This applies to all sites within the U.S. whose products are included in the DESKtop Services Supported Product list. See the Customer Service Description on Maintenance Services for more detail.
8. When multipliers are combined, the net effect upon the base is additive. For example, a customer purchases TSS and Priority Support. You calculate the base, let's call that X. The charge is (1.25 x X) + (.4 x X). If the customer wanted TSS and DESKtop Servicenter, then the total charge would be (.75 x X) + (.25 x X).

- **ADDITIONAL PART NUMBERS/PRICES**

PART NUMBER	DESCRIPTION	PRICE
FM-DSKAN-Y1	General DESKtop Services*	
FM-DSKAP-A2	Application Installation (First 3)	$ 75

FM-DSKUN-P3	UNLIMITED SOLUTION PACK FOR <= 1001 SYSTEMS	$13/PC/MO

NOTE:

Limited call Solution packs are available through DECdirect and should be sold via that mechanism.

Unlimited Solution packs are designed to be sold through the DESKtop Specialty Sales Force.

See Appendix A (Section II) of the DESKtop Supported Products List for a complete list of all supported application software and operating systems.

BUSINESS PROTECTION SERVICES

Digital's Business Protection Services help keep customers operating during a wide-spread disaster, and assist them in re-establishing normal operations after the crisis ends. Our portfolio assists customers in anticipating, managing and recovering from disasters. Business Protection Services Specialists help customers identify their major areas of risk and tailor recovery solutions to protect their investments and ensure their business' survival.

The U.S. Business Protection Services portfolio consists of the following products and services:

— Total Recovery Planning System (TRPS)
— Contingency Planning Assistance Services
— Recover-All Service
— RESTART Service
— DECmove
— Environment Products

- **TOTAL RECOVERY PLANNING SYSTEM (TRPS)**

  The Total Recovery Planning Syste, TRPS, is a PC-based software package provided through an agreement with CHI/COR Information Management, Inc., that helps Digital customers create and maintain disaster recovery plans on a worldwide basis.

  For information on quoting TRPS, please contact Bob Wisnowski, Contingency Planning Manager at (708) 818-5807 or DTN 450-5807.

PART NUMBER	DESCRIPTION	PRICE
FM-TRPSM-01	TRPS Single User Lic	$ 9,500.00
FM-TRPSM-02	TRPS Single Lan Lic	$11,000.00
FM-TRPSM-03	TRPS U.S. Corporate Lic	$35,000.00
FM-TRPSM-04	TRPS U.S. Corporate Lan Lic	$40,000.00
FM-TRPSM-05	TRPS Worldwide Corporate Lic	$45,000.00
FM-TRPSM-06	TRPS Worldwide Corporate Lan Lic	$50,000.00

- **CONTINGENCY PLANNING ASSISTANCE**

  Developing a comprehensive contingency plan requires that customers first understand the impact a catastrophic incident or other extended outage would have on their organization, information systems and most importantly, their customers. Digital can help customers identify their vulnerabilities and design a contingency strategy which meets their specific business and recovery requirements.

  For information on quoting Digital's Contingency Planning Assistance Services, please contact Bob Wisnowski, Contingency Planning Manager at (708) 818-5807 or DTN 450-5807.

PART NUMBER	DESCRIPTION	PRICE	FREQUENCY
WA-RCALL-AA	Recover-All is an optional enhancement to Digital's on-site and DASP service agreements which extends these agreements to cover situations normally excluded from coverage such as natural or man-made disasters. Recover-All provides for the prompt repair or replacement of damaged computer equipment and reimbursement for many of the costs associated with the return to normal operations	9%of BMC	Per Month

- **RESTART SERVICE**

RESTART is a contract service through which Digital provides a back-up computing center for use by customers in the event of a disaster. It is a subscription service which entitles the subscriber to emergency access to a "Standard Back-up Configuration" which is accessible 24 hours per day, 7 days per week.

RESTART quoting is administered centrally for all U.S. locations. Quotes can be requested by calling 1-800-HOTSITE.

RESTART contracts must be technically validated by the appropriate RESTART Center prior to final commitment. For more information, call the Business Protection Services Hotline at 1-800-HOTSITE or: Eastern RESTART Center (Parsippany, NJ) (201) 316-0960 or Midwest RESTART Center (Arlington Heights, IL) (708) 818-5800.

- **DECmove**

PART NUMBER	DESCRIPTION	PRICE	FREQUENCY
FN-NTMOV-AA	Digital's most comprehensive computer relocation service. Digital manages the entire relocation process, including page de-installation, re-installation and a new site survey. DECmove provides insurance coverage against most risks, and prompt processing of any resulting claims.	VARIES	As quoted

- **ENVIRONMENTAL PRODUCTS**

  Digital offers a full range of environmental products that are supported and recommended by Digital Services to solve the various power problems that can cause system faults.

  For specific details and pricing information relative to these offerings, please refer to the Environmental Products section of this Price List.

SERVICE FOR SECURE BUSINESS IN EUROPE

Hardware and software maintenance services by U.S. citizens are available from Digital's U.S. Federal Systems Area Customer Services offices in Europe. These services are targeted primarily at U.S. Government agencies and prime contractors requiring U.S. Government security clearances as per form DD254. The services are restricted to the countries listed below and are at the discretion of Digital Equipment Corporation.

To calculate the price for hardware and software service, total the system's monthly charge using the maintenance prices listed in the U.S. price list and multiply the total by the appropriate country uplift factor as follows:

ENGLAND	1.45
SPAIN	1.45
NORWAY	1.45
ICELAND	1.45
GERMANY	1.80
HOLLAND	1.80
BELGIUM	1.80
ITALY	1.80
PORTUGAL	1.80
GREECE	1.80
TURKEY	1.80
AZORES	1.80

For example, for a configuration totalling $1200 monthly charge located in England, the charge would be 1.45 x $1200 or $1740 per month.

Travel charges consisting of actual travel expense and per diem will be assessed for service to all locations greater than 50 miles from the appropriate Digital facility.

Response time is four hours for locations within 50 miles of the appropriate Digital facility. For distances greater than 50 miles the response time is four hours en route.

Warranty and installation will be provided according to the U.S. rules with travel charges assessed as indicated above.

Per call rates are available by applying the appropriate uplift factor and travel charges listed above.

Software Self-Maintenance, Right-to-copy, Media Update Service and Document Update Service are available at U.S. prices if written authorization is provided for use of an Army/Fleet Post Office address in Europe.

Software BASIC and DECsupport and Integrated Services are uplifted by the same country uplifts listed above providing written authorization is granted to use an Army/Fleet Post Office address for updates and mailings.

FACILITIES MANAGEMENT SERVICES

Facilities Management Services (FMS) is the business of providing operational support services for our customers' data centers and/or communication environments. This is accomplished by negotiating "outsourcing" contracts with our customers and which Digital assumes responsibility for operating all or part of a customer's data center or communication facility.

We also provide data center and telecommunication assessment services. The assessments help the customer to understand the efficiency and effectiveness of their operations. The assessment is accompanied by recommendations on how the customer can improve operations by outsourcing with Digital or by restructuring their operations.

FMS ordinarily require custom quotations. You can obtain sales support and custom quotes by contacting one of the following people:

Frank Tamberelli	PCO	DTN 321-5240 or (609) 987-5240
Joe Cinqumani	NYO	DTN 352-2780 or (212) 856-2780
Ron Roy	NYO	DTN 352-2787 or (212) 856-2787
John Kennedy	OGO	DTN 276-8354 or (508) 496-8354

FMS currently offers the following services to customers:

FM-FMSAS-DC DATA CENTER OPERATION ASSESSMENT CUSTOM QUOTE

Data Center Operation Assessment is a comprehensive service that provides a baseline analysis of the customer's data center operations and concludes with the identification of opportunities for improvement in the quality and level of the service and efficiency of the operation. Can be the basis for developing a customer's customized outsourcing strategy.

FM-FMSAS-TE TELECOMMUNICATION OPERATION ASSESSMENT CUSTOM QUOTE

Telecommunication Operation Assessment is a comprehensive service that provides a baseline analysis of the customer's Telecommunication operations and concludes with the identification of opportunities for improvement in the quality and level of the service and efficiency of the operation. Can be the basis for developing a customer's customized outsourcing strategy.

FM-FMSOS-DC DATA CENTER OPERATION SERVICES CUSTOM QUOTE

Digital will provide the management, staff, and/or other resources required to effectively run a customer's data center. Digital will have responsibility for its operation.

FM-FMSOS-TE TELECOMMUNICATION OPERATION SERVICES CUSTOM QUOTE

Digital will provide the management, staff, and/or resources required to effectively run a customer's voice and/or data network(s). Digital will have responsibility for its operation.

FM-FMSOS-CU OPERATIONS SERVICE INTEGRATION CUSTOM QUOTE

Digital will assume the responsibility for a customer's operations by managing the delivery of operational support services combining the Data Center, Telecommunication, and specific Application suppor services. These services might be provided by Digital or an outside service vendor.

FM-FMSAS-CU	OPERATIONS ASSESSMENT	CUSTOM QUOTE

Digital will provide an "Assessment Team" to evaluate the customer's operational support services. The team will determine where there are opportunities for the customer to operate facilities in a more efficient and effective manner. The assessment is based on current operations and future requirements and it may include recommendations on ways to reduce operating costs. increase performance, or redirect resources.

FM-FMSCN-DC	DATA CENTER CONSULTING	CUSTOM QUOTE

Digital will share with customers its expertise, knowledge and experience in data center operations to assist them in attaining better performance and/or service.

FM-FMSCN-TE	TELECOMMUNICATION CONSULTING	CUSTOM QUOTE

Digital will share with customers its expertise, knowledge and experience in voice and/or data network operations to assist them in attaining better performance and/or service.

FM-FMSDS-DC	DATA CENTER OPERATION DESIGN	CUSTOM QUOTE

Digital will assist a customer in designing its data center operations. This includes, but is not limited to, physical design and layout; writing of policies, procedures, and processes; technology planning; implementation plans; and/or management plans.

FM-FMSDS-TE	TELECOMMUNICATION OPERATION DESIGN	CUSTOM QUOTE

Digital will assist a customer in designing its voice and/or data network operations. This will include, but is not limited to, physical design and layout; installation planning; writing of policies, procedures, and processes; implementation plans; and/or management plans.

NETWORK INTEGRATION SERVICES

CUSTOM QUOTED SERVICES

• DESIGN AND INSTALLATION SERVICES

The Network design and installation management services listed are custom quoted. For a quotation, please contact your local Customer Services Network Integration Sales Support Specialist.

FN-NTPLN-AA **Network Physical Design**

Features:

- The Network Planning Consultant consults with your staff to evaluate present and future network needs, including major applications, number of users, type of equipment on the network and your need for voice, data, and broadcast capabilities.
- The Network Planning Consultant arranges a site survey to identify equipment locations and assess the structural work required to implement a network.
- The Network Planning Consultant evaluates such issues as type of building, type of occupancy, and local/state codes and restrictions.
- Using the Site Survey Report and a conceptual Network Design, the Specialist develops a detailed Physical Design which includes proposed cable runs, type of cabling, location of all network equipment, and cable sytem component specifications.

FN-NTIMP-AA **Network Installation Management**

Working from a Network Physical Design, the Project Manager overseas all site preparation and network installation activities, including other Digital resources and subcontractors.

Features:

- Development of a Network Installation Plan including subcontracting, scheduling, and materials procurement.
- Pre-Installation inspection to review the site.
- Management and scheduling of the installation and subcontracting activities for installation of the cabel system.
- Inspection and interim testing during installation process.
- Network acceptance testing of the cable installation and associated communications equipment including cable system certification for broadband networks.
- Site documents including as-built drawings, developed from the physical design documentation, which become part of the Site Management Guide for sites under a Digital Service Agreement.

The above NETWORK AND SITE SERVICES CUSTOM QUOTED SERVICES are quoted based on $1200 per day for Design services and Digital Project Management cost of $1000 per day, plus normal travel and hotel costs incurred.

FN-NTSUB-AA **Networks Subcontract**

FN-NTVEN-AA **Vendor Equipment Services**

• OPERATIONS AND REMEDIAL SERVICES

The following Network operations service will be quoted on the basis of a monthly charge developed from the custom designs of the maintenance plan covering the customers network. For the exact price quotation, please contact your local Customer Services Network Sales Support Specialist.

FN-NTOPN-AA NETsupport Operations Management

For customers who want to ensure optimal use of their network resources and maximize network uptime, Digital offers this high level of network support.

Features:

- Toll-free telephone support and remote dial-in support from Digital's Central NETsupport Center (CNC), 24 hours a day, 7 days a week.
- Coverage may be extended to certain non-Digital hardware and software components and non-Digital protocols such as TCP/IP.
- Digital develops a detailed Operations Plan for all network hardware and software including procedures for call-handling and control of remedial activities.
- Digital manages fault isolation and resolution process.
- A VAX-based Digital Service Processor supplied by Digital and located at the customer site, provides an on-line network configuration database and software tools that enhance the CNC's ability to quickly isolate faults on the network.
- Digital maintains and updates the network configuration database.
- Proactive management using historical records and periodic monitoring of current network status.

FN-NTWAI-AA Wide Area Interconnect Support

To help you effectively manage your network resources, Wide Area Interconnect Service provides you with maintenance planning, configuration support, fault isolation and resolution, and predictive maintenance for your wide area network.

Features:

- Service provided on multivendor networks.
- Telephone support that is provided is 24 hours, 7 days a week from the Central NETsupport Center (CNC).
- Development of a detailed Operations Plan including a complete audit of the wide area network and describing procedures for call handling, fault management, problem-escalation, and administration.
- Digital manages entire problem-resolution process.
- Remote test equipment at your site for network monitoring/-alarming, and fault isolation
- Optional hot spare modem capability to ensure prompt return to operation should a modem fail.
- Configuration database assists in network management.

FN-NTLAI-AA Local Area Interconnect Support

Local Area Interconnect Support provides a single source of service for the physical layer of your network. It also offers a fundamental level of network configuration management capabilities.

Digital performs fault isolation, fault resolution, and repair verification for the cable system and related interconnect hardware devices.

Features:

- Available to customers with a DECservice or Basic Agreement on their interconnect equipment.
- Hours of on-site remedial service coincide with the Standard Service Agreement.
- Optional guaranteed response time for subcontractor for cable system repair.
- Available for baseband, coaxial, broadband, fiber optic or twisted pair networks.
- NMCC/VAX ETHERnim helps facilitate efficient fault management.
- Customer access to NMCC/VAX ETHERnim for enhanced network management capabilities.
- For broadband networks, cable system realignment is performed after six months and preventive maintenance is performed annually.
- Digital installs mandatory engineering modifications.
- Fixed price for support of a single LAN.

FN-NTLAI-AA	Local Area Interconnect Support pricing is based on a $300.00 per month charge per LAN. Certain LAN configuration with an extended LAN may require an additional $300.00 monthly charge. For the exact price quotation, please contact your local Customer Services Network Sales Support Specialist.
FN-NTLAI-AB	Local Area Interconnect Support that requires special arrangements with a subcontractor, such as guaranteed response time or special equipment arrangements, will require a custom quote. For exact price quotation, please contact your local Customer Services Network Sales Support Specialist.

• NETsupport Shared Services

To increase Digital's service presence in the Network Management market and complement T&N's DECmcc product offerings, Customer Services is expanding the portfolio of NETsupport Services through the creation of five new services, collectively known as NETsupport Shared Services. Shared Services will benefit customers who want Network Management capabilities (tools) for self management, but also need a level of technical support from Digital. With this development, Digital offers increased flexibility in providing support for both DECnet and TCP/IP customers. NETsupport Shared Services will offer the hardware, software and technical resources, needed to fully support large and small networks alike.

The five NETsupport Shared Services are composed of several separate modules, which collectively produce a composite monthly price. This method will allow for maximum flexibility when selling a Shared Service. For example, if the customer already has a Digital specified VAX configuration for SHARED DECmcc SMS, you may eliminate the part number NTSHW-AA for SMS hardware ($726.00) and reduce the composite monthly charge from $2875.00 to $2149.00.

For additional information please review the Customer Services Description and Feature Sheet for Shared Services or contact your Area Network Sales Support Specialist.

COMPOSITE PRICING FOR NETSUPPORT SHARED SERVICES

This service provides the same network management software as DECmcc SMS with the addition of the Network Configuration Manager. In addition to the software, this service also includes a VS 3100, a Bridge, 6 days of Network On-Site Consulting by the ANC (3 days at installation and 3 days scheduled across 12 months) and 32 hours of Advisory Support from the CNC.

NETsupport SHARED DECmcc SMS

FN-NTSHW-AA	$ 726.00/mo	SMS Hardware
FN-NTSHW-AB	$ 336.00/mo	SMS Bridge Hardware
FN-NTSSW-AA	$1,226.00/mo	SMS SW/ ANC Support
FN-NTCNC-AA	$ 587.00/mo	SMS CNC Support
FN-NTSHS-AA	$2,875.00/mo	Total Price

This service provides the same network management software as DECmcc EMS with the added value of the Network Configuration Manager. In addition to the software, this service also includes a VS 3100, a Bridge, 8 days (4 days at installation and 4 days scheduled across 12 months) of Network On-Site Consulting from the ANC, and 40 hours of Advisory Support from the CNC.

NETsupport SHARED DECmcc EMS

FN-NTSHW-AC	$ 852.00/mo	EMS Hardware
FN-NTSHW-AB	$ 336.00/mo	EMS Bridge Hardware
FN-NTSSW-AB	$2,097.00/mo	EMS SW/ ANC Support
FN-NTCNC-AB	$ 735.00/mo	EMS CNC Support
FN-NTSHE-AA	$4,020.00/mo	Total Price

COMPOSITE PRICING FOR NETSUPPORT SHARED SERVICES (cont'd)

Shared MSU - This service provides the SNMP network management software for managing a TCP/IP network. In addition to the software, this service also includes VS 3100, 6 days (3 days at installation and 3 days scheduled across 12 months) of Network On-Site Consulting from the ANC and 32 hours of Advisory Support from TCP/IP Specialist at the CNC.

NETsupport SHARED MSU

FN-NTSHW-AD	$1,175.00/mo	TCP/IP Hardware
FN-NTSSW-AC	$1,113.00/mo	TCP/IP SW/ ANC Support
FN-NTCNC-AC	$ 587.00/mo	TCP/IP CNC Support
FN-NTSHM-AA	2,875.00/mo	Total Price

DECmcc Support - NETsupport Shared Services provide customers who purchase DECmcc Site Management Station (SMS) or Enterprise Management Station (EMS) the following:
Advisory support from network experts in the Central NETsupport Center located at the Colorado Springs Customer Support Center as a back-up resource to a customer's staff.
Optional Network On-Site consulting resources from Area NETsupport Consultants (ANC).

NETsupport SHARED DECmcc SMS		
FN-NTCNC-CA	$ 587.00/mo	DECmcc SMS CMC Support
NETsupport SHARED DECmcc EMS		
FN-NTCNC-CB	$ 735.00/mo	DECmcc EMS CNC Support
NETsupport SHARED MSU		
FN-NTCNC-CC	$ 587.00/mo	MSU CNC Support

Options

FN-NTANC-AA	$1,200.00	8 Hours On-Site - Certification Audit
FN-NTANC-AB	$1,600.00	8 Hours On-Site - Resolution Consulting
FN-NTCNC-BA	$ 165.00	1 Hour Per Call Remote
FN-NTCNC-BB	$1,280.00	8 Hours Remote ($160/hr)
FN-NTCNC-BC	$2,482.00	16 Hours Remote ($155/hr)
FN-NTCNC-BD	$3,604.00	24 Hours Remote ($150/hr)

COMPOSITE PRICING FOR NETSUPPORT SHARED SERVICES (cont'd)

• NETWORKS SERVICES STANDARD UNIT PRICING

Network and Site Services standard unit prices include all labor and material required for installation (refer to Customer Services Description FSD No.59.0) in an average office environment. An average office environment is defined as, "a typical office building with dropped ceilings, hollow walls and an existing cable path".

The price does not include any site preparation, restoration, or "make-ready" charges, (conduit, conduit installation, core drilling, cable trays, electrical power,.....) or other exceptions that may be required for the installation of the network. If installation requires other than the line items requested including any special labor requirements, DIGITAL will analyze the building environment and produce a work statement reflecting additional material and/or labor requirements, and notify the customer of any price changes before starting work.

To assure a reliable, maintainable and extensible network at the most favorable cost, the service will be delivered according to DIGITAL's material and labor standards. With the foregoing in mind, DIGITAL reserves the exclusive right to select the subcontractor(s) of their choice.

The unit prices were developed to aid in responding to the market need for a NETplan/NETstart sales and delivery method which:

- Provides DIGITAL Sales with the capability to quickly respond to customer requests for pricing.
- Provides the customer with the means to budget for the cost of the network design and installation service.
- Aids in improving service delivery.

THE UNIT PRICES APPLY ONLY TO THE CONTINENTAL UNITED STATES.

Following are the individual unit identifiers (part numbers), the price of the individual units and a brief description of the unit.

Some of the units are grouped together and are preceeded by a listing of activities that are required to install units.

FACEPLATE TO SATELLITE EQUIPMENT ROOM:

The price for these part numbers includes all labor and materials to install one faceplate, which includes installing the cable(s) from the satellite equipment room to the office, terminating the cable(s) in the satellite equipment room and in the office faceplate(s), and labeling the cable(s) at the satellite equipment room and at the faceplate.

COMPOSITE PRICING FOR NETSUPPORT SHARED SERVICES (cont'd)

STATION CONNECTIONS

Connections from the office faceplate to the terminal, in the office, include 10 feet of cable, modified modular plugs and a 25 pin passive adapter.

Connections from the faceplate to the high speed Thinwire device includes 15 feet of Thinwire, a "T" connector and an electrical terminator.

Connections from the terminal to an attached slave printer includes 10 feet of cable, modified modular plugs and both a 25 pin and a 9 pin passive adapter.

FN-1STAT-01	FACEPLATE TO PRINTER/TERMINAL CONNECTION	$60
FN-1STAT-02	FACEPLATE TO THINWIRE DEVICE CONNECTION	$66
FN-1STAT-03	FACEPLATE TO SLAVE PRINTER CONNECTION	$86

SATELLITE EQUIPMENT ROOM (SER)

The SER starter kit includes two 19 inch racks, two 8 outlet power strips with cords, cable management hardware, mounting brackets for the active components, and frames for the later installation of the terminal interconnect and Thinwire patch blocks.

The Office Communications Cabinet includes the cabinet assembly, two power strips, stabilizer feet, mounting brackets for the active components, cable management hardware and patch panel brackets.

The Remote Wall Enclosure installation provides for the installation of the Remote Wall Enclosure kit.

FN-A1SER-01	SER RACK INSTALLATION	$2624
FN-A1CMC-01	OFFICE COMMUNICATIONS CABINET INSTALLATION	$3934
FN-A1RWE-01	REMOTE WALL ENCLOSURE INSTALLATION	$188

SATELLITE EQUIPMENT ROOM (SER) PASSIVE AND ACTIVE CONNECTIONS

The passive and active connections include the patch block, patch cords, cable concentrator, adapter kit and DEMPR connection cables as appropriate for either 16 terminals or 16 Thinwire (high speed) connections.

FN-16SER-LS	16 SER TWISTED PAIR CONNECTIONS	$542
FN-16SER-HS	16 SER THINWIRE CONNECTIONS	$884
FN-16CMC-LS	16 OFFICE COMM. CABINET TWISTED PAIR CONNECTIONS	$490
FN-16CMC-HS	16 OFFICE COMM. CABINET THINWIRE CONNECTIONS	$864
FN-16RWE-LS	16 REMOTE WALL ENCLOSURE TWISTED PAIR CONNECTIONS	$342
FN-16RWE-HS	16 REMOTE WALL ENCLOSURE THINWIRE CONNECTIONS	$816

TRANCEIVER CABLE

Includes transceiver cable installation and any cable supports.

FN-1TCGP-05	TRANSCEIVER GEN. PURPOSE CABLE CONNECTION- 5 METER	$120
FN-1TCGP-10	TRANSCEIVER GEN. PURPOSE CABLE CONNECTION- 10 METER	$166
FN-1TCGP-20	TRANSCEIVER GEN. PURPOSE CABLE CONNECTION- 20 METER	$240
FN-1TCGP-40	TRANSCEIVER GEN. PURPOSE CABLE CONNECTION- 40 METER	$426
FN-1TCPL-05	TRANSCEIVER PLENUM CABLE CONNECTION- 5 METER	$186
FN-1TCPL-10	TRANSCEIVER PLENUM CABLE CONNECTION- 10 METER	$270
FN-1TCPL-20	TRANSCEIVER PLENUM CABLE CONNECTION- 20 METER	$464
FN-1TCPL-40	TRANSCEIVER PLENUM CABLE CONNECTION- 40 METER	$852

OFFICE TRANSCEIVER CABLES

Includes office transceiver cable, connection of cable and testing.

FN-1TCFC-02	2 METER OFFICE TRANSCEIVER CABLE	$106
FN-1TCFC-05	5 METER OFFICE TRANSCEIVER CABLE	$114
FN-DEXJK-AA	ETHERJACK INSTALLATION	$124

COMPOSITE PRICING FOR NETSUPPORT SHARED SERVICES (cont'd)

ETHERNET COAXIAL CABLE (THICKWIRE)

Includes the cable installation, terminators and/or barrel connectors, grounding wire, grounding connectors and labor.

FN-1ETGP-23	ETHERNET GEN. PURPOSE CABLE - 23 METER	$520
FN-1ETGP-70	ETHERNET GEN. PURPOSE CABLE - 70 METER	$1282
FN-1ETGP-AA	ETHERNET GEN. PURPOSE CABLE - 117 METER	$2038
FN-1ETGP-E0	ETHERNET GEN. PURPOSE CABLE - 500 METER	$7834
FN-1ETPL-23	ETHERNET PLENUM CABLE - 23 METER	$726
FN-1ETPL-70	ETHERNET PLENUM CABLE - 70 METER	$1788
FN-1ETPL-AA	ETHERNET PLENUM CABLE - 117 METER	$2846
FN-1ETPL-E0	ETHERNET PLENUM CABLE - 500 METER	$11354

COMPONENTS WITH INSTALLATION

Includes transceiver, mounting brackets and labor to install the transceiver to the coaxial cable and the transceiver cable to the transceiver.

FN-H4000-AA	H4000 TRANSCEIVER AND INSTALL	$501
FN-H4005-AA	H4005 TRANSCEIVER AND INSTALL	$405

ACTIVE COMPONENTS INSTALLATION ONLY

This includes the unpacking and visual inspection of the device, mounting the device in the satellite equipment room, if applicable, connecting the device and testing.

FN-DS200-AA	DECSERVER 200 INSTALLATION	$444 (Install of device only)
FN-DS500-AA	DECSERVER 500 INSTALLATION	$660 (Install of device only)
FN-DELNI-AA	DELNI INSTALLATION	$180 (Install of device only)
FN-DEMPR-AA	DEMPR INSTALLATION	$375 (Install of device only)
FN-DEBET-AA	DEBET INSTALLATION	$550 (Install of device only)
FN-DEREP-AA	DEREP INSTALLATION	$366 (Install of device only)

DECathena SERVICES

System Integration Services using the integration and application expertise of Network Integration Services and Application Project Services has introduced DECathena Services to help out customers meet challenges in managing today's multivendor workstation environment.

DECathena Services sprovides a network-based solution that supports the management of large distributed workstation environments. DECathena provides location-independent computing for end users, ensure continuous system availability, and enables better access to system-wide resources such as printing and file services.

DECathena Services provides a user the ability to log in at any workstation in the DECathena system and have access to their accounts, files and system-wide resources transparently, without any special commands or remote logins. In addition, system services such as mail and printing, as well as user applications and files, can be stored and managed in a centralized fashion all protected from a leading-edge security system.

The core software technologies include:

— System Management
— Security
— Naming

COMPOSITE PRICING FOR NETSUPPORT SHARED SERVICES (cont'd)

Core application capabilities include:

— Network-wide Messaging
— Nodename-Independent Mail System
— Online User-Query Response System
— Bulletin Boards
— Location-Independent Printing

DECathena Services provides products and services so that Digital can work with customer through every phase of the process, from planning consulting to evaluate the viability of installing the DECathena software, to design and startup implementation services for software installation, to ongoing management services including: Fault, Configuration and Security Management; Performance Analysis; and Consulting. In addition, Digital provides Application Migration services to integrate a customer's software applications into the DECathena enviroment.

DECathena Services include:

- Technical Qualification Service
- DECathena Implementation
- DECathena Maintenance Service
- DECmcc MSU Netsupport Service
- System Administration Training
- DECathena Binaries
- Documentation with Client Licenses

ENVIRONMENTAL PRODUCTS

Environmental Products has joined forces with Recovery Services, DECmove and DECsite to become part of the newly formed Business Protection Services(BPS). Together, BPS groups offer each customer a total-solution approach to any disaster big or small. Offering services that (1) Plan, (2) Prepare, (3) Protect and (4) Prevent.

Environmental Products provide battery backup, as well as distribution and conditioning to incoming power in order to protect computer systems and their associated peripheral products.

Digital offers a full range of Environmental Products recommended and supported by Customer Service to solve the various power problems that can cause system faults. All of these products are built to meet Digital's high standard of quality and safety.

For BMC, DSMC or installation charges for all of Environmental Products, refer to the model numbers listed in the Customer Service Price List in the front section of this book.

The following product sets are available:

HA3000 UNINTERRUPTIBLE POWER SYSTEM

- Battery back-up (approximately 5-30 minutes at full load) for mid-range to high performance systems.
- Full power conditioning.
- Available in 14 models in 7 sizes: 11, 20, 40, 60, 80, 100 and 125 kVA 3 phase (60 Hz), 208 VAC or 480 VAC.
- Features self-contained battery cabinet with sealed, maintenance-free batteries suitable for use in the computer room.
- Microprocessor controlled operations and diagnostics.
- Automatic Static Bypass: Provides automatic transfer of the critical load to AC power in the event of UPS system shutdown.
- Maintenance Bypass. Allows full computer system operation during routine maintenance.
- Available options include: distribution cabinet, input isolation transformer, input total harmonic reduction filter, and remote status panel

PERSONAL SERIES PLUS - UNINTERRUPTIBLE POWER SYSTEM (UPS) 4N-AExxx-Series

- Available in four kVA ratings from 3.6 to 12 kVA single phase to accommodate a wide range of power requirements.
- Provides automatic transfer of the critical load to AC power in the event of UPS system shutdown.
- Offers microprocessor-controlled logic which eliminates the need for manual adjustments to compensate for component tolerances, and facilitates maintenance and troubleshooting procedures.
- Supports non-linear (computer) loads without derating.
- Features a small footprint, quiet operation, sealed, maintenance-free batteries and casters for adaptability to either a computer room or office floor environment.
- Offers plug-in connection to the critical load via output power receptacles on the back of the UPS unit.
- Maintenance bypass allows full computer system operation during routine maintenance.

PERSONAL SERIES UNINTERRUPTIBLE POWER SYSTEM (UPS) 4N-AExxx-Series

- Available with kVA ratings from .35 to 2.0 with standard backup: .8 to 2.0kVA with extended backup.
- Up to 15 minutes of emergency power backup.
- Additional backup available with .8kVA model and above.
- Power conditioning and isolation.
- Static bypass.
- Lightweight, portable, compact, quiet and easy to use.
- Available with or without RS232 Option or LAN Option.
- Maintenance free reliability.
- XENIX Software Kit and SCO UNIX Software Kit are available for all systems.

POWER DISTRIBUTION/CONDITIONING SYSTEMS H7317 and H7318 - PCS+/PDS+

- Replaces all of the conventional wiring normally required to power the medium- to large-computer system.
- Provides built-in microprocessor monitoring system.
- Has built in isolation transformer and single-point ground to maximize electrical noise reduction.
- Built-in line voltage regulation (H7318 only).
- Built-in surge suppression and filtering (H7318 only).
- 43 internal monitoring points.
- Up to 69 additional external environmental monitoring probes (Optional).
- Ability to network or daisy chain up to 8 units through an RS422 network.
- RS232 port for remote monitoring.
- 40 models for domestic and international use. 208 VAC to 600 VAC 3 phase from 15 to 100 KVA.
- Vast range of custom power distribution cables for all vendor equipment.
- Remote emergency power off capability.(REPO)
- Unit mobility provides customer with flexibility to move and upgrade computer system in a quick and cost-effective manner.

REMOTE ENVIRONMENTAL MONITORING SOFTWARE (REMS) Qx-VI5Ax-xx

- Provides exclusive communication with the HA3000, Personal UPS System and the H731x products to a VAX/VMS system.
- Enables automatic execution of user defined subroutines when pre-designated threshold conditions are reached.
- Enables mail messages to be sent automatically when predefined environmental events occur.
- Enables the generation of historical data reports of accumulated, time-stamped environmental information.
- Realtime monitoring of environmental conditions.
- Provides three levels of access security to the filed information.
- Can interface with DECalert and other VMS applications.
- A component of POLYcenter.

ENVIRONMENTAL MONITORING SYSTEM (EMS - H7310)

The Environmental Monitoring System (EMS) is a free standing, microprocessor-based monitoring system built to handle the total electronic environmental surveillance of any computer site and its supporting equipment. Using from one to 112 sensors/probes, EMS provides realtime sampling of physical changes to the environment which are compared to user-established threshholds, and displayed on a connecting terminal, or transmitted to an external host system via its RS232 port.

- Provides early warning system to guard against damage to equipment and data from environmental threats.
- Allows system preprogramming of user-defined abnormal environmental conditions.
- Provides monitoring and central reporting for multiple temperature sensors as well as external alarm systems in multiple computer rooms.
- Up to eight units can be linked for expanded monitoring of up to 896 points.
- Ideal for computer sites that have conventional wiring and for interaction with any third party UPS.
- Offers an optional on-line software package (VAX Remote Environmental Monitoring Software - see above) for additional system interactivity.

CABLES FOR POWER DISTRIBUTION SYSTEMS BC24J through BC29D

- Flexible.
- Receptacles and breakers included.
- Most are available in lengths from 10 feet to 100 feet.

CONSTANT VOLTAGE CONDITIONERS H7225 SERIES

- Provides complete power conditioning to overcome all power problems, except for a complete power outage.
- 16 models for domestic and international use 120 VAC to 240 VAC single phase, .5 to 10.0 KVA.
- Provides 3 to 5% regulation over a wide range of input voltages.
- Overload circuit protection.

TRANSIENT VOLTAGE SURGE SUPPRESSSORS 4N-GAxxx SERIES

- Powerline, Dataline and/or a combination Power/Data line surge suppressor are now available.
- Provides protection from high energy transients caused by electrical storms, as well as, man-made disturbances that can damage a computer system.
- New plugable models for easy installation.
- 150+ models for domestic and international use.
- Ability to handle large surge currents.
- Fast response time.
- Instant recovery.

ISOLATED GROUND RECEPTACLES AND SPECIAL RECEPTACLES (12-CLASS)

- Direct ground path for the equipment.
- Separated insulation barrier from mounting strap.
- Isolates transient signals.

8. DIGITAL SERVICES APS/DCS

INTRODUCTION

Digital Services APS/DCS provides a complete range of capabilities to plan, design, implement, and manage solutions to today's business, people, and technology problems. APS/DCS uses whatever resources are required, both from within Digital and from leading complementary solution organizations, to provide a complete business solution. Leading Digital's systems integration efforts on behalf of our customers APS/DCS uses experienced program managers trained in the latest system development methodologies.

The following pages are divided into nine sections:

- **How to Configure Project and Consulting Services Part Numbers**

- **Project and Consulting General Information**

- **Project Services** develops, delivers, and implements tailored software applications. These custom tailored efforts cover major project types including: Software Application Development, Application Customization, and Migration Projects.

- **Consulting Services** provides knowledge transfer consisting of expert advice, analysis, and recommendations to aid customers in their business, information systems, applications, and use of technology. The four major areas of consulting are: Management, Information Systems, Applications, and Technology.

- **How To Configure Assets Services Part Numbers**

- **Assets Services General Information**

- **How to Configure Cross Functional Service Packages Part Numbers**

- **Cross Functional Service Packages** provide comprehensive service support for the software and training needs of Digital's end users. SSPs are defined sets of services essential to successful system installation, startup, and usage during the first year of operation.

HOW TO CONFIGURE PROJECT AND CONSULTING SERVICE MODEL NUMBERS

DIGITAL SERVICES APS/DCS

PROJECT AND CONSULTING GENERAL INFORMATION

The following guidelines will help you to quote Project and Consulting offerings:

1. The Project and Consulting prices in the U.S. SYSTEMS PRICE LIST are applicable to the contiguous states in the U.S. The local Digital Services APS/DCS manager should be contacted for quotes to Customers in Alaska and Hawaii.

2. The Digital U.S. Standard Terms and Conditions and the applicable Digital Services/Software Service Description(s) must be attached to the quote for presentation to the Customer.

3. A statement of work must be attached to the Customer's quote for any Project, Consulting, or Custom Service offering with the exception of fixed content packaged services.

4. An Order Certification Form is required for any Project, Consulting, or Custom Service offering. The local Digital Services APS/DCS Manager is responsible to complete this form for the Account Manager after the order is received from the Customer, but prior to certification.

5. Any allowances from List Price must be substantiated by written documentation with the appropriate approval from the Accounts Group Manager.

6. Travel time is charged at the corresponding hourly labor rate if the location where service is delivered is more than fifty (50) miles from the local Digital Services APS/DCS office. When applicable, travel expenses are charged as incurred and at the same rate Digital uses to reimburse its employees.

7. Startup Service Packages, some of which include consulting services offerings, are listed in the CROSS-FUNCTIONAL SERVICE PACKAGE INFORMATION section.

8. If you have any questions on Digital Services APS/DCS business, please contact your local Digital Services APS/DCS Manager.

APPLICATION PROJECT SERVICES (APS) BUSINESS UNIT

Projects are Digital managed custom software solutions providing solutions to today's most challenging information systems problems. Digital's custom software is built "commercial strength" using rigorous and extensive design, coding, testing and documentation methodologies. This provides customers with custom software that works as stated and can evolve to meet changing business needs.

PROJECT SERVICES INCLUDE:

- **CUSTOMER PROJECT SERVICE**

  With the Custom Project Service, the Customer and Digital jointly specify the scope of the project to be delivered by Digital software professionals and the tangible end-results to be produced. Clear definitions of the deliverables and of the acceptance criteria are developed to determine the exact scope of the effort.

- **PROGRAM MANAGEMENT**

  Dedicated program managers are available to manage the design and implementation of complex, large-scale solutions. Program managers provide the customer with a single interface to Digital and third-parties involved with the solution. The need for program management services increases as solutions get more complex and involve greater numbers of systems and subsystems.

- **REQUIREMENTS AND FEASIBILITY ANALYSIS**

  Digital works with the customer to determine the nature and scope of the solution. The detailed requirements of the solution can be identified and the suitability of the solution can be assessed.

- **MIGRATION SERVICES**

  Migration services are designed to help move a customer's applications, data, and/or programs from an existing system to a Digital platform. Original code will be modified so that it will run successfully on the new system. The results are designed and tested to ensure that all desired functionality is maintained. APS has experts in: Unisys, Wang, Honeywell, IBM, and HP.

- **SPECIAL PLATFORMS & SERVICES**

  — BASEstar is an integration platform for collecting, managing, and distributing real-time, plant floor data to manufacturing applications. BASEstar is a distributed platform, capable of providing these facilities on a plant-wide manufacturing network.

  — DECmessageQ is a distributed message bus platform which provides network transparent data communications to applications.

  — EARS (Electronic Authorization and Routing System) is a ALL–IN–1 based platform for providing electronic signatures and approvals to business forms and documents.

  — VMS Security Enhancement Service (VMS SES) provides mandatory (non-discretionary) access controls and security auditing features for VMS. It is designed for the Customer who must maintain a secure data processing environment involving multiple levels and categories of classified data and users with varying security clearances.

  — DECigs and DECagw are ISDN software platforms that allow VAX/VMS applications to utilize and control information about received (DECigs) and outbound (DECagw) calls using a customer's AT&T PBX. These platforms provide a common interface that can be integrated into applications running in the VAX/VMS environment.

  — VAX/VMS SOURCE KITS contain source modules and libraries for VMS and DECwindows, including the command procedures needed to build VMS and its utilities. The Source Kit is for customers who need to access and/or modify internal routine, drivers and utilities of the VMS operating system.

DIGITAL CONSULTING SERVICES (DCS) BUSINESS UNIT

Consulting provides an integrated set of service offerings to help customers achieve key management objectives from developing a vision of their business direction, through defining an information architecture to implementing specific applications and technology solutions. These consulting engagements may include activities such as:

— Analyzing the customer's current environment and defining their overall information needs.
— Developing customer business and Information Technology goals, design guidelines, standards and overall architecture.
— Providing business process design and functional requirements definition.
— Developing solution proposals, alternative recommendations and the associated cost/benefit analysis.
— Providing advice in support of the customer's on-going application of information technology.
— Providing technical expertise for Digital software products and technologies

CONSULTING SERVICES INCLUDE:

A. MANAGEMENT CONSULTING

Provides business needs analysis, process design, and change management expertise. To build linkages between the client's business objectives, IT strategies and organizational design. Services include:

- Strategic Planning
- Business Process Re-engineering (Strategic Design)
- Requirements Analysis Service
- Information Architecture Service
- Solutions Architecture Service
- Change Management Service
- Investment Evaluation Service
- Implementation Planning Service
- Managing Innovation Service (Game Plan)
- Integration Planning Service
- Systemic Strategic Planning Service
- Achieving Strategic Alignment And Partnering (ASAP)
- Other Custom Management Consulting Services

B. INFORMATION SYSTEMS CONSULTING

Assists development of a company's information technology (IT) strategy and advises customers on how to derive maximum benefit from their investment in Information Technology. To aid customers in the development of Information Architectures in support of their business strategies. To assist customers in achieving total quality management of IS operations. Services include:

- IS Operations Review Service
- Lights Out Computing Design Service
- COHESION (CASE) Consulting
- VAX Performance Management and Capacity Planning Services
- Site Audit Services / Environmental Services
- Security Consulting

  — Security Planning & Review
  — Security Implementation & Enhancement
  — Secure Applications
  — DECInspect/Baseline Security Standard Service
  — DECInspect/Baseline Security Management Service

DIGITAL CONSULTING SERVICES (DCS) BUSINESS UNIT (cont'd)

C. APPLICATIONS CONSULTING

To assist customers in developing applications strategies and implementation plans with focus on Manufacturing, Financial Services, Telecommunications, Healthcare and selected cross-industry applications e.g. Electronic Publishing, EDI, Productions Systems, Finance and Administrative Business Systems (FABS), Office, and Datacenter management. Services include:

- FABS Management Reporting Consulting
- FABS Accounting Systems Consulting
- Manufacturing
  - — Manufacturing Resource Planning
  - — Distribution Resource Planning
  - — Just-In-Time (JIT)
  - — Total Quality Management
  - — Computer-Aided Acquisition and Logistics Support (CALS)
  - — Concurrent Engineering
  - — Semiconductor Manufacturing
  - — Process Simulation
- Office Planning and Design
  - — Application design and programming
  - — Multi-vendor electronic mail & messaging
  - — ALL–IN–1 office system services
  - — ALL–IN–1 DECstart <
- Electronic Data Interchange (EDI)
- EDCS II

DIGITAL CONSULTING SERVICES (DCS) BUSINESS UNIT (cont'd)

D. TECHNOLOGY CONSULTING

Provide expert advice, analysis, and recommendations to aid customers in the use of information technology including for example: Networking, Heterogeneous Desktop, Database, Imaging, Transaction Processing, and Multi-vendor interconnect networking.

- Production Systems
  - — Transaction Processing
  - — Production Systems Planning
  - — Production Systems Management
  - — Database Design
- Network and Telecommunications Consulting
  - — Netplan Requirements Analysis
  - — Netplan Application Design
  - — Netplan Application Development
  - — Network Management Planning
- Technology DECstarts
  - — Database Tuning Consulting
  - — DECmcc
  - — DECmessageQ
  - — DECnet DECstart
  - — DECscheduler
  - — DECset
  - — DECtrace
  - — Network Performance and Capacity Planning Services
  - — Pathworks DECstarts for Apple Macintosh, OS/2, MS/DOS, and Ultrix.
  - — Storage Library System
  - — ULTRIX, ULTRIX RISC, and SCO Unix DECstarts
  - — VAX/VMS DECstart
  - — VAXcluster Console
  - — VAXcluster DECstart
  - — Workstation, DECwindows, & local area network (LAN) consulting

ASSETS SERVICES GENERAL INFORMATION

ASSETS - Solutions Tools & PASS

Digital Services runs the ASSETS program as a distribution channel for reusable and resellable tailored software packages and sub-systems that provide specialized solutions. ASSETS are distributed in two types: Solution Tools and PASS.

A Solution Tool (ST) is a source code building block used as a component of a custom project. The Solution Tool, as part of the project, is delivered by the local EIS delivery unit. User documentation, sales guides, and other delivery materials are generally not available for Solution Tools.

A Packaged Application Software Solution (PASS) is a service offering which consists of three parts: a software application, media & documentation, and installation & orientation. The PASS is delivered by an EIS delivery unit with the standard 90 day project warranty. User documentation, technical descriptions, sales guides, and other delivery materials are also available. The PASS may also be delivered as a component of a larger custom project.

PASS packaging has changed and is now is broken into three components, they must be sold as a package in the initial sale. Individual PASS components can be sold separately on add-on or multiple quantity sales.

Software Volume quantity discounts apply to the Software License. The Media and Documentation Kit for Passes and the corresponding installation and orientation services are not discountable.

The range of volume pricing discounts is:

Quantity Ordered	Price Reduction
5- 24	5%
25- 49	7%
50- 99	10%
100-199	12%
200-249	15%
250-299	17%
300-399	20%
400-499	22%
500-599	24%
600-699	26%
700-799	28%
800-899	30%
900-999	32%

Resellers may take advantage of volume prices as well.

Standard Loan of software product policies and procedures apply to ASSETS software.

CROSS FUNCTIONAL SERVICE PACKAGES

OVERVIEW

This Service Packages Section contains content and ordering information for:

1. STARTUP SERVICE PACKAGES

The Cross-Functional Service Packages Group offers three comprehensive levels of Startup Service Packages (SSPs). Each SSP provides DECstart, one year of service for the operating system and all eligible dependent software products, initial media and documentation for the operating system and all eligible dependent products, and educational training, which is available immediately upon the purchase of the SSP. SPS will service, during the unexpired term of the agreement, any additional dependent Digital licensed software products purchased for the system. Significant savings accrue to the customer when purchasing a Startup Service Package. The SSP price is less than the sum of the individual component prices and is DBA eligible. SSPs are NOT eligible for allowances.

SSP EXCEPTION PRODUCT LIST

The following software products DO NOT qualify for H-Kits, installation, and Media & Documentation Distribution Service when ordered with an SSP. Services for these software products must be purchased separately.

ALL-IN-1 Mail MS/DOS
ALL-IN-1 Mail Server
ALL-IN-1 Starter
ALL-IN-1 Desktop for DOS
AUTOCAD
CSLG Program
DECnet/SNA MS-DOS
Fusion™ TCP/IP
NEXTPERT
Pathworks
Program Devel. Portfolio
VAX DEC/MAP
VMS Services for MS-DOS

NOTE: All DECnet/SNA licensed software products do not receive installation when ordered with an SSP. Please refer to the Software Product Description for the appropriate DECnet/SNA packaged installation service.

SSP PREREQUISITE

Customer Service's System Support Service (SSS) and Layered Product Support (LPS) are prerequisites to purchasing a Startup Service Package. The customer purchasing a processor at Standard List Price automatically meets the SSP prerequisites. The customer purchasing a processor at List Price must purchase SSS for the Operating System and LPS for the layered software products.

* **STARTUP SERVICE PACKAGE - LEVEL III**

  The recommended service option for providing technical assistance and training to get new system users off to quick and productive starts. It is the ideal service solution for the "new-to-Digital" customer.

* **STARTUP SERVICE PACKAGE - LEVEL II**

  Ideal for the customer whose technical staff can support the new system after Digital has trained the staff and installed the operating system and dependent software products. Level II is recommended for customers who need to supplement their technical staff during the implementation of new technology.

* **STARTUP SERVICE PACKAGE - LEVEL I**

  Ideal for the experienced Digital customer who does not need to augment their technical staff during the implementation of new technology and requires only a basic system familiarization to operations after installation and training.

SSP III	SSP II	SSP I
Initial Software Installation	Initial Software Installation	Initial Software Installation
Initial Media & Documentation	Initial Media & Documentation	Initial Media & Documentation
Educational Training Account $$	Educational Training Account $$	Educational Training Account $$
DECstart Plus	DECstart Plus	DECstart
Media & Documentation Distribution Service (MDDS)	Media & Documentation Distribution Service (MDDS)	Media & Documentation Distribution Service (MDDS)
Software System Management Service (SSMS)	Software System Management Service (SSMS)	
Software Update Installation Service (SUIS)		

2. STARTUP SERVICES PACKAGES FOR VAXCLUSTERS

VAXcluster SSPs are available in three levels as are other SSPs. It is necessary to order for the cluster as a unit and for each of the nodes in the cluster. It is for this reason that this separate section is devoted to VAXcluster SSPs.

A. VAXcluster BASE-A STARTUP SERVICE PACKAGES The VAXcluster BASE-A SSPs provide software service support for NI VAXcluster systems.

* UPGRADE-TO-VAXcluster BASE-A Startup Service Packages

These packages assume that VMS expertise exists. A current SPS VMS Agreement is a prerequisite. An UPGRADE-TO-VAXcluster BASE-A SSP and the appropriate processor-specific VAXcluster NODE SSPs must be purchased to provide NI VAXcluster system support for the operating system and all eligible dependent Digital software products.

For example, a Level II SSP for an UPGRADE-TO-VAXcluster NI system consisting of four CPUs (one MicroVAX 3500 & three VAXstation II's) will require the following:

— One QW-026AJ-75 (UPGRADE-TO-VAXcluster BASE-A SSP Level II)

— One QW-026AD-7Z (UPGRADE-TO-VAXcluster MVAX 3xxx NODE SSP Level II)

— Three QW-026AE-7Z (UPGRADE-TO-VAXcluster MVAX/VAXstation II NODE SSPLevel II)

* NEW VAXcluster BASE-A Startup Service Packages

The NEW VAXcluster BASE-A SSPs are available for customers who are new to VMS and NI VAXcluster systems. A NEW VAXcluster BASE-A SSP and the appropriate processor-specific VAXcluster NODE SSPs must be purchased to provide NI VAXcluster system support for the operating system and all eligible dependent Digital software products. For example, a Level III SSP for a NEW VAXcluster NI system consisting of four CPUs (one MicroVAX 3500 & three VAXstation 3540s) will require the following:

— One QW-025AJ-B5 (NEW VAXcluster BASE-A SSP Level III)

— One QW-025AD-BZ (NEW VAXcluster MVAX 3xxx NODE SSP Level III)

— Three QW-025AE-BZ (NEW VAXcluster VAXstation 3xxx NODE SSP LevelIII)

B. VAXcluster BASE-B STARTUP SERVICE PACKAGES

The VAXcluster BASE-B SSPs provide software service support for CI and CI/NI Mixed VAXcluster systems.

* NEW VAXcluster BASE-B Startup Service Packages

The NEW VAXcluster BASE-B SSPs are available for customers who are new to VMS and VAXcluster systems. A NEW VAXcluster BASE-B SSP and the appropriate processor-specific VAXcluster NODE SSPs must be purchased to provide VAXcluster system support for the operating system and all eligible dependent Digital software products.

For example, a Level III SSP for a NEW VAXcluster system consisting of three CPUs (one VAX 8820 & two VAX 6000-420s) will require the following:

— One QW-025AK-BM (NEW VAXcluster BASE-B SSP Level III)

— One QW-025AB-BZ (NEW VAXcluster VAX 8820 NODE SSP Level III)

— Two QW-025AC-BZ (NEW VAXcluster VAX 6xxx NODE SSP Level III)

* UPGRADE-TO-VAXcluster BASE-B Startup Service Packages

These packages assume that VMS expertise exists. A current SPS VMS Agreement is a prerequisite. An UPGRADE-TO-VAXcluster BASE-B SSP and the appropriate processor-specific VAXcluster NODE SSPs must be purchased to provide VAXcluster system support for the operating system and all eligible dependent Digital software products.

For example, a Level II SSP for an UPGRADE-TO-VAXcluster system consisting of three CPUs (one VAX 8820, one VAX 8350, & one VAX 6000-420) will require the following:

— One QW-026AK-7M UPGRADE-TO-VAXcluster BASE-B SSP Level II
— One QW-026AB-7Z UPGRADE-TO-VAXcluster VAX 8820 NODE SSP Level II
— One QW-026AF-7Z UPGRADE-TO-VAXcluster VAX 83xx NODE SSP Level II
— One QW-026AC-7Z UPGRADE-TO-VAXcluster VAX 6xxx NODE SSP Level II

3. NEXT STEP SERVICE PACKAGES

For organizations that have achieved a base level of skill and knowledge in the use of Digital hardware and software–and who now wish to expand their technical expertise in a focused, directed way–Digital's EIS organization offers Next Step Service Packages.

Each Next Step Service offering is a complete package of integrated EIS Services that address a critical, high-visibility need commonly found in medium to large-sized computing environments.

Next Step Service Packages are designed to assist the customer's IS organization gain proficiency in a specific technology or capability. This integrated support includes Evaluation and Planning delivered by Professional Software Service Consultants, Pre-implementation Training Support provided by Customer Training, and Implementation Review delivered by Management Consultants.

INTRODUCTION

Digital's Customer Training offers customers a variety of purchase options designed to make it easy for them to plan, order, and pay for training. Both standard and customized education and training services are available to help them address the people part of their IS solution.

Several Packaged Training programs that discount and simplify training purchases are offered currently. All of these "packaged solutions" include either phone (800 Hotline) or personal consultation to assist the customer with course selection. For added convenience, many of these plans offer monthly billing so that customers can budget annual training costs.

Customized training solutions developed by Digital's Comprehensive Training Solutions group include job-specific training delivered to the job site, computer room to desktop training coordination, training on non-Digital technologies and applications, and turnkey training management and administration.

In addition to packaged and customized solutions, Digital Education and Training offers hundreds of quality courses on over 150 subjects available as self-paced instruction.

PACKAGED TRAINING SOLUTIONS PURCHASE OPTIONS

Choosing the right training can be crucial to the success of any business. For this reason, Digital Education and Training has introduced a new concept in training: Packaged Training Solutions. They are designed for customers and sales representatives who need to make expert training decisions but don't have the time to become training experts.

Packaged Training Solutions are bundled training services designed to fulfill the varying needs of Digital's customers as simply and cost-effectively as possible. Now customers can make one training plan decision, instead of hundreds of decisions on individual courses, taking advantage of significant savings in both time and money.

To make it easy for customers and sales representatives to compare the packaged training solutions, a detailed description of each training program follows.

PACKAGED TRAINING SOLUTIONS PURCHASE OPTIONS (cont'd)

UNLIMITED TRAINING SUBSCRIPTIONS

Whether customers have a new or existing installation, an application requiring immediate and intensive training for key personnel, or they simply need to bring one person up to speed quickly, an Unlimited Training Subscription offers a convenient, cost-effective way to purchase training.

AUDIENCE

The Unlimited Training Subscriptions support the sale of new small, mid-range, or large system purchases.

FEATURES AND BENEFITS

- Unlimited attendance at all regularly scheduled courses in the U.S.
- Save 40% or more versus country list price
- Over 300 courses from which to choose
- Each offering at one low, fixed price
- Free telephone or on-site consultation for named subscribers
- Courses for nearly every job description
- Monthly billing and activity reports

OFFERINGS

There are three subscription plans that allow named subscribers to attend as many courses as they like for a set term. The Unlimited Training Subscriptions are:

- Unlimited Training Subscription (UTS)
- Unlimited Hardware Training Subscription (UHTS)
- Training Proficiency Pass (TPP)

1. **Unlimited Training Subscription (UTS)**

   Customers pay one fixed price to receive unlimited software training for 1, 5, 10, 15, or 20 or more named subscribers for a period of one year. Digital performs free on-site training plan services to determine the customers' needs. All customers receive an eight-course self-paced instruction library at no additional charge. Free on-site training plan services and the eight-course self-paced instruction do not apply to the one-person Unlimited Solopak.

2. **Unlimited Hardware Training Subscription (UHTS)**

   For customers who are self-maintainers, UHTS offers one year of unlimited hardware and software training for 5, 10, or more people at one fixed price. Customers also receive free on-site training plan services to determine training needs.

   In order to attend Digital hardware training, customers must have a valid Digital diagnostic software license. UHTS is not available to independent maintenance suppliers.

   NOTE

   Additional named subscribers may be added any time during the term of the subscription with the Add-on Subscriber Package (UTS/UHTS). Add-on subscribers receive free telephone consultation to help determine training needs. For UTS customers, a five-person Add-on Subscriber Package is also available. (Refer to the Pricing Section for more information.)

3. **Training Proficiency Pass (TPP)**

   The Training Proficiency Pass is designed for organizations that would like to send just one person to unlimited software training. Each Training Pass has a six-month term at one low, fixed price. With TPP, customers receive one bill payable net 30 days from issue; no other discounts apply. Only the named subscriber on the Training Pass is eligible for training, and all training must be completed within the six-month term of the subscription.

EDUPLAN TRAINING SUBSCRIPTIONS

The EDUplan Training Subscription is a volume purchase plan. Customers receive training for as many individuals as they choose for a period of one or two years, depending on the option chosen. It is particularly suitable for customers who require system support, end-user, on-site, and self-maintenance training.

AUDIENCE

This package is ideal for organizations whose user population has a wide variety of training needs. With the EDUplan Training Subscription, customers can choose regularly scheduled hardware maintenance and software lecture/lab courses, seminars, self-paced instruction products, and Digital Press books. Customers may also elect on-site training delivered at their site or exclusive training delivered at Digital facilities exclusively for members of their organization.

EDUplan customers can either enjoy substantial savings on volume training purchases under the EDUplan Savings Plus options or they can pay for training products and services as they are delivered under the Authorized Credit Option.

FEATURES AND BENEFITS

- Save 10%, 25%, or more with Savings Plus options
- Flexibility in choosing training formats
- Configured to fit customer-specific applications and industry
- Each offering at one low, fixed price
- Free telephone consultation
- Courses for nearly every job description
- Over 500 courses from which to choose

OFFERINGS

There are three EDUplan Training Subscriptions.

- EDUplan DBA Savings Plus
- DECplan Non-DBA Savings Plus
- EDUplan Authorized Credit

1. **EDUplan DBA Savings Plus**

   For customers with DBA discounts (10% or more) the EDUplan DBA option is the most cost-effective solution. These customers will receive their DBA discount on all purchases of $15,000 or more. In addition, they receive free one-day on-site training plan services with 800 telephone consulting continuing for the length of the subscription. Monthly billing and activity reports are included. For purchases of $50,000 or more, customers get their DBA discount plus 5%. A two-year subscription is also available with minimum purchases of $50,000.

2. **EDUplan Savings Plus (formerly DECplan)**

   For customers with either small DBA discounts (less than 10%) or no DBA, the EDUplan Savings Plus option is the most cost-effective solution. These customers will receive a 10% discount on all purchases of $15,000 or more. In addition, they receive free one-day on-site training plan consultation with 800 telephone consulting continuing for the length of the subscription. Monthly activity reports and billing are included. EDUplan Savings Plus is a prepaid volume purchase program. For customer purchases of $50,000 or more they get an additional 5% discount, bringing the total discount to 15%.

PACKAGED TRAINING SOLUTIONS PURCHASE OPTIONS (cont'd)

3. EDUplan Authorized Credit Option

For customers who prefer a single annual purchase order and payment as training is delivered, the EDUplan Authorized Credit Option is the best solution. They get free on-site training plan services ($15,000 minimum) and free 800 telephone consulting for the length of the subscription. A Quick Quote Qualifier is required to receive up-front sales certification for all orders over $15,000.

NOTE

An EDUplan Training Subscription Quick Quote Qualifier (EN-C0789-03) is available to help sales representatives quickly size and easily select the right training solution for their customers. To receive an online copy of the Quick Quote Qualifier contact Leo White of the U.S. Proposals Group. Leo can be reached electronically @ MKO or OFFPLS::WHITE, or by phoning DTN 264-5203 or (603)884-5203.

COMPLEMENTARY SOLUTIONS THROUGH TRAINING (CSTT) RESELLERS TRAINING OPTIONS

Complementary Solutions Through Training (CSTT) is a business practice that enables Digital to pass on a substantial training discount to Resellers. The discount applies to any standard Digital training course; training courses taught at customer sites; any standard training format, including self-paced instruction (SPI); most Digital Press materials; the Training Proficiency Pass (TPP) and Solopak; and Profitplan.

In addition, the discount enables Resellers to generate extra profits without increasing expenses. They may also choose to share a portion of the discount with the customer.

AUDIENCE

Profitplan is ideal for Digital Resellers who want to increase revenues and profit margins by giving their customers access to Digital's rich training resources.

FEATURES AND BENEFITS

- Immediately available under existing OEM Addendum
- Training solutions to complement hardware sales
- Convenient single-order processing
- DBA discounts
- Flexibility in choosing training formats
- Courses for nearly every job description
- Over 500 courses from which to choose

OFFERINGS

There are three options available for Resellers to purchase training.

- Individual courses for resale
- Training Proficiency Pass and Solopak for resale
- Profitplan: The Volume Purchase Plan

1. **Individual Courses**

   Resellers can continue to purchase individual Digital training products and services for resale and get a discount according to Volume Curve B of their Digital Business Agreement (DBA) schedule. Easy ordering, administration, and registration procedures make this a particularly attractive option for both Resellers and their customers. In addition, there is no minimum dollar-volume required.

2. **Training Proficiency Pass (TPP) and Solopak**

   The Training Proficiency Pass is designed for organizations that would like to send just one person to unlimited software training for a six-month term at one low, fixed price. Resellers receive their DBA discount on purchases for resale. With TPP, resellers receive one bill payable net 30 days from issue; no other discounts apply. Only the named subscriber on the Training Pass is eligible for training, and all training must be completed within the six-month term of the subscription. Solopak is the new one-year version of the Training Proficiency Pass.

COMPLEMENTARY SOLUTIONS TROUGH TRAINING (CSTT) RESELLERS TRAINING OPTIONS (cont'd)

3. Profitplan Training Subscription: The Volume Purchase Plan

For Resellers, Profitplan is the most profitable way to purchase and resell training. In addition to their OEM DBA discount, Resellers who purchase a Profitplan Training Subscription receive a free one-day on-site training plan consultation with 800 telephone consulting continuing for the length of the subscription. Monthly billing and activity reports are included. For Profitplan purchases of $50,000 or more, Resellers get their DBA discount plus 5%. A two-year subscription is also available with minimum purchases of $50,000.

Customers can choose regularly scheduled hardware maintenance and software lecture/lab courses, seminars, office automation courses, self-paced instruction products, and Digital Press books. They may also elect on-site training delivered at their site or exclusive training delivered at Digital facilities exclusively for members of their organization.

INDIVIDUAL COURSES PRICING

SPECIALIZED OPTIONS

STARTUP SERVICE PACKAGE (SSP)

AUDIENCE

For customers who are new to the Digital style of computing or experienced customers who would like to train their people on a new system or application, Digital offers the Startup Service Package (SSP), a bundled services package that includes Digital Consulting and Training. The dollar amount of the training included in each package varies depending on the system ordered.

FEATURES AND BENEFITS

- Flexibility in choosing training formats
- Configured to fit customer-specific applications
- Free telephone consultation
- Courses for nearly every job description
- Startup Customer Training
- DBA discount
- Easy ordering using only one part number

OFFERINGS

The Startup Service Package offers three comprehensive levels of startup service.

- Level I Startup Service Package (SSP)
- Level II Startup Service Package (SSP)
- Level III Startup Service Package (SSP)

1. **Level I Startup Service Package (SSP)**

   The Level I SSP is the recommended service solution for experienced customers who do not plan to add technical staff during the implementation of new technology, but who wish to familiarize staff with new operations following installation and training.

2. **Level II Startup Service Package (SSP)**

   The Startup Service Package (SSP) Level II is the ideal solution for customers whose technical staff can support a new system after Digital has trained the staff and installed the operating system and dependent products.

3. **Level III Startup Service Package (SSP)** The Level III Startup Service Package (SSP) is an excellent choice for customers who want to help new system users get up to speed quickly and productively.

NOTE

At the end of the term, all unused funds in the SSP Training Account revert to Digital. No refunds or credits will apply.

STARTUP SERVICE PACKAGE (SSP) PRICING

Part No.	Term	Price	Discount
QW-XXX AX-XX*	1 Year	**	DBA

* Refer to Software Services Pricing section for detailed part numbers.
** Included as part of System Startup Package pricing.

SPECIALIZED OPTIONS (cont'd)

COOPERATIVE TRAINING PROGRAM (CTP)

AUDIENCE

The Cooperative Training Program (CTP) is ideal for customers who use Digital's office products extensively and would like to train a large number of designated individuals to use a specific office application. Digital will either train instructors from the customer's company or sell them a license to use Digital course materials in their own training programs.

FEATURES AND BENEFITS

- 50% savings over traditional Digital at-facility training
- One-year license to teach courses developed by Digital
- License to use custom course material and supporting media developed by Digital
- Ability for customers to train their employees at their own site
- Unlimited Right-to-Copy
- Update and support services
- Free telephone consultation
- Single or multiple training sites
- DBA discount

OFFERINGS

There are four product offerings available in this package:

- ALL-IN-1 Basic User
- ALL-IN-1 Basic User with WPS-PLUS
- ALL-IN-1 Basic User with WordPerfect
- DECwrite

COOPERATIVE TRAINING PRICING*

* For more information on pricing, refer to the *Cooperative Training Sales Guide* or the *U.S. Price List.*

SPECIALIZED OPTIONS (cont'd)

ARTIFICIAL INTELLIGENCE FELLOWSHIP PLUS

AUDIENCE

The AI Fellowship Plus is designed to provide a forum for a few, carefully selected individuals to explore ways to solve complex business problems using AI technology. Individuals create workable prototypes, gain knowledge and competency in all the management aspects of AI, and acquire hands-on familiarity with AI languages and tools.

Starting on the date published by the AI Fellowship Program Office, the program combines Digital's six-month AI Fellowship residency program and an additional six months of unlimited access to Digital Education and Training software lecture/labs and seminars for a twelve-month term. All training must be attended within the twelve-month period. In addition, AI Fellowship Plus is non-transferable. Only designated individuals are eligible for the residency program and the additional training.

FEATURES AND BENEFITS

- Unlimited attendance at all regularly scheduled software courses in the U.S. and Canada
- Two-month training curriculum
- Four-month apprenticeship program
- DBA discount

ARTIFICIAL INTELLIGENCE FELLOWSHIP PLUS PRICING

Part No.	Term	Price	Discount
EY-AIFEL-PL	1 Year	$48,000	DBA

NOTE

For available program start dates and locations contact the SI Fellowship Program Management office at (508)490-8315.

TRAINING FORMATS

To accommodate different learning styles, Digital Education and Training offers customers training in a variety of course formats. This gives them the flexibility to decide where, when, and how they will learn. They can choose self-paced courses, hands-on classroom training, or lecture with case study at either a Digital Training Center or their own site. Subject matter covers a broad spectrum ranging from the most technically advanced to basic office applications.

Formats include:

LECTURE/LAB	Courses combine lecture with hands-on training to build the confidence people need to apply new skills and concepts on the job.
SEMINARS	Courses cover technical and management topics and combine the lecture, discussion, and case study method to encourage the exchange of ideas, information, and experience.
ON-SITE TRAINING	Seminar or lecture/lab courses are conducted at the customer's facility.
SELF-PACED	Computer, video- and text-based instruction permits students to learn at their own pace using a hands-on approach.
DIGITAL PRESS	Publishes titles by leading industry experts. Students can supplement classroom training with books on a wide range of subjects, including computer theory and technology, networks, data communications, artificial intelligence, and programming guidelines. Digital Press also produces Digital-specific publications such as Digital technical handbooks and the *Digital Technical Journal*.

For a complete listing of course schedules, refer to the *Customer Education and Training Digest* publication. For more information on lecture/labs, or to register, customers can call 800-332-5656.

NOTE

Customers can order SPI and Digital Press products by calling 800-DIGITAL (800-344-4825).

MODEL NUMBER DESCRIPTORS FOR TRAINING FORMATS

All Customer Education and Training model numbers are in a 2-5-2 format. The last two characters of the descriptor are used to describe the product's format.

The following table is a key to these format designators.

MODEL NUMBER DESCRIPTORS

Self-Paced Instruction	Product Line 002 (Segment Code)
TK = TK50 TAPE	PR, P0, PS = TBI COURSE PACKAGE
VS = IVIS	VU = UMATIC
DP = DIGITAL PRESS	VH = VHS
IX = 5 1/4" Floppy for DOS	SP, SG, PS = STUDENT PACKAGE
IY = 3 1/2" Floppy for DOS	MT = 1600 BPI MAGTAPE
	AX = ADMIN PACKAGE

Lecture/Labs and Seminars	Product Line 003 (Segment Code)
L0 = STANDARD LECTURE LAB AT DIGITAL FACILITY	YC = CUSTOMIZED ON-SITE AT DIGITAL FACILITY
S0 = SCHEDULED SEMINAR	X0 = EXTRA STUDENTS IN ON-SITE OR EXCLUSIVE
Y0 = ON-SITE AT CUSTOMER LOCATION	EC = CUSTOMIZED EXCLUSIVE CUSTOMER LOCATION
E0 = EXCLUSIVE FOR A CUSTOMER AT A DIGITAL FACILITY	K0 = CUSTOMER ILC

NOTE

The numeral zero (0) is used in all product designators listed above, not the letter "O."

ON-SITE AND EXCLUSIVE COURSES AND SEMINARS

AUDIENCE

On-sites and exclusives are a cost-effective way to purchase training. For customers who need to train a large number of people at one time, training at their own site can eliminate or reduce both travel expenses and travel time.

Pricing for most on-site and exclusive courses is set at eight times the standard tuition for that course. These prices include training for up to 15 students, and either instructor travel expenses for on-site training, or room and lab expenses for an exclusive.

On-site courses are identified in the price tables by an EY-XXXXX-Y0 part number, while exclusive courses have an EY-XXXXX-E0 part number. If there are 16 or more students, add $50 per day per student when the number of students exceeds 15. Additional student charges may be entered in AQS using an EY-XXXXX-X0 part number (not shown in the printed price tables).

FEATURES AND BENEFITS

- Ability to customize to fit exact needs
- Savings up to 45%
- Hands-on approach in lecture/lab courses
- Reduced travel expenses
- Ability to use varied training formats
- Convenient scheduling
- Seminars taught by industry leaders
- Lecture courses taught by Digital training professionals
- Consistent training delivered to one audience

OFFERINGS

There are two ways to purchase group training:

- On-sites
- Exclusive

1. On-Site Training

With On-Site training, an expert Digital presenter delivers training at a customer's location and provides course materials specially designed to meet that customer's needs. Presenter travel costs are included in the price.

2. Exclusive Training

Exclusive training is delivered at all Digital U.S. Customer Training campuses exclusively for employees of a customer's organization. Digital provides the classroom and lab equipment, enabling key personnel to learn about the latest Digital technology and products they use on their jobs.

ON-SITE AND EXCLUSIVE COURSES AND SEMINARS (cont'd)

ON-SITE PRICING

Part No.	# of Students	# of Days	Price
EY-XXXXX-Y0	Up to 15	X	Course price X 8
EY-XXXXX-X0	Over 15	X	Course price X 8 + $50 X # people X # days

EXCLUSIVE PRICING

Part No.	# of Students	# of Days	Price
EY-XXXXX-E0	Up to 15	X	Course price X 8
EY-XXXXX-X0	Over 15	X	Course price X 8 + $50 X # people X # of days

EXAMPLES

Part No.	# of Students	# of Days	Price (up to 15 People)	Price (19 people)
EY-XXXXX-E0	15	5	$1,495 X 8 = $11,960	$1495 X 8 = $11,960
EY-XXXXX-X0	4	5		$50 X 4 X 5 days = $1,000
				Total Cost $12,960
EY-XXXXX-Y0	15	3	$ 995 X 8 = $7,960	$995 X 8 = $7,960
EY-XXXXX-X0	7	3		$50 X 7 X 3 days = $1,050
				Total Cost $9,010

COMPREHENSIVE TRAINING SOLUTIONS (CTS)

AUDIENCE

The Comprehensive Training Solutions (CTS) group designs customized training programs for large or small customers who need more than a conventional training solution to meet a changing business environment. The CTS group also works with Resellers to co-develop training on their application. Expert Digital consultants analyze the customer's situation and recommend a solution to meet their needs. This solution may incorporate both Digital and third-party products.

FEATURES AND BENEFITS

- Customized curriculum design
- Convenient, easy-to-use training solutions in a variety of formats
- Cost-effective training delivery method tailored to work environment
- Fixed-price training
- Multivendor support

OFFERINGS

The Comprehensive Training Solutions Group (CTS) offers two types of customized training solutions:

- Systems Integration
- Customized Application

1. **Systems Integration**

   For customers who need training to support Systems Integration solutions, CTS consultants design and implement the people part of the solution. A single point of contact manages the interface and training with various vendor equipment, applications, and solutions, making it easier for the customer to focus on business operations.

2. **Customized Application**

   For customers with specialized applications, Customized Application solutions are available for a fixed price. For example, a company might have a need to make employees in geographically dispersed locations aware of the dangers associated with working with hazardous materials. CTS can design a custom training solution that combines their learning styles and abilities with the skills and knowledge they need to do their jobs effectively in a format that fits the way they work. Regardless of location, employees never have to leave their desks to be trained.

COMPLEMENTARY TRAINING SOLUTIONS PRICING

Part No.	Description	Price
EY-ETGCN-CN	CTS Consultant	$165 per hour
EY-ETGFP-PR	CTS Products	Fixed Cost
EY-CBICC-P1	1 day Lecture/lab to 3-hour CBI	$ 59,500
EY-CBICC-P2	2 day Lecture/lab to 6-hour CBI	$110,000
EY-CBICC-P3	3 day Lecture/lab to 9-hour CBI	$152,000
EY-CBICC-P4	4 day Lecture/lab to 12-hour CBI	$195,000
EY-CBICC-TA	1 week Task Analysis	$ 5,200

NOTE

For more information on Comprehensive Training Solutions (CTS), contact your local Customer Training District Marketing Support Specialist, or the Customer Training Support Group at 800-332-5656.

ORDERING INFORMATION

Digital's Customer Training is part of the Automated Quoting System (AQS) Software Services Configurator, which enables sales representatives to configure lecture/lab software training courses along with software products. When the AQS Educational Services option is selected, the quotation is scanned for a software product, and complementary Customer Training products are automatically displayed onscreen.

Because it provides customers with a comprehensive marketing description quotation, the Automatic Quoting System (AQS) helps set customers' expectations and ensure their acceptance of the terms and conditions of the package. This quotation is required for Customer Administrative Support (CAS) processing. For more information on AQS, call DTN 223-3149. For DSPS problems, product numbers, and pricing call DTN 272-7293.

Before submitting a purchase order, sales representatives should ensure the following:

- The customer's order must refer to and be included with the AQS quotation.
- The customer needs to provide a contact, so that Customer Training can manage delivery.
- The customer's DBA number must be included.

TELESALES SUPPORT GROUP

Telesales Group is available to answer questions regarding products and programs and to help sales representatives configure suitable products and services to meet individual customer's training needs. For more information, contact the Customer Training Telesales Support Group at DTN 249-1500 or (617)276-1500 or call the DECdirect Toll Free Line at 800-344-4825.

REFERENCES AND RESOURCES

Digest - Published six times a year, the Digest provides a complete and up-to-date summary of course offerings, curriculum schedules, information about self-paced text/media training, and the latest on Digital Press books.

Training '91 - The course catalog is published annually in two volumes. Volume I covers software training; Volume II describes hardware maintenance courses. Course maps illustrate how courses in a given subject area relate to each other. The maps help to plan a logical training sequence that will develop a broad set of skills or systematically build expertise in an area of specialty.

Self-Paced Learning Catalog - This catalog contains descriptions of computer-based instruction along with video, text, and text-based with media training as well as a details on the latest computing topics available in Digital Press publications. Updated in the Spring and Fall, it contains an order form that includes part numbers and prices.

Telemarketing - Telephone assistance is available to both sales representatives and customers. By calling 800-332-5656, customers can take advantage of toll-free course ordering and consultation. In addition, sales representatives get Certs credit on every order. Education and Training consultants will help customers select the right course, map out a training program, build a course library, or assist with special training questions.

The Telemarketing group is also available to help sales representatives size the training need, determine the best packaged solution, or map out a sequence of courses for their customer or write a training proposal. Sales representatives can call 800-332-5656.
